

Clinical trial results:

Multi-centre, randomized, double-blind, active- and vehiclecontrolled trial to compare the efficacy and safety of tretinoin clindamycin phosphate gel to clindamycin phosphate gel alone, tretinoin gel alone, and vehicle in the treatment of acne vulgaris in patients from 12 to less than 18 years of age.

Summary

EudraCT number	2010-022918-15
Trial protocol	Outside EU/EEA
Global end of trial date	21 October 2003

Results information

Result version number	v1 (current)
This version publication date	29 July 2016
First version publication date	29 July 2016

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	Yes
EMA paediatric investigation plan number(s)	EMA-000892-PIP01-10
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	Yes
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	28 January 2004
Is this the analysis of the primary completion data?	Yes
Primary completion date	21 October 2003
Global end of trial reached?	Yes
Global end of trial date	21 October 2003
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To compare the efficacy and safety of Clin-RA Gel to Clindamycin phosphate 1.2% Gel alone, Tretinoin 0.025% Gel alone, and Clin-RA Gel vehicle in the treatment of acne vulgaris.

Protection of trial subjects:

No specific additional measures to minimise pain and distress were required. The subjects could withdraw from treatment at any time and for any reason.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	11 February 2003
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	United States: 1288
Worldwide total number of subjects	1288
EEA total number of subjects	0

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	2
Adolescents (12-17 years)	793
Adults (18-64 years)	493
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

Male or female subjects of any race, 12 years of age or older, with acne vulgaris, presenting with 20-50 inflammatory lesions (papules and pustules), 20-100 non-inflammatory lesions (open and closed comedones), and < 2 nodules.

Period 1

Period 1 title	overall trial (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Arms

Are arms mutually exclusive?	Yes
Arm title	Clin-RA

Arm description: -

Arm type	Experimental
Investigational medicinal product name	Clindamycin phosphate 1.2% and Tretinoin 0.025%
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Gel
Routes of administration	Topical use

Dosage and administration details:

Clin-RA Gel (Clindamycin phosphate 1.2% and Tretinoin 0.025%)

Dosing: Once-a-day application (at bedtime)

Mode of Administration: Topically applied to the face

Arm title	Clindamycin
------------------	-------------

Arm description: -

Arm type	Active comparator
Investigational medicinal product name	Clindamycin phosphate 1.2%
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Gel
Routes of administration	Topical use

Dosage and administration details:

Clindamycin phosphate 1.2% (in same vehicle as investigational product)

Dosing: Once-a-day application (at bedtime)

Mode of Administration: Topically applied to the face

Arm title	Tretinoin
------------------	-----------

Arm description: -

Arm type	Active comparator
Investigational medicinal product name	Tretinoin 0.025%
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Gel
Routes of administration	Topical use

Dosage and administration details:

Tretinoin 0.025% (in same vehicle as investigational product)

Dosing: Once-a-day application (at bedtime)

Mode of Administration: Topically applied to the face

Arm title	Vehicle
Arm description: -	
Arm type	Vehicle
Investigational medicinal product name	N/A (vehicle)
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Gel
Routes of administration	Topical use

Dosage and administration details:

Dosing: Once-a-day application (at bedtime)

Mode of Administration: Topically applied to the face
