Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	04 January 2016
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	04 January 2016
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The main objective of this study was to investigate the efficacy and safety of 400 units NT 201 compared with placebo in the first double-blind treatment cycle, and to investigate the safety of 400 units NT 201 administered in three subsequent open-label treatment cycles.

Protection of trial subjects:

High medical and ethical standards were followed in accordance with Good Clinical Practice and other applicable regulations. In addition, an independent data monitoring committee was in charge of monitoring patient safety while the study was ongoing.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	01 February 2012
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Poland: 111
Country: Number of subjects enrolled	Russian Federation: 43
Country: Number of subjects enrolled	Czech Republic: 39
Country: Number of subjects enrolled	United States: 37
Country: Number of subjects enrolled	Germany: 23
Country: Number of subjects enrolled	Spain: 20
Country: Number of subjects enrolled	Canada: 8
Country: Number of subjects enrolled	Italy: 5
Country: Number of subjects enrolled	France: 3
Worldwide total number of subjects	289
EEA total number of subjects	201

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0

Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	203
From 65 to 84 years	86
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

A total of 331 individuals suffering from post-stroke lower-limb spasticity were screened and 290 were included in study at 51 sites. One ineligible subject was randomized to placebo but withdrawn from study prior to first treatment with study medication. For purpose of study analysis overall number of subjects enrolled is therefore considered 289.

Pre-assignment

Screening details:

A total of 289 subjects were enrolled in main period. All of the 269 subjects who completed the main period of the study entered the open-label extension period.

Period 1

Period 1 title	Main Period
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Investigator, Subject

Arms

Are arms mutually exclusive?	Yes
Arm title	IncobotulinumtoxinA (Xeomin) 400 Units

Arm description:

IncobotulinumtoxinA (Xeomin, also known as "NT 201" or "Botulinum toxin type A (150 kiloDalton), free from complexing proteins") (active ingredient: Clostridium Botulinum neurotoxin Type A free from complexing proteins) powder for solution for injection.

IncobotulinumtoxinA (400 Units): Main period: One injection session of solution, prepared by reconstitution of powder with 0.9 percent (%) Sodium Chloride (NaCl), 400 units, total volume 8.0 milliliter (mL); Mode of administration: intramuscular injection.

Arm type	Experimental
Investigational medicinal product name	NT 201
Investigational medicinal product code	NT 201
Other name	
Pharmaceutical forms	Powder for solution for injection
Routes of administration	Intramuscular use

Dosage and administration details:

Subjects received IncobotulinumtoxinA (400 Units) one intramuscular injection session of solution, prepared by reconstitution of powder with 0.9% NaCl, 400 units, total volume 8.0 ml.

Arm title	Placebo
------------------	---------

Arm description:

Placebo to incobotulinumtoxinA (Xeomin) powder for solution for injection.

Placebo Comparator: Main period: one injection session of solution, prepared by reconstitution of powder with 0.9% NaCl, corresponding total placebo volume 8.0 mL; Mode of administration: intramuscular injection

Arm type	Experimental
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder for solution for injection
Routes of administration	Intramuscular use

Dosage and administration details:

Subjects received Placebo to IncobotulinumtoxinA one intramuscular injection session of solution,

prepared by reconstitution of powder with 0.9% NaCl, 400 units, total volume 8.0 mL.

Number of subjects in period 1	IncobotulinumtoxinA (Xeomin) 400 Units	Placebo
Started	144	145
Treated	144	145
Completed	129	140
Not completed	15	5
Adverse event, serious fatal	-	1
Consent withdrawn by subject	5	2
Adverse event, non-fatal	6	1
Lack of efficacy	2	-
Predefined discontinuation criteria	2	1

Period 2

Period 2 title	Open-Label Extension Period
Is this the baseline period?	No
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Arm title	IncobotulinumtoxinA (Xeomin) 400 Units

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
16 August 2011	The overall reason for the amendment was to fulfil a post marketing commitment (PMC) for Xeomin in the United States. A co-primary endpoint was added, the 'Investigator's Global Assessment of Efficacy'. This scale had been part of the Study Protocol as tertiary outcome measure before. Accordingly, details on the analyses of the primary endpoint(s) were updated. The Ashworth Scale (AS) and the co-primary endpoint were only to be co-analyzed for United States submission and both had to show significant treatment differences.
16 May 2014	The overall reason for the amendment was to implement a revision of sample-size calculation and to implement current updates of approval status, safety information and statistical methods.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
