

## Clinical trial results:

### A Phase 2, Randomized, Dose-Ranging Study to Assess the Safety And Anti-Cytomegalovirus (CMV) Activity of Maribavir Versus Valganciclovir for Treatment of CMV Infections in Transplant Recipients Who Do Not Have CMV Organ Disease

#### Summary

EudraCT number	2010-024247-32
Trial protocol	BE DE FR AT ES GB
Global end of trial date	25 July 2014

#### Results information

Result version number	v2 (current)
This version publication date	25 November 2018
First version publication date	01 July 2015
Version creation reason	<ul style="list-style-type: none"><li>• Correction of full data set</li><li>Update statistical analysis for one endpoint.</li></ul>

#### Trial information

##### Trial identification

Sponsor protocol code	1263-203
-----------------------	----------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	-
WHO universal trial number (UTN)	-

Notes:

#### Sponsors

Sponsor organisation name	Shire Development LLC (formerly ViroPharma Incorporated)
Sponsor organisation address	725 Chesterbrook Boulevard, Wayne, Pennsylvania, United States, 19087
Public contact	Clinical Study Manager, Viropharma , 0032 23007811, Katrien.Danneels@viropharma.com
Scientific contact	Clinical Study Manager, Viropharma , 0032 23007811, Katrien.Danneels@viropharma.com

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	11 March 2015
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	25 July 2014
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

To assess the safety and tolerability of different doses of maribavir versus valganciclovir, administered orally for up to 12 weeks, for treatment of Cytomegalovirus (CMV) infections in recipients of stem cell or solid organ transplants who do not have CMV organ disease.

Protection of trial subjects:

This study was conducted in accordance with International Conference on Harmonisation of Good Clinical Practice, the principles of the Declaration of Helsinki, as well as other applicable local ethical and legal requirements.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	14 May 2012
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	France: 12
Country: Number of subjects enrolled	Germany: 27
Country: Number of subjects enrolled	United Kingdom: 17
Country: Number of subjects enrolled	Austria: 10
Country: Number of subjects enrolled	Belgium: 67
Country: Number of subjects enrolled	Spain: 26
Worldwide total number of subjects	159
EEA total number of subjects	159

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0

Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	124
From 65 to 84 years	35
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

Subjects who had neither CMV organ disease nor CMV infection that was genotypically resistant to other anti-CMV drugs and documented CMV infection in blood or plasma, with a screening value of  $\geq 1,000$  to  $\leq 100,000$  DNA copies/mL as determined by quantitative polymerase chain reaction (PCR) or comparable quantitative CMV assay type were recruited.

### Pre-assignment

Screening details:

Of the 174 subjects screened to participate in the study, 13 were screen failures. Therefore, 161 were randomized.

### Period 1

Period 1 title	Overall study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Data analyst, Carer, Monitor

Blinding implementation details:

Regarding subjects who received maribavir; subjects, investigators, and study staff knew that they were receiving maribavir, but were blinded to dose strength and an unblinded, independent statistician from the Sponsor's biostatistics contract research organization (CRO) provided the data monitoring committee (DMC) with unblinded data reports for their review.

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Maribavir 400 mg

Arm description:

Maribavir 400 milligrams (mg) tablet orally twice a day (BID) up to 12 weeks.

Arm type	Experimental
Investigational medicinal product name	Maribavir
Investigational medicinal product code	VP 41263, SHP620
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Maribavir 400 mg tablet orally BID up to 12 weeks.

<b>Arm title</b>	Maribavir 800 mg
------------------	------------------

Arm description:

Maribavir 800 mg tablet orally BID up to 12 weeks.

Arm type	Experimental
Investigational medicinal product name	Maribavir
Investigational medicinal product code	VP 41263, SHP620
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Maribavir 800 mg tablet orally BID up to 12 weeks.

<b>Arm title</b>	Maribavir 1200 mg
------------------	-------------------

Arm description:

Maribavir 1200 mg tablet orally BID up to 12 weeks.

Arm type	Experimental
Investigational medicinal product name	Maribavir
Investigational medicinal product code	VP 41263, SHP620
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Maribavir 1200 mg tablet orally BID up to 12 weeks.

<b>Arm title</b>	Valganciclovir 900 mg
------------------	-----------------------

Arm description:

Valganciclovir 900 mg tablet orally BID for 3 weeks, thereafter once daily (QD) up to 9 weeks.

Arm type	Experimental
Investigational medicinal product name	Valganciclovir
Investigational medicinal product code	
Other name	Valcyte®, Roche
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Valganciclovir 900 mg tablet orally BID for 3 weeks, thereafter QD up to 9 weeks.

<b>Number of subjects in period 1</b>	Maribavir 400 mg	Maribavir 800 mg	Maribavir 1200 mg

Reporting group description: Valganciclovir 900 mg tablet orally BID for 3 weeks, thereafter once daily (QD) up to 9 weeks.	
Subject analysis set title	Maribavir All Doses
Subject analysis set type	Sub-group analysis
Subject analysis set description: Maribavir (N= 119) 400 or 800 or 1200 mg tablet orally BID for 12 weeks.	

### Primary: Number Of Subjects With Confirmed Undetectable Plasma Cytomegalovirus (CMV) Deoxyribonucleic Acid (DNA) (Central Laboratory) Within 3 Weeks

End point title	Number Of Subjects With Confirmed Undetectable Plasma Cytomegalovirus (CMV) Deoxyribonucleic Acid (DNA) (Central Laboratory) Within 3 Weeks
End point description: Plasma CMV DNA was assayed using polymerase chain reaction (PCR) testing, this method was linear over the range 200-100,000 viral copies per milliliter (copies/mL) with a lower limit of quantification (LLOQ) of 200 copies/mL and any results below this LLOQ are referred to as undetectable. Confirmed undetectable plasma CMV DNA (central laboratory) was defined as 2 consecutive post-baseline, on-treatment undetectable results (<200 copies/mL) separated by at least 5 days. Intent-to-treat Safety (ITT-S) Population included all subjects who were randomized and received at least one dose of study drug.	
End point type	Primary

## Secondary: Number of Subjects With Cytomegalovirus (CMV) Recurrence From Last Dose of Study Drug During The Study

End point title	Number of Subjects With Cytomegalovirus (CMV) Recurrence From Last Dose of Study Drug During The Study
End point description: Last Dose Of Study Drug To CMV recurrence during the study was defined as the first of at least 2 consecutive samples, separated by at least 5 days, with detectable plasma CMV DNA (central laboratory) after achievement of undetectable plasma CMV DNA (central laboratory) in at least 2 consecutive samples, separated by at least 5 days, after the last dose of study drug. Censored observations included subjects who did not meet the criteria for CMV recurrence and subjects who discontinued the study for any reason prior to achieving undetectable plasma CMV DNA. ITT-S population.	
End point type	Secondary
End point timeframe: Up to week 24

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
04 November 2013	Added a new protocol section to clarify medications that were used for prevention or treatment of Herpes simplex virus (HSV) or Varicella zoster virus (VZV) infections during the study.

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
