Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	09 April 2018
Is this the analysis of the primary completion data?	Yes
Primary completion date	09 April 2018
Global end of trial reached?	Yes
Global end of trial date	09 April 2018
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The primary objective of this study was to evaluate hepatitis C virus (HCV) viral sequences and the persistence or evolution of treatment-emergent viral mutations in participants who fail to achieve a sustained viral response (SVR) after treatment with a Gilead oral antiviral (OAV) containing regimen in a previous Gilead-sponsored hepatitis C study.

Protection of trial subjects:

The protocol and consent/assent forms were submitted by each investigator to a duly constituted Independent Ethics Committee (IEC) or Institutional Review Board (IRB) for review and approval before study initiation. All revisions to the consent/assent forms (if applicable) after initial IEC/IRB approval were submitted by the investigator to the IEC/IRB for review and approval before implementation in accordance with regulatory requirements.

This study was conducted in accordance with recognized international scientific and ethical standards, including but not limited to the International Conference on Harmonization guideline for Good Clinical Practice (ICH GCP) and the original principles embodied in the Declaration of Helsinki.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	19 December 2011
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	United States: 403
Country: Number of subjects enrolled	Australia: 38
Country: Number of subjects enrolled	Canada: 33
Country: Number of subjects enrolled	Puerto Rico: 16
Country: Number of subjects enrolled	New Zealand: 15
Country: Number of subjects enrolled	Netherlands: 3
Country: Number of subjects enrolled	Poland: 1
Country: Number of subjects enrolled	Spain: 9
Country: Number of subjects enrolled	Sweden: 2
Country: Number of subjects enrolled	United Kingdom: 8
Country: Number of subjects enrolled	Czech Republic: 3
Country: Number of subjects enrolled	Estonia: 1
Country: Number of subjects enrolled	France: 11
Country: Number of subjects enrolled	Germany: 22
Country: Number of subjects enrolled	Italy: 2

Worldwide total number of subjects	567
EEA total number of subjects	62

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	530
From 65 to 84 years	37
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Participants were enrolled at study sites in the United States, Australia, Canada, New Zealand, and Europe. The first participant was screened on 19 December 2011. The last study visit occurred on 09 April 2018.

Pre-assignment

Screening details:

570 participants consented to participate the study. Three participants who did not have at least 1 postenrollment visit were excluded from all analyses.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	SOF+RBV±PEG

Arm description:

Participants previously received sofosbuvir (SOF) + ribavirin (RBV) with or without pegylated interferon (PEG).

Arm type	Observational
Investigational medicinal product name	Sofosbuvir
Investigational medicinal product code	
Other name	SOF, Sovaldi®
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

No treatment was administered in this observational study. Participants received SOF in a previous Gilead-sponsored study.

Investigational medicinal product name	Ribavirin
Investigational medicinal product code	
Other name	RBV
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

No treatment was administered in this observational study. Participants received RBV in a previous Gilead-sponsored study.

Investigational medicinal product name	Pegylated interferon
Investigational medicinal product code	
Other name	PEG
Pharmaceutical forms	Injection
Routes of administration	Subcutaneous use

Dosage and administration details:

No treatment was administered in this observational study. Participants received PEG in a previous Gilead-sponsored study.

Arm title	LDV/SOF±RBV
------------------	-------------

Arm description:

Participants previously received ledipasvir/sofosbuvir (LDV/SOF) with or without RBV.

Arm type	Observational
----------	---------------

Investigational medicinal product name	Ledipasvir/sofosbuvir
Investigational medicinal product code	
Other name	LDV/SOF, Harvoni®
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

No treatment was administered in this observational study. Participants received LDV/SOF in a previous Gilead-sponsored study.

Investigational medicinal product name	Ribavirin
Investigational medicinal product code	
Other name	RBV
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

No treatment was administered in this observational study. Participants received RBV in a previous Gilead-sponsored study.

Arm title	SOF/VEL±RBV
------------------	-------------

Arm description:

Participants previously received sofosbuvir/velpatasvir (SOF/VEL) with or without RBV.

Arm type	Observational
Investigational medicinal product name	Sofosbuvir/velpatasvir
Investigational medicinal product code	
Other name	SOF/VEL, Epclusa®
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

No treatment was administered in this observational study. Participants received SOF/VEL in a previous Gilead-sponsored study.

Investigational medicinal product name	Ribavirin
Investigational medicinal product code	
Other name	RBV
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

No treatment was administered in this observational study. Participants received RBV in a previous Gilead-sponsored study.

Arm title	SOF/VEL/VOX
------------------	-------------

Arm description:

Participants previously received sofosbuvir/velpatasvir/voxilaprevir (SOF/VEL/VOX).

Arm type	Observational
Investigational medicinal product name	Sofosbuvir/velpatasvir/voxilaprevir
Investigational medicinal product code	
Other name	SOF/VEL/VOX, Vosevi®
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

No treatment was administered in this observational study. Participants received SOF/VEL/VOX in a previous Gilead-sponsored study.

Arm title	Other
------------------	-------

Arm description:

Participants previously received other HCV treatment. Other HCV treatment included SOF and products other than those in above arms.

Arm type	Observational
----------	---------------

Primary: Percentage of Participants With at Least 1 Resistance-Associated Variant (RAV) Loss

End point title	Percentage of Participants With at Least 1 Resistance-Associated Variant (RAV) Loss ^[1]
-----------------	--

End point description:

The RAV count was defined as the count of any RAV that was not detected at baseline of the parent study for a participant, but was detected in any other visit. The total RAV count was defined as the sum of the RAV counts across all 3 HCV genes (NS5A, NS5B, and NS3) for a visit. The cumulative RAV count was defined as the union of the RAV counts across all visits from relapse for an HCV gene. The total cumulative RAV count was defined as the sum of the cumulative RAV counts across all 3 HCV genes. RAV loss was defined as the cumulative RAV count minus the last RAV count with value of ≥ 0 . Participants in the Virological Analysis Set (participants with virology data from time of failure in the most recent treatment protocol [including participants with attempted sequencing but failed, and participants who are indicated as with no data available at a specific time point]) with total cumulative RAV count ≥ 1 and RAV count ≥ 0 in at least 1 of the HCV genes were included in the analysis.

End point type	Primary
----------------	---------

End point timeframe:

Enrollment to End of Study (up to 3 years)

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: No statistical comparison was planned or performed.

Secondary: Percentage of Participants with RAV Loss by Unit Category

End point title	Percentage of Participants with RAV Loss by Unit Category
-----------------	---

End point description:

RAV loss was defined as the cumulative RAV count minus the last RAV count with value of equal to or greater than 0. Percentage of participants with at least X RAV loss = (number of participants with at least X RAV loss divided by the number of participants with cumulative RAV count \geq X) multiplied by 100. Participants in the Virological Analysis Set with total cumulative RAV count \geq 1 and RAV count \geq 0 in at least 1 of the HCV genes and with available data were analyzed. The value 99999 signifies that no participants were evaluable in the specified unit category, for indicated arm.

Adverse events

Adverse events information^[1]

Timeframe for reporting adverse events:

Participants were not provided study drug in this registry study. There were no treatment-emergent adverse events (AEs) or serious adverse events (SAEs).

Adverse event reporting additional description:

Safety Analysis Set included all participants with at least 1 post-enrollment visit who have previously participated in a Gilead-sponsored HCV study, received at least 1 Gilead OAV and failed to achieve SVR, as defined in the original treatment protocol.

Assessment type	Systematic

Reporting groups

Reporting group title	SOF+RBV±PEG
-----------------------	-------------

Reporting group description:

Participants previously received sofosbuvir (SOF) + ribavirin (RBV) with or without pegylated interferon (PEG).

Reporting group title	LDV/SOF±RBV
-----------------------	-------------

Reporting group description:

Participants previously received ledipasvir/sofosbuvir (LDV/SOF) with or without RBV.

Reporting group title	SOF/VEL±RBV
-----------------------	-------------

Reporting group description:

Participants previously received sofosbuvir/velpatasvir (SOF/VEL) with or without RBV.

Reporting group title	SOF/VEL/VOX
-----------------------	-------------

Reporting group description:

Participants previously received sofosbuvir/velpatasvir/voxilaprevir (SOF/VEL/VOX).

Reporting group title	Other
-----------------------	-------

Reporting group description:

Participants previously received other HCV treatment. Other HCV treatment included SOF and products other than those in above arms.

Serious adverse events	SOF+RBV±PEG	LDV/SOF±RBV	SOF/VEL±RBV
Total subjects affected by serious adverse events			
subjects affected / exposed	0 / 254 (0.00%)	0 / 34 (0.00%)	0 / 52 (0.00%)
number of deaths (all causes)	2	1	1
number of deaths resulting from adverse events	0	0	0

Serious adverse events	SOF/VEL/VOX	Other	
Total subjects affected by serious adverse events			
subjects affected / exposed	0 / 22 (0.00%)	0 / 205 (0.00%)	
number of deaths (all causes)	0	1	
number of deaths resulting from adverse events	0	0	

Frequency threshold for reporting non-serious adverse events: 5 %

Non-serious adverse events	SOF+RBV±PEG	LDV/SOF±RBV	SOF/VEL±RBV
Total subjects affected by non-serious adverse events			
subjects affected / exposed	0 / 254 (0.00%)	0 / 34 (0.00%)	0 / 52 (0.00%)

Non-serious adverse events	SOF/VEL/VOX	Other	
Total subjects affected by non-serious adverse events			
subjects affected / exposed	0 / 22 (0.00%)	0 / 205 (0.00%)	

Notes:

[1] - There are no non-serious adverse events recorded for these results. It is expected that there will be at least one non-serious adverse event reported.

Justification: Participants were not provided study drug in this registry study. There were no treatment-emergent adverse events (AEs) or serious adverse events (SAEs).

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
19 June 2012	In this amendment, a quality of life survey was added to all study visits in Study GS-US-248-0123. Also, it was clarified that the detection of a drug resistant mutation (DRM) is no longer an inclusion criterion and the absence of a DRM is no longer a discontinuation criterion.
02 December 2014	The purpose of this amendment was to provide clarification to the protocol text that individual participants may be discontinued at the sponsor's discretion.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
