Results analysis stage

Analysis stage	Final
Date of interim/final analysis	23 January 2015
Is this the analysis of the primary completion data?	Yes
Primary completion date	23 January 2015
Global end of trial reached?	Yes
Global end of trial date	23 January 2015
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The primary objective of this study was to evaluate the safety and tolerability of intratracheal administration of two different single doses of CHF 5633 in preterm neonates with respiratory distress syndrome (RDS) in terms of adverse events (AEs), adverse drug reactions (ADRs), haematology and blood chemistry values, and incidence of major neonatal morbidities and mortality.

Protection of trial subjects:

The study was conducted in accordance with the Declaration of Helsinki, Good Clinical Practice (GCP) guidelines and local law requirements. Other than routine care, no specific measures for protection of trial subjects were implemented.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	03 October 2012
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	United Kingdom: 21
Country: Number of subjects enrolled	Czech Republic: 11
Country: Number of subjects enrolled	Germany: 8
Worldwide total number of subjects	40
EEA total number of subjects	40

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37	40

wk	
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	0
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

In both study cohorts, neonates were recruited/enrolled in a stepwise fashion, based on a safety evaluation following the administration of CHF 5633. If no major safety concerns were raised for each member of the first 4-neonate group and for the group overall, recruitment proceeded to the next 4-neonate group until 20 neonates were enrolled.

Pre-assignment

Screening details:

Seventy-five neonates were screened for the FIH study; 35 failed the screening, based on inclusion/exclusion criteria (n=33), investigator decision (n=1) or consent withdrawal (n=1)

Period 1

Period 1 title	Overall trial (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Blinding implementation details:

Not applicable; this was an open-label study.

Arms

Are arms mutually exclusive?	Yes
Arm title	Cohort A

Arm description:

Neonates in cohort A received a single dose of CHF 5633 (100 mg/kg birth weight) administered intratracheally within 48 hours from birth.

Arm type	Experimental
Investigational medicinal product name	CHF 5633
Investigational medicinal product code	
Other name	SP B analogue (CHF 5736.03) + SP-C analogue (CHF 4902.03) + dipalmitoylphosphatidylcholine + 1-palmitoyl-2-oleoyl-sn-glycero-3-phosphoglycerol sodium salt
Pharmaceutical forms	Endotracheopulmonary instillation, suspension
Routes of administration	Intratracheal use

Dosage and administration details:

CHF 5633 (100 mg/kg birth weight) as a single intratracheal dose within 48 hours from birth.

Arm title	Cohort B
------------------	----------

Arm description:

After completion of treatment in Cohort A neonates in cohort B received a single dose of CHF 5633 (200 mg/kg birth weight) administered intratracheally within 48 hours from birth.

Arm type	Experimental
Investigational medicinal product name	CHF 5633
Investigational medicinal product code	
Other name	SP B analogue (CHF 5736.03) + SP-C analogue (CHF 4902.03) + dipalmitoylphosphatidylcholine + 1-palmitoyl-2-oleoyl-sn-glycero-3-phosphoglycerol sodium salt
Pharmaceutical forms	Endotracheopulmonary instillation, suspension
Routes of administration	Intratracheal use

Dosage and administration details:

CHF 5633 (200 mg/kg birth weight) as a single intratracheal dose within 48 hours from birth.

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Adverse events were monitored on a continual basis for the first 7 days following treatment. Adverse events that were ongoing at Day 7, together with any new AEs were evaluated at Days 10 and 28, at discharge home, and the Week 36 PMA.

Necrotising colitis subjects affected / exposed occurrences (all)	1 / 20 (5.00%) 1	0 / 20 (0.00%) 0	

Hepatobiliary disorders Hyperbilirubinaemia subjects affected / exposed occurrences (all)	3 / 20 (15.00%) 3	10 / 20 (50.00%) 10	
Skin and subcutaneous tissue disorders Dermatitis subjects affected / exposed occurrences (all)	0 / 20 (0.00%) 0	1 / 20 (5.00%) 1	
Musculoskeletal and connective tissue disorders Osteopenia subjects affected / exposed occurrences (all)	1 / 20 (5.00%) 1	0 / 20 (0.00%) 0	
Infections and infestations Bacterial infection subjects affected / exposed occurrences (all)	1 / 20 (5.00%) 1	1 / 20 (5.00%) 1	
Bacterial sepsis subjects affected / exposed occurrences (all)	1 / 20 (5.00%) 2	0 / 20 (0.00%) 0	
Enterococcal sepsis subjects affected / exposed occurrences (all)	1 / 20 (5.00%) 1	0 / 20 (0.00%) 0	
Eye infection bacterial subjects affected / exposed occurrences (all)	0 / 20 (0.00%) 0	1 / 20 (5.00%) 2	
Eye infection staphylococcal subjects affected / exposed occurrences (all)	1 / 20 (5.00%) 1	0 / 20 (0.00%) 0	
Lower respiratory tract infection subjects affected / exposed occurrences (all)	1 / 20 (5.00%) 1	0 / 20 (0.00%) 0	
Oral candidiasis subjects affected / exposed occurrences (all)	0 / 20 (0.00%) 0	1 / 20 (5.00%) 1	
Sepsis			

subjects affected / exposed	1 / 20 (5.00%)	2 / 20 (10.00%)	
occurrences (all)	1	2	
Staphylococcal infection			
subjects affected / exposed	1 / 20 (5.00%)	0 / 20 (0.00%)	
occurrences (all)	1	0	
Metabolism and nutrition disorders			
Hyperglycaemia			
subjects affected / exposed	2 / 20 (10.00%)	0 / 20 (0.00%)	
occurrences (all)	2	0	
Hypernatraemia			
subjects affected / exposed	1 / 20 (5.00%)	0 / 20 (0.00%)	
occurrences (all)	1	0	
Hypoglycaemia			
subjects affected / exposed	1 / 20 (5.00%)	0 / 20 (0.00%)	
occurrences (all)	3	0	
Hypokalaemia			
subjects affected / exposed	3 / 20 (15.00%)	0 / 20 (0.00%)	
occurrences (all)	3	0	
Hyponatraemia			
subjects affected / exposed	8 / 20 (40.00%)	3 / 20 (15.00%)	
occurrences (all)	9	3	

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
02 April 2012	<ul style="list-style-type: none">• Added central laboratory in charge of immunogenicity• Added role of clinical pharmacologist• Provided details and purpose of 24-month assessments• Clarified "original value" for blood chemistry results• Updated planned study start and end• Clarified the characteristics and role of the independent member of the Safety Monitoring Board• Clarified the stopping rules of the study and the processes for managing risk and escalating the dose• Added dedicated section for immunogenicity assessment• Added the Contract Research Organization safety contact• Clarified the serious adverse event reporting procedure• Added Safety Monitoring Board charter as protocol appendix
01 July 2013	<ul style="list-style-type: none">• Increased number of sites from 6 to 12 to speed up enrolment• Extended period for IMP administration from within 24 hours to within 48 hours from birth to allow Investigators more time to speak with parents and explain procedures better.• Extended in agreement with the Central Laboratory the window to take the blood sample for immunogenicity assessments in serum from 4 to 12 weeks to 3 to 12 weeks to allow a more flexible interval to the Investigators.• Included the possibility that neonates might have been transferred to a continuing care site and added instructions for continued safety monitoring when this occurred• Allowed the use of a less invasive surfactant administration technique with rapid extubation (InSurE)• Redefined the end of the trial as the date of discharge home to take the continuing care sites into account• Extended the recruitment period

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

No limitations or caveats are applicable to this summary of the results.
