

6. Secondary Endpoint: Duration of response_ITT Population

Duration of overall response was measured from the time that measurement criteria were met for complete response (CR) or partial response (PR) (whichever status was recorded first) until the onset of progression.

Table 6.1: Statistical Analysis - Duration of Response

ITT Population n = 120	Test		
	Statistic	p-Value	Comment
Duration of Response	0.184	0.668	Mantel-Haenszel-Log-Rank-Test

Figure 6.1: Duration of Response
