

## Clinical trial results:

**Multi-centre, randomized, double-blind, placebo-controlled, parallel-group, 9 month, equivalence trial comparing the efficacy and safety and tolerability of GTR (Synthon BV) to Copaxone® (Teva) in subjects with relapsing remitting multiple sclerosis followed by an open-label 15 month GTR treatment part evaluating the long-term GTR treatment effects**

### Summary

EudraCT number	2011-000888-27
Trial protocol	CZ BG GB DE EE GR IT RO
Global end of trial date	16 July 2015

### Results information

Result version number	v1 (current)
This version publication date	10 July 2016
First version publication date	10 July 2016

### Trial information

#### Trial identification

Sponsor protocol code	GTR001
-----------------------	--------

#### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT01489254
WHO universal trial number (UTN)	-

Notes:

### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	16 July 2015
Is this the analysis of the primary completion data?	Yes
Primary completion date	16 July 2015
Global end of trial reached?	Yes
Global end of trial date	16 July 2015
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

To demonstrate that the efficacy of Synthon's glatiramer acetate (GTR) is equivalent to Copaxone® (TEVA) in subjects with relapsing remitting multiple sclerosis (RRMS) as measured by the number of gadolinium-enhancing lesions on T1-weighted MRIs during the months 7-9.

Protection of trial subjects:

The study was conducted in accordance with the principles of the "Declaration of Helsinki" and Good Clinical Practice according to the regulations and procedures described in the protocol. Written informed consent was obtained from each participant in the study. Approval from the independent Ethics Committees/Institutional Review Board was obtained before starting the study.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	01 September 2011
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Belarus: 65
Country: Number of subjects enrolled	Croatia: 16
Country: Number of subjects enrolled	Serbia: 62
Country: Number of subjects enrolled	Bosnia and Herzegovina: 24
Country: Number of subjects enrolled	United States: 7
Country: Number of subjects enrolled	Russian Federation: 188
Country: Number of subjects enrolled	Mexico: 7
Country: Number of subjects enrolled	Ukraine: 195
Country: Number of subjects enrolled	Moldova, Republic of: 26
Country: Number of subjects enrolled	Georgia: 32
Country: Number of subjects enrolled	South Africa: 15
Country: Number of subjects enrolled	Poland: 72
Country: Number of subjects enrolled	Romania: 15
Country: Number of subjects enrolled	United Kingdom: 18
Country: Number of subjects enrolled	Bulgaria: 31
Country: Number of subjects enrolled	Czech Republic: 20
Country: Number of subjects enrolled	Estonia: 3
Worldwide total number of subjects	796
EEA total number of subjects	175

Notes:

<b>Subjects enrolled per age group</b>	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	796
From 65 to 84 years	0
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

1549 patients were assessed for eligibility of whom 796 subjects were randomized in a 4.3:4.3:1 ratio to receive generic glatiramer acetate (GTR), brand glatiramer acetate (Copaxone) or matching placebo.

### Pre-assignment

Screening details:

Overall 1549 subjects were screened of whom 796 subjects were randomized into the study, two subjects were randomized to the generic glatiramer acetate group but did not start treatment

### Period 1

Period 1 title	Double-blind Part
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Data analyst, Carer, Assessor

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Glatiramer 20 mg

Arm description:

Glatiramer Acetate (GTR) 20 mg daily for 9 months

Arm type	Experimental
Investigational medicinal product name	Glatiramer Acetate 20 mg
Investigational medicinal product code	GTR
Other name	
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:

20 mg/mL, 1 mL syringe, daily injections

<b>Arm title</b>	Copaxone 20 mg
------------------	----------------

Arm description:

Glatiramer Acetate (Copaxone) 20 mg daily for 9 months

Arm type	Active comparator
Investigational medicinal product name	Copaxone 20 mg
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:

20 mg/mL, 1 mL syringe, daily injections

<b>Arm title</b>	Placebo
------------------	---------

Arm description:

Placebo daily for 9 months

Arm type	Placebo
----------	---------

Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use
Dosage and administration details:	
1 mL syringe, daily injections	

Number of subjects in period 1	Glatiramer 20 mg	Copaxone 20 mg	Placebo
Started	355	357	84
Completed	330	324	81
Not completed	25	33	3
Consent withdrawn by subject	12	20	1
Adverse event, non-fatal	7	2	2
Other	4	6	-
Pregnancy	1	3	-
Lost to follow-up	1	2	-

## Period 2

Period 2 title	Open-label Extension Part
Is this the baseline period?	No
Allocation method	Not applicable
Blinding used	Not blinded

## Arms

Arm title	Extension glatiramer 20 mg
Arm description:	
Glatiramer Acetate (GTR) 20 mg daily for 15 months	
Arm type	Experimental
Investigational medicinal product name	Glatiramer Acetate 20 mg
Investigational medicinal product code	GTR
Other name	
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:

20 mg/mL, 1 mL syringe, daily injections

<b>Number of subjects in period 2<sup>[1]</sup></b>	<b>Extension glatiramer 20 mg</b>
Started	728
Completed	670
Not completed	58
Consent withdrawn by subject	30
Adverse event, non-fatal	10
Other	5
Pregnancy	3
Lost to follow-up	9
Protocol deviation	1

---

Notes:

[1] - The number of subjects starting the period is not consistent with the number completing the preceding period. It is expected the number of subjects starting the subsequent period will be the same as the number completing the preceding period.

Justification: 735 completed the DB part, 729 were eligible to continue in the OL part, 1 opted not to continue

## Baseline characteristics

### Reporting groups

Reporting group title	Glatiramer 20 mg
Reporting group description: Glatiramer Acetate (GTR) 20 mg daily for 9 months	
Reporting group title	Copaxone 20 mg
Reporting group description: Glatiramer Acetate (Copaxone) 20 mg daily for 9 months	
Reporting group title	Placebo
Reporting group description: Placebo daily for 9 months	

Reporting group values	Glatiramer 20 mg	Copaxone 20 mg	Placebo
Number of subjects	355	357	84
Age categorical Units: Subjects			
In utero Preterm newborn infants (gestational age < 37 wks) Newborns (0-27 days) Infants and toddlers (28 days-23 months) Children (2-11 years) Adolescents (12-17 years) Adults (18-64 years) From 65-84 years 85 years and over			
Age continuous Units: years			
arithmetic mean standard deviation	32.6 ± 8.6	33.8 ± 9	32.6 ± 8.7
Gender categorical Units: Subjects			
Female Male	234 121	238 119	57 27
Time from onset of symptoms to randomization (y) Units: Years			
arithmetic mean standard deviation	5.5 ± 5.3	6.4 ± 6	5.7 ± 6
No. of relapses in prior 2 y Units: Relapses			
arithmetic mean standard deviation	1.9 ± 0.9	1.8 ± 0.9	1.9 ± 0.9

Reporting group values	Total		
Number of subjects	796		

Age categorical Units: Subjects			
In utero	0		
Preterm newborn infants (gestational age < 37 wks)	0		
Newborns (0-27 days)	0		
Infants and toddlers (28 days-23 months)	0		
Children (2-11 years)	0		
Adolescents (12-17 years)	0		
Adults (18-64 years)	0		
From 65-84 years	0		
85 years and over	0		
Age continuous Units: years arithmetic mean standard deviation	-		
Gender categorical Units: Subjects			
Female	529		
Male	267		
Time from onset of symptoms to randomization (y) Units: Years arithmetic mean standard deviation	-		
No. of relapses in prior 2 y Units: Relapses arithmetic mean standard deviation	-		

## End points

### End points reporting groups

Reporting group title	Glatiramer 20 mg
Reporting group description: Glatiramer Acetate (GTR) 20 mg daily for 9 months	
Reporting group title	Copaxone 20 mg
Reporting group description: Glatiramer Acetate (Copaxone) 20 mg daily for 9 months	
Reporting group title	Placebo
Reporting group description: Placebo daily for 9 months	
Reporting group title	Extension glatiramer 20 mg
Reporting group description: Glatiramer Acetate (GTR) 20 mg daily for 15 months	

### Primary: The number of T1-Gadolinium enhancing lesions during months 7-9

End point title	The number of T1-Gadolinium enhancing lesions during months 7-9
End point description:	
End point type	Primary
End point timeframe: 9 months	

End point values	Glatiramer 20 mg	Copaxone 20 mg	Placebo	
Subject group type	Reporting group	Reporting group	Reporting group	
Number of subjects analysed	353	357	84	
Units: Number of Gd lesions				
arithmetic mean (confidence interval 95%)				
Number of Gd lesions (study sensitivity)	0.42 (0.31 to 0.57)	0.38 (0.28 to 0.52)	0.82 (0.57 to 1.2)	
Number of Gd lesions (equivalence)	0.45 (0.34 to 0.59)	0.41 (0.31 to 0.54)	0 (0 to 0)	

### Statistical analyses

Statistical analysis title	Study sensitivity
Statistical analysis description: Estimates represent the mean total lesions during months 7 through 9 and were estimated from the fitted random effect generalized linear model (longitudinal model) with a negative binomial distribution and logarithmic link function. To assess study sensitivity, data of the active treatment groups and placebo were included in the model, resulting in the ratios and 95% CIs for the combined Glatiramer 20 mg and Copaxone 20 mg treatment group and the individual treatments over placebo.	

Comparison groups	Copaxone 20 mg v Placebo v Glatiramer 20 mg
Number of subjects included in analysis	794
Analysis specification	Pre-specified
Analysis type	superiority <sup>[1]</sup>
Parameter estimate	Ratio (or Ratio of estimated means)
Point estimate	0.488
Confidence interval	
level	95 %
sides	2-sided
lower limit	0.365
upper limit	0.651

Notes:

[1] - To conclude study sensitivity the combined active treatment groups Glatiramer 20 mg and Copaxone 20 mg needed to be superior to placebo.

<b>Statistical analysis title</b>	Equivalence
-----------------------------------	-------------

Statistical analysis description:

Estimates represent the mean total lesions during months 7 through 9 and were estimated from the fitted random effect generalized linear model (longitudinal model) with a negative binomial distribution and logarithmic link function including Glatiramer 20 mg and Copaxone 20 mg treatment groups to assess study equivalence.

Comparison groups	Glatiramer 20 mg v Copaxone 20 mg
Number of subjects included in analysis	710
Analysis specification	Pre-specified
Analysis type	equivalence <sup>[2]</sup>
Parameter estimate	Ratio (or Ratio of estimated means)
Point estimate	1.095
Confidence interval	
level	95 %
sides	2-sided
lower limit	0.883
upper limit	1.36

Notes:

[2] - To conclude equivalence between Glatiramer 20 mg and Copaxone 20 mg, efficacy in the combined active treatment groups needed to be superior to placebo (confirming study sensitivity) and the 2-sided 95% CI for the estimated ratio of Glatiramer 20 mg to Copaxone 20 mg needed to be fully enclosed in the prespecified equivalence margin (0.727 - 1.375). Study sensitivity was already concluded in statistical analysis "Study sensitivity".

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Total trial period

Adverse event reporting additional description:

The safety population consisted of all subjects who received at least 1 injection with study treatment

Assessment type	Systematic

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
21 June 2012	As per Protocol Amendment 1 (i) a local tolerance assessment was added at the start of the open label phase (month 9), (ii) subjects with active disease who experienced a relapse after being found eligible were allowed to be randomized and, (iii) subjects who could not start day 1 assessments due to logistical reasons beyond their control were allowed an extended screening window of maximally 90 days.
31 May 2013	As per Protocol Amendment 2 additional requirements were formulated in the protocol related to the inclusion criteria and characteristics for patients or volunteers undergoing an MRI test scan to qualify each imaging site prior to the start of screening trial participants.

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported

---
