Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	20 February 2014
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	05 August 2013
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The purpose of this study was to evaluate the efficacy and safety of CNTO 1959 in the treatment of participants with moderate to severe plaque psoriasis.

Protection of trial subjects:

Safety evaluation of this study included physical examinations, detection of injection site and allergic reactions, electrocardiograms (ECGs), clinical laboratory tests, vital signs and concomitant medications. Safety was to be monitored through Week 52 for all participants. Adverse events (AEs) were reported throughout the study period.

Background therapy:

None

Evidence for comparator:

Adalimumab: Participants receiving 80 mg adalimumab at Week 0, 40 mg at Week 1 and every other week to Week 39 as active comparator.

Actual start date of recruitment	25 October 2011
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Belgium: 5
Country: Number of subjects enrolled	Canada: 83
Country: Number of subjects enrolled	Germany: 23
Country: Number of subjects enrolled	Poland: 55
Country: Number of subjects enrolled	United States: 127
Worldwide total number of subjects	293
EEA total number of subjects	83

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23	0

months)	
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	272
From 65 to 84 years	21
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

A total of 394 participants were screened, however 293 participants were randomized to receive treatment.

Period 1

Period 1 title	Controlled period (Week 0 - 16)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	Placebo (CP)

Arm description:

Participants received placebo at Week 0, 4 and 8.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants received placebo at Week 0, 4 and 8.

Arm title	5 mg CNTO1959 (CP)
------------------	--------------------

Arm description:

Participants received CNTO1959 5 milligram (mg) subcutaneously at Weeks 0 and 4.

Arm type	Experimental
Investigational medicinal product name	CNTO 1959
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants received CNTO1959 5 milligram (mg) subcutaneously at Weeks 0 and 4.

Arm title	15 mg CNTO1959 (CP)
------------------	---------------------

Arm description:

Participants received CNTO1959 15 milligram (mg) subcutaneously at Weeks 0 and 8.

Arm type	Experimental
Investigational medicinal product name	CNTO 1959
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants received CNTO1959 15 milligram (mg) subcutaneously at Weeks 0 and 8.

Arm title	50 mg CNTO1959 (CP)
------------------	---------------------

Arm description:

Participants received CNTO1959 50 milligram (mg) subcutaneously at weeks 0 and 4.

Arm type	Experimental
Investigational medicinal product name	CNTO 1959
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants received CNTO1959 50 milligram (mg) subcutaneously at weeks 0 and 4.

Arm title	100 mg CNTO1959 (CP)
------------------	----------------------

Arm description:

Participants received CNTO1959 100 milligram (mg) subcutaneously at weeks 0 and 8.

Arm type	Experimental
Investigational medicinal product name	CNTO 1959
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants received CNTO1959 100 milligram (mg) subcutaneously at weeks 0 and 8.

Arm title	200 mg CNTO1959 (CP)
------------------	----------------------

Arm description:

Participants received CNTO1959 200 milligram (mg) subcutaneously at weeks 0 and 4.

Arm type	Experimental
Investigational medicinal product name	CNTO 1959
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants received CNTO1959 200 milligram (mg) subcutaneously at weeks 0 and 4.

Arm title	Adalimumab (CP)
------------------	-----------------

Arm description:

Adalimumab (Week 0 - 16, Open label): Participants received Adalimumab 80 milligram (mg) as open label at week 0 followed by 40 mg at week 1 and every second week up to week 15. Efficacy for this arm was evaluated by a blinded assessor.

Arm type	Active comparator
Investigational medicinal product name	Adalimumab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants received Adalimumab 80 milligram (mg) at week 0 followed by 40 mg at week 1 and every

Subject analysis set title	Randomised Population
Subject analysis set type	Full analysis

Subject analysis set description:

All randomized subjects were analyzed according to their assigned treatment group regardless of the actual treatment received (ie, adalimumab, placebo, CNTO 1959). For subjects randomized to placebo, only subjects who crossed over to receive CNTO 1959 100 mg q8w at Week 16 were included in the efficacy summaries after Week 16.

Primary: Number of Participants With Cleared or Minimal (0 or 1) Physician's Global Assessment (PGA) Score at Week 16

End point title	Number of Participants With Cleared or Minimal (0 or 1) Physician's Global Assessment (PGA) Score at Week 16
-----------------	--

End point description:

Percentage of participants with cleared or minimal (0 or 1) at Week 16 was reported. The PGA score is a numeric scale which is completed by the physician and was designed to evaluate the physician's overall assessment of the participant's psoriasis. Overall lesions will be graded as: 0=cleared, 1=minimal, 2=mild, 3=moderate, 4=marked, and 5=severe.

[19] - P-value is based on the Cochran-Mantel-Haenszel chi-square test stratified by baseline weight (≤ 90 kg, > 90 kg).

Secondary: Percentage of Participants Achieving the Physician's Global Assessment (PGA) score of cleared (0) or minimal (1) at Week 16 and Week 40

End point title	Percentage of Participants Achieving the Physician's Global Assessment (PGA) score of cleared (0) or minimal (1) at Week 16 and Week 40 ^[20]
-----------------	---

End point description:

Difference and the 95% confidence intervals in the percentage of participants achieving a PGA score of cleared (0) or minimal (1) at Week 16 and Week 40 between each of the CNTO 1959 treatment groups and the adalimumab treatment group was calculated. The PGA score is a numeric scale which was completed by the physician and was designed to evaluate the physician's overall assessment of the participant's psoriasis. Overall lesions was graded as: 0=cleared, 1=minimal, 2=mild, 3=moderate, 4=marked, and 5=severe. The proportion of subjects achieving a PGA score of cleared (0) or minimal (1) was lower in the CNTO 1959 5 mg q12w group as compared with the adalimumab group, however the 95% CI includes 0. Here 'n' signifies the number of participants evaluated at this time point.

End point type	Secondary
End point timeframe:	
Weeks 16 and 40	
Notes:	
[20] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.	
Justification: Subjects randomized in placebo group were not evaluated for this endpoint.

Secondary: Change from baseline in Dermatology Life Quality Index (DLQI) at Week 16

End point title	Change from baseline in Dermatology Life Quality Index (DLQI) at Week 16
End point description:	
The DLQI is a self-administered 10-item questionnaire that is used to assess 6 different aspects of quality of life: symptoms and feelings, daily activities, leisure, work or school performance, personal relationships, and treatment. Scores range from 0 (no impairment in quality of life) to 30 (most impairment in quality of life).

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
28 September 2011	The first amendment was implemented before the study was initiated, and included the following changes: addition of an exclusion criterion regarding the use of anti-TNF α agents, clarification of the reference time point for receiving treatments targeted to IL -12, IL 17A, or IL 23 in inclusion/exclusion criteria, updating of exclusion criterion regarding time frame for receiving live vaccines, removal of interactive voice response system (IVRS) as a method of collecting unblinding information, clarification of the time frame for the observation for severe allergic reactions, and other minor editorial changes.
27 February 2012	The second amendment included the following changes: an inclusion criterion was updated to allow entry of participants willing to receive adalimumab injections by a care provider at home, the exclusion criterion requiring participants not to have a known history of human immunodeficiency virus (HIV) was updated to require documentation of a negative HIV test prior to enrollment. In addition, text was added to clarify the exact duration of sample storage, the Sponsor's name was changed from Centocor to Janssen Research & Development, and other minor editorial changes.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
