

3. Secondary Endpoint: Second Line PFS_ITT Population

Second line progression free survival (PFS) was defined as the progression free survival interval during second line treatment.

Table 3.1: Statistical Analysis - Second Line PFS

ITT Population n = 120	Test		
	Statistic	p-Value	Comment
Second Line PFS	0.536	0.464	Mantel-Haenszel-Log-Rank-Test
