

Clinical trial results:

An open label, multi-center trial of eculizumab in patients with Shiga-toxin producing Escherichia Coli Hemolytic-Uremic Syndrome (STEC-HUS)

Summary

EudraCT number	2011-002691-17
Trial protocol	DE
Global end of trial date	20 April 2012

Results information

Result version number	v1 (current)
This version publication date	24 July 2016
First version publication date	24 July 2016

Trial information

Trial identification

Sponsor protocol code	C11-001

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	Yes
EMA paediatric investigation plan number(s)	EMA-000876-PIP02-11
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	21 May 2014
Is this the analysis of the primary completion data?	Yes
Primary completion date	20 April 2012
Global end of trial reached?	Yes
Global end of trial date	20 April 2012
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

Safety and efficacy of eculizumab treatment in patients with STEC-HUS

Protection of trial subjects:

Vaccination against N. meningitidis at least 14 days prior to study drug initiation or prophylactic antibiotics protection

Background therapy: -

Evidence for comparator:

None

Actual start date of recruitment	22 July 2011
Long term follow-up planned	Yes
Long term follow-up rationale	Safety, Efficacy
Long term follow-up duration	2 Months
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Germany: 198
Worldwide total number of subjects	198
EEA total number of subjects	198

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	2
Adolescents (12-17 years)	7
Adults (18-64 years)	163
From 65 to 84 years	25
85 years and over	1

Subject disposition

Recruitment

Recruitment details:

196 patients were retrospectively enrolled after signing ICF. All received commercially available eculizumab prior to enrollment and at least 1 dose of eculizumab as investigational product following study entry. Two patients were enrolled prospectively. This represents the IIT/safety population.

Pre-assignment

Screening details:

At screening, the following to be collected: medical history, demographics, historical data review, administration/confirmation of N. meningitis vaccination and prophylactic antibiotics; neurology assessments, clinical laboratories, safety, seizure assessment, disease-specific information.

Pre-assignment period milestones

Number of subjects started	198
Number of subjects completed	198

Period 1

Period 1 title	Treatment Period (28 weeks) (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Arm title	eculizumab
-----------	------------

Arm description:

A total of 196 patients were retrospectively enrolled after signing ICF. All received commercially available eculizumab prior to enrollment and at least 1 dose of eculizumab as investigational product following study entry. Two patients were enrolled prospectively. This represents the IIT/safety population.

Fixed dosing of eculizumab based on body weight cohorts were administered. Adjustment of dose to accommodate patient growth was possible.

Arm type	Experimental
Investigational medicinal product name	eculizumab
Investigational medicinal product code	eculizumab
Other name	Soliris
Pharmaceutical forms	Concentrate for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Ecuzumab was to be administered intravenously (IV) according to the regimens described below:

- If weight ≥ 40 kg: Induction: 900 mg weekly x 4; Maintenance: 1200 mg Wk5; then 1200 mg every 2 weeks
- If weight 30 - < 40 kg: Induction: 600 mg weekly x 2; Maintenance: 900 mg Wk3; then 900 mg every 2 weeks
- If weight 20 - < 30 kg: Induction: 600 mg weekly x 2 ; Maintenance: 600 mg Wk3; then 600 mg every 2 weeks
- If weight 10 - < 20 kg: Induction: 600 mg weekly x 1; Maintenance: 300 mg Wk2; then 300 mg every 2 weeks
- If weight 5 - < 10 kg: Induction: 300 mg weekly x 1; Maintenance: 300 mg Wk2; then 300 mg every 3 weeks

Induction: 300 mg weekly x 1

Maintenance: 300 mg Wk2; then 300 mg every 2 weeks

Number of subjects in period 1	eculizumab
Started	198
Completed	184
Not completed	14
Patient condition improvement	2
Adverse Event	2
Lost to follow-up	7
Patient/parent decision	3

Baseline characteristics

Reporting groups

Reporting group title	eculizumab
-----------------------	------------

Reporting group description:

A total of 196 patients were retrospectively enrolled after signing ICF. All received commercially available eculizumab prior to enrollment and at least 1 dose of eculizumab as investigational product following study entry. Two patients were enrolled prospectively. This represents the IIT/safety population.

Fixed dosing of eculizumab based on body weight cohorts were administered. Adjustment of dose to accommodate patient growth was possible.

Reporting group values	eculizumab	Total	
Number of subjects	198	198	
Age categorical			
Units: Subjects			
Pediatric patients (< 18)	9	9	
Adults (18 ≤ 45)	112	112	
Adults (45 ≤ 65)	51	51	
≥ 65	26	26	
Age continuous			
Units: years			
arithmetic mean	42.1		
standard deviation	± 17.06	-

No	17	17	
Ever on PE/PI			
Units: Subjects			
Yes	186	186	
No	12	12	
Ventilator use at Baseline			
Units: Subjects			
Yes	47	47	
No	151	151	
Baseline Seizure Status			
Seizure status is presented in patients with brain involvement at baseline.			
Reporting group (IIT/Safety population): Data available for 166 subjects			
Units: Subjects			
Yes	43	43	
No	123	123	
Not brain involvement	32	32	

Therapeutic Coma at Baseline			
Reporting group (IIT/Safety population): Data available for 166 subjects.			
Units: Subjects			
Yes	35	35	
No	131	131	
Not brain involvement	32	32	
Hospitalization at Baseline			
Units: Subjects			
Yes	197	197	
No	1	1	
WBC category			
Units: Subjects			
> 20 x 10 ⁹ /L	33	33	
≤ 20 x 10 ⁹ /L	165	165	
Kidney involvement at Baseline			
Units: Subjects			
Kidney involvement	190	190	
No kidney involvement	8	8	
Brain involvement at Baseline			
Units: Subjects			
Brain involvement	166	166	
No brain involvement	32	32	
Thrombosis at Baseline			
Units: Subjects			
Thrombosis	0	0	
No thrombosis	198	198	
Brain and kidney involvement at Baseline			
Units: Subjects			
Brain and kidney involvement	158	158	
No brain and kidney involvement	40	40	
No organ involvement at Baseline			
Units: Subjects			
No organ involvement	0	0	
Any organ involvement	198	198	
Dialysis prior to treatment			
Units: Number of days			
arithmetic mean	5		
standard deviation	± 11.27	-	
PE/PI prior to treatment			
Units: Number of Days			
arithmetic mean	4.3		
standard deviation	± 2.3	-	
Duration from Onset of PE/PI to initiation of eculizumab at baseline			
Units: days			
arithmetic mean	6.7		
standard deviation	± 9.06	-	
Duration from onset of diarrhea to onset of PE/PI at baseline			
Units: days			
arithmetic mean	7		

standard deviation	± 2.54	-	
Duration from onset of diarrhea to initiation of eculizumab at baseline Units: days arithmetic mean standard deviation	12.7 ± 9.36	-	
Modified Rankin Score at Baseline Units: Modified Rankin Score arithmetic mean standard deviation	3.7 ± 1.18	-	
Baseline Creatinine Units: micromole(s)/litre arithmetic mean standard deviation	217.3 ± 102.57	-	
Baseline eGFR			
eGFR are presented for patients with kidney involvement who were not on dialysis at baseline.			
Units: mL/min/1.73m ² arithmetic mean standard deviation	34 ± 16.29	-	
Baseline haemoglobin Units: gram(s)/litre arithmetic mean standard deviation	84.5 ± 15.94	-	
Baseline Lactate Dehydrogenase Units: U/L arithmetic mean standard deviation	844.4 ± 459.84	-	
Baseline Platelets Units: 10 ⁹ /L arithmetic mean standard deviation	78.2 ± 65.33	-	
Baseline White Blood Cells Units: 10 ⁹ /L arithmetic mean standard deviation	14 ± 6.86	-	

End points

Primary: Improvement in systemic TMA and vital organ at Wk 8

End point title	Improvement in systemic TMA and vital organ at Wk 8 ^[1]
End point description:	
It consists of complete and partial responders, as defined below:	
<ul style="list-style-type: none">- Complete Responder: (i) Hematologic Normalization (platelet count $\geq 150 \times 10^9/L$ at any 2 consecutive measures); (ii) Clinically important improvement in all of the affected major vital organs: brain, kidney, thrombosis when abnormal at baseline and with baseline abnormality plausibly related to EHEC event; and (iii) no clinically important worsening in Brain, Kidney, Thrombosis.- Partial Responder: (i) Hematologic Improvement ($>25\%$ increase in platelet count at any 2 consecutive measures) or Hematologic Normalization; (ii) Clinically important improvement in none, one, or more affected major organs: brain, kidney and thrombosis when abnormal at baseline and when baseline abnormality plausibly related to the STEC event; and (iii) no clinically important worsening in Brain, Kidney, Thrombosis.	
End point type	Primary
End point timeframe:	
Through Week 8	
Notes:	
[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.	
Justification: The system does not support statistical analyses for a single arm trial.	

End point values	eculizumab			
Subject group type	Reporting group			
Number of subjects analysed	198			
Units: Percentage of patients				
number (confidence interval 95%)				
Complete response	80.3 (74.1 to 85.6)			
Partial response	94.4 (90.3 to 97.2)			

Statistical analyses

No statistical analyses for this end point

Primary: Improvement in systemic TMA and vital organ at Wk 28

End point title	Improvement in systemic TMA and vital organ at Wk 28 ^[2]
End point description: Evidence for sustained response to eculizumab continuing after the end of the dosing period was evaluated by the global assessment of efficacy defined as response rate (CR+PR) at Week 28.	
End point type	Primary
End point timeframe: 28 weeks	

Notes:

[2] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: The system does not support statistical analyses for a single arm trial.

Week 28	98.9 (96.1 to 99.9)			

Statistical analyses

No statistical analyses for this end point

Secondary: Global Assessment of Renal Function : Clinically Important Worsening

End point title	Global Assessment of Renal Function : Clinically Important Worsening
-----------------	--

End point description:

Clinically important worsening is assessed in all patients.

In the ITT population, 137 patients could not be assessed for clinically important worsening in renal function as they were on dialysis at baseline.

End point type	Secondary
----------------	-----------

End point timeframe:

At week 8, week 16 and week 28

End point values	eculizumab			
Subject group type	Reporting group			
Number of subjects analysed	61			
Units: Percentage of patients				
number (confidence interval 95%)				
Week 8	4.9 (1 to 13.7)			
Week 16	4.9 (1 to 13.7)			
Week 28	4.9 (1 to 13.7)			

Statistical analyses

No statistical analyses for this end point

Secondary: TMA event-free statut for > 6 weeks

End point title	TMA event-free statut for > 6 weeks
-----------------	-------------------------------------

End point description:

TMA event-free status for >6 weeks: defined as no plasma therapy, no $\geq 25\%$ decrease in platelet count, and no new dialysis.

The cumulative incidence was estimated using the cumulative distribution function (CDF).

End point type	Secondary
----------------	-----------

End point timeframe:

Up to Week 28

End point values	eculizumab			
Subject group type	Reporting group			
Number of subjects analysed	198			
Units: Percentage of patients				
number (not applicable)				
No TMA	99.5			
Censored	0.5			

Statistical analyses

No statistical analyses for this end point

Secondary: TMA intervention rate

End point title	TMA intervention rate
-----------------	-----------------------

End point description:

TMA intervention rate defined as the number of PE/PI interventions plus the number of dialysis events per patient per day. The TMA intervention rate was calculated pretreatment and post-treatment. Pre-treatment is from the onset of diarrhea to just prior to the first dose of eculizumab (day -1). Post-treatment is from the first dose of eculizumab (Day 0) to the end of study follow up (or discontinuation day for discontinued patients). P-value is calculated using a two-sided Wilcoxon signed rank test.

End point type	Secondary
----------------	-----------

End point timeframe:

Up to 28 weeks

End point values	eculizumab			
Subject group type	Reporting group			
Number of subjects analysed	198			
Units: Percentage of patients				
arithmetic mean (standard deviation)				
Pretreatment TMA intervention rate	0.5192 (\pm 0.2906)			
Post-treatment TMA intervention rate	0.0549 (\pm 0.0784)			

Statistical analyses

No statistical analyses for this end point

Other pre-specified: Improvement in systemic TMA and vital organ at Wk 8 for Patients Dosed Beyond 8 Weeks

End point title	Improvement in systemic TMA and vital organ at Wk 8 for Patients Dosed Beyond 8 Weeks
-----------------	---

End point description:

Global assessment of efficacy (CR + PR) at Week 8 for patients who were dosed beyond Week 8
This analysis is a sub-group analysis (Intent-to-Treat Population)

End point type	Other pre-specified
----------------	---------------------

End point timeframe:

8 weeks

End point values	eculizumab			
Subject group type	Reporting group			
Number of subjects analysed	27			
Units: Percentage of patients				
number (confidence interval 95%)				
Complete response	74.1 (53.7 to 88.9)			
Partial response	85.2 (66.3 to 95.8)			

Statistical analyses

No statistical analyses for this end point

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Through end of study

Adverse event reporting additional description:

All AEs that occurred after the patient had given consent must have been reported and followed to satisfactory resolution or until the Principal Investigator deems the event to be chronic or the patient to be stable.

In the non SAE section below, non SAE and SAE are reported.

deaths causally related to treatment / all	0 / 0		
Metabolism and nutrition disorders			
Hyperkalaemia			
subjects affected / exposed	1 / 198 (0.51%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Type 1 diabetes mellitus			
subjects affected / exposed	1 / 198 (0.51%)		
occurrences causally related to treatment / all	1 / 1		
deaths causally related to treatment / all	0 / 0		

Frequency threshold for reporting non-serious adverse events: 5 %

Non-serious adverse events	eculizumab		
Total subjects affected by non-serious adverse events			
subjects affected / exposed	196 / 198 (98.99%)		
Vascular disorders			
Hypertension			
subjects affected / exposed	74 / 198 (37.37%)		
occurrences (all)	81		

Hypotension subjects affected / exposed occurrences (all)	12 / 198 (6.06%) 12		
General disorders and administration site conditions			
Asthenia subjects affected / exposed occurrences (all)	12 / 198 (6.06%) 12		
Chest pain subjects affected / exposed occurrences (all)	10 / 198 (5.05%) 10		
Fatigue subjects affected / exposed occurrences (all)	30 / 198 (15.15%) 32		
Oedema subjects affected / exposed occurrences (all)	29 / 198 (14.65%) 30		
Oedema peripheral subjects affected / exposed occurrences (all)	64 / 198 (32.32%) 80		
Pyrexia subjects affected / exposed occurrences (all)	25 / 198 (12.63%) 28		
Respiratory, thoracic and mediastinal disorders			
Cough subjects affected / exposed occurrences (all)	19 / 198 (9.60%) 21		
Dyspnoea subjects affected / exposed occurrences (all)	32 / 198 (16.16%) 34		
Pleural effusion subjects affected / exposed occurrences (all)	48 / 198 (24.24%) 51		
Alopecia subjects affected / exposed occurrences (all)	69 / 198 (34.85%) 69		
Psychiatric disorders			

Agitation			
subjects affected / exposed	19 / 198 (9.60%)		
occurrences (all)	19		
Anxiety			
subjects affected / exposed	11 / 198 (5.56%)		
occurrences (all)	12		
Depression			
subjects affected / exposed	11 / 198 (5.56%)		
occurrences (all)	11		
Disorientation			
subjects affected / exposed	15 / 198 (7.58%)		
occurrences (all)	16		
Restlessness			
subjects affected / exposed	12 / 198 (6.06%)		
occurrences (all)	12		
Sleep disorder			
subjects affected / exposed	17 / 198 (8.59%)		
occurrences (all)	18		
Investigations			
Alanine aminotransferase increased			
subjects affected / exposed	11 / 198 (5.56%)		
occurrences (all)	11		
Gamma-glutamyltransferase increased			
subjects affected / exposed	12 / 198 (6.06%)		
occurrences (all)	12		
Cardiac disorders			
Tachycardia			
subjects affected / exposed	13 / 198 (6.57%)		
occurrences (all)	13		
Nervous system disorders			
Aphasia			
subjects affected / exposed	21 / 198 (10.61%)		
occurrences (all)	24		
Convulsion			
subjects affected / exposed	28 / 198 (14.14%)		
occurrences (all)	35		

Disturbance in attention subjects affected / exposed occurrences (all)	11 / 198 (5.56%) 12		
Dizziness subjects affected / exposed occurrences (all)	18 / 198 (9.09%) 20		
Headache subjects affected / exposed occurrences (all)	95 / 198 (47.98%) 102		
Myoclonus subjects affected / exposed occurrences (all)	11 / 198 (5.56%) 11		
Paraesthesia subjects affected / exposed occurrences (all)	10 / 198 (5.05%) 10		
Tremor subjects affected / exposed occurrences (all)	28 / 198 (14.14%) 29		
Insomnia subjects affected / exposed occurrences (all)	20 / 198 (10.10%) 21		
Blood and lymphatic system disorders Anaemia subjects affected / exposed occurrences (all)	13 / 198 (6.57%) 13		
Leukopenia subjects affected / exposed occurrences (all)	13 / 198 (6.57%) 13		
Ear and labyrinth disorders Vertigo subjects affected / exposed occurrences (all)	22 / 198 (11.11%) 24		
Eye disorders Diplopia subjects affected / exposed occurrences (all)	10 / 198 (5.05%) 10		
Vision blurred			

subjects affected / exposed	12 / 198 (6.06%)		
occurrences (all)	12		
Visual impairment			
subjects affected / exposed	10 / 198 (5.05%)		
occurrences (all)	10		
Gastrointestinal disorders			
Abdominal pain			
subjects affected / exposed	26 / 198 (13.13%)		
occurrences (all)	27		
Abdominal pain upper			
subjects affected / exposed	14 / 198 (7.07%)		
occurrences (all)	14		
Ascites			
subjects affected / exposed	15 / 198 (7.58%)		
occurrences (all)	15		
Constipation			
subjects affected / exposed	20 / 198 (10.10%)		
occurrences (all)	20		
Diarrhoea			
subjects affected / exposed	21 / 198 (10.61%)		
occurrences (all)	23		
Flatulence			
subjects affected / exposed	13 / 198 (6.57%)		
occurrences (all)	13		
Nausea			
subjects affected / exposed	61 / 198 (30.81%)		
occurrences (all)	66		
Vomiting			
subjects affected / exposed	44 / 198 (22.22%)		
occurrences (all)	46		
Skin and subcutaneous tissue disorders			
Pruritus			
subjects affected / exposed	10 / 198 (5.05%)		
occurrences (all)	10		
Renal and urinary disorders			

Nocturia subjects affected / exposed occurrences (all)	17 / 198 (8.59%) 17		
Musculoskeletal and connective tissue disorders			
Arthralgia subjects affected / exposed occurrences (all)	22 / 198 (11.11%) 26		
Back pain subjects affected / exposed occurrences (all)	21 / 198 (10.61%) 22		
Myalgia subjects affected / exposed occurrences (all)	14 / 198 (7.07%) 19		
Pain in extremity subjects affected / exposed occurrences (all)	10 / 198 (5.05%) 10		
Infections and infestations			
Nasopharyngitis subjects affected / exposed occurrences (all)	31 / 198 (15.66%) 33		
Pneumonia subjects affected / exposed occurrences (all)	19 / 198 (9.60%) 21		
Urinary tract infection subjects affected / exposed occurrences (all)	22 / 198 (11.11%) 23		
Metabolism and nutrition disorders			
Hypokalaemia subjects affected / exposed occurrences (all)	11 / 198 (5.56%) 11		

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? No

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
