

## Clinical trial results:

### Towards Onset Prevention of COGNitive decline in adults with Down syndrome (the TOP-COG study)

#### Summary

EudraCT number	2011-001564-21
Trial protocol	GB
Global end of trial date	14 September 2014

#### Results information

Result version number	v1 (current)
This version publication date	18 December 2019
First version publication date	18 December 2019
Summary attachment (see zip file)	2011-001564-21 summary (2011-001564-21 summary.pdf)

#### Trial information

##### Trial identification

Sponsor protocol code	GN09CP301
-----------------------	-----------

##### Additional study identifiers

ISRCTN number	ISRCTN67338640
ClinicalTrials.gov id (NCT number)	-
WHO universal trial number (UTN)	-
Other trial identifiers	NRS reference: NRS11/CG06, IRAS project code: 77898, Portfolio ID: 11619, MREC reference: 11/AL/0200, Sponsor reference: GN09CP301

Notes:

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric	No
---------------------------------------	----

investigation plan (PIP)	
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Notes:	

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	18 December 2014
Is this the analysis of the primary completion data?	Yes
Primary completion date	31 August 2014
Global end of trial reached?	Yes
Global end of trial date	14 September 2014
Was the trial ended prematurely?	No
Notes:	

## General information about the trial

Main objective of the trial:

The aims of the study are to gather the data needed to design a full-scale multi-centred RCT of oral simvastatin 40mg a day.

The principal research questions are:

What are the:

- (1) trial recruitment/retention rates and recruitment sources,
- (2) rates of tolerability/safety of oral simvastatin 40mg a day,
- (3) most sensitive instruments to detect early cognitive decline in adults with Down syndrome, and
- (4) perceptions of adults with Down syndrome and their carers on deciding whether to participate, on randomisation, and their experience of the assessments?

Protection of trial subjects:

Participants were fully informed of the time required to participate before making a decision. The primary study researcher was experienced in working with adults with intellectual disabilities. Interviews were conducted in participants' homes where requested. Capillary blood tests and saliva collection were offered in place of venous blood sampling. Participants underwent baseline measurements followed by a comprehensive check at 6-12 weeks after starting treatment to identify any initial adverse events.

Background therapy:

Not applicable

Evidence for comparator: -

Actual start date of recruitment	27 February 2012
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	United Kingdom: 21
--------------------------------------	--------------------

Worldwide total number of subjects	21
EEA total number of subjects	21

Notes:

---

**Subjects enrolled per age group**

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	21
From 65 to 84 years	0
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

The setting was the general community of Scotland, UK; specifically, the health board areas of Greater Glasgow and Clyde, Lothian, Tayside, Lanarkshire and Borders. Recruitment was from multiple sources within the general community, Down Syndrome Scotland, Local Authorities and National Health Service clinical services.

### Pre-assignment

Screening details:

Inclusion: Down syndrome; aged  $\geq 50$  yrs/Exclusion: no consent; unable to comply with protocol, including tissue samples; dementia; diabetes; clinically evident atherosclerotic disease; at risk of cardiovascular disease; liver disease; chronic renal insufficiency; statin therapy; previous statin SAE; unable to avoid grapefruit juice; excess alcohol

### Period 1

Period 1 title	Baseline
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Placebo

Arm description:

One capsule of placebo at night for 12 months

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

One oral placebo capsule at night by mouth

<b>Arm title</b>	Simvastatin
------------------	-------------

Arm description:

Simvastatin 40mg at night by oral administration

Arm type	Experimental
Investigational medicinal product name	Simvastatin
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

Simvastatin 40mg at night by oral administration.  
Swallowed whole, not chewed.

Number of subjects in period 1	Placebo	Simvastatin
Started	11	10
Completed	11	10

## Period 2

Period 2 title	12 month follow-up
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Investigator, Carer, Subject

Blinding implementation details:

Randomisation conducted by the Robertson Centre for Biostatistics and information communicated directly with the Pharmacy Production Unit. On receipt of a prescription, the study drugs were posted directly to participants.

The active drug and placebo were over-encapsulated, identical in appearance and similar in weight

## Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Placebo

Arm description:

One capsule of placebo at night for 12 months

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

One oral placebo capsule at night by mouth

<b>Arm title</b>	Simvastatin
------------------	-------------

Arm description:

Simvastatin 40mg at night by oral administration

Arm type	Experimental
Investigational medicinal product name	Simvastatin
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

Simvastatin 40mg at night by oral administration.  
Swallowed whole, not chewed.

<b>Number of subjects in period 2</b>	Placebo	Simvastatin
Started	11	10
Completed	5	3
Not completed	6	7
Carer concerned about drug	-	3
Consent withdrawn by subject	1	1
Adverse event, non-fatal	2	-
Lost to follow-up	2	3
Protocol deviation	1	-

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

12 month treatment period

Assessment type	Systematic
-----------------	------------

### Dictionary used

Dictionary name	MedDRA
-----------------	--------

Dictionary version	15.1
--------------------	------

### Reporting groups

Reporting group title	Placebo
-----------------------	---------

Reporting group description:

One capsule of placebo at night for 12 months

Reporting group title	Simvastatin
-----------------------	-------------

Reporting group description:

Simvastatin 40mg at night by oral administration

Serious adverse events	Placebo	Simvastatin	
Total subjects affected by serious adverse events			
subjects affected / exposed	0 / 11 (0.00%)	0 / 10 (0.00%)	
number of deaths (all causes)	0	0	
number of deaths resulting from adverse events			

Frequency threshold for reporting non-serious adverse events: 0 %

Non-serious adverse events	Placebo	Simvastatin	
Total subjects affected by non-serious adverse events			
subjects affected / exposed	1 / 11 (9.09%)	3 / 10 (30.00%)	
Injury, poisoning and procedural complications			
Leg injury			
subjects affected / exposed	0 / 11 (0.00%)	1 / 10 (10.00%)	
occurrences (all)	1	1	
Gastrointestinal disorders			
Episodic diarrhoea			
subjects affected / exposed	0 / 11 (0.00%)	1 / 10 (10.00%)	
occurrences (all)	1	1	
Skin and subcutaneous tissue disorders			

Rash			
subjects affected / exposed	0 / 11 (0.00%)	1 / 10 (10.00%)	
occurrences (all)	1	1	
Endocrine disorders			
Thyroid dysfunction			
subjects affected / exposed	1 / 11 (9.09%)	0 / 10 (0.00%)	
occurrences (all)	1	1	

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
26 September 2011	Protocol amendment, addressing points raised by the MHRA during its review. Within NHS GG&C, the amended protocol (version 3) was approved as part of Health Board management approval.
05 April 2012	Protocol version 4 Replacement of outcome measure instrument - 'Cats and Dogs test' in place of 'Delayed Matching to Sample test' No baseline interviews conducted yet so no participant recall required.
16 May 2012	Protocol v5 - Revised medication supply process - Revised unblinding process - Clarification of data sharing, to facilitate drug supply - Additional exclusion criterion
03 December 2013	Protocol version 7 Revised exclusion criteria and expected Adverse Reactions, following a change to the Summary of Product Characteristics and subsequently updated Reference Safety Information.
21 January 2014	Protocol version 8 Inclusion of sub-study assessing cognitive performance tools, for patients otherwise ineligible for the full study. No drug therapy involved.

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

Recruitment was challenging. However, valuable feasibility data was obtained, allowing the possibility of designing a full-scale Randomised Controlled Trial, with a realistic recruitment strategy & seeking an appropriate level of funding to implement
