

5. Secondary Endpoint: Time to response_ITT Population

Time to overall response was measured from the time of randomization until the day of documented complete response (CR) or partial response (PR) (whichever status was recorded first).

Table 5.1: Statistical Analysis - Time to Response

ITT Population n = 120	Test		
	Statistic	p-Value	Comment
Time to Response	0.121	0.728	Mantel-Haenszel-Log-Rank-Test
