Notes:

General information about the trial

Main objective of the trial:

To demonstrate comparable efficacy as measured by the composite efficacy failure of tBPAR, GL or death (D) with everolimus in combination with reduced tacrolimus compared to standard exposure tacrolimus, at 12 months post-transplantation, in living donor liver transplant recipients.

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and the International Conference on Harmonization (ICH) Good Clinical Practice (GCP) guidelines. All the local regulatory requirements pertinent to safety of trial subjects were also followed during the conduct of the trial.

Subject disposition

Recruitment

Recruitment details:

In all, 284 patients were randomized after transplantation to EVR+Reduced TAC group and TAC Control group. Two patients were not eligible and randomized in IRT by mistake and to whom no study medication was given, and so did not have their data included

Pre-assignment

Screening details:

A total of 494 patients were screened. Of these, 448 patients received a liver transplant and entered the run-in period.

Data reported here are the CRAD001H2307 core study results and its extension (CRAD001H2307E1).

Period 1

Period 1 title	12-month analysis (FAS)
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	No
Arm title	EVR+Reduced TAC

Arm description:

Everolimus + reduced tacrolimus ± corticosteroids

Arm type	Experimental
Investigational medicinal product name	Everolimus
Investigational medicinal product code	RAD001
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use, Intravenous use

Dosage and administration details:

as 1.0 mg, 0.75 and 0.50 mg tablets

Arm title	TAC Control

Arm description:

Standard tacrolimus ± corticosteroids

Arm type	Active comparator
Investigational medicinal product name	tacrolimus
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

0.5 mg, 1.0 mg and 5.0 mg capsules

Notes:

[1] - Period 1 is not the baseline period. It is expected that period 1 will be the baseline period.

Justification: The study has an long term extension (CRAD001H2307E1) in Japan and approximately 28 patients were to be included to evaluate the long-term efficacy and safety of concentration controlled everolimus regimen plus reduced tacrolimus compared to standard tacrolimus in recipients of living donor liver transplants in Japan who participated in the CRAD001H2307 study.

Data reported in this period are from the extension trial (CRAD001H2307E1).

Notes:

[2] - The number of subjects starting the period is not consistent with the number completing the preceding period. It is expected the number of subjects starting the subsequent period will be the same as the number completing the preceding period.
Justification: The study has an long term extension (CRAD001H2307E1) in Japan and approximately 28 patients were to be included to evaluate the long-term efficacy and safety of concentration controlled everolimus regimen plus reduced tacrolimus compared to standard tacrolimus in recipients of living donor liver transplants in Japan who participated in the CRAD001H2307 study.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
30 January 2015	The amendment introduced the following changes: 1. The sample size reduction and power recalculation 2. A standardized definition for the assessment of NODM 3. The central reading of the tumor biopsy from the explanted liver of patients with HCC

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

Data recorded here are the CRAD001H2307 core study results and its extension trial (CRAD001H2307E1) in Japan.
