

Clinical trial results:

A Phase III, Multicentre, Randomised, Double-Blind, Comparative Study to Evaluate the Efficacy and Safety of Ceftaroline Fosamil (600 mg every 8 hours) Versus Vancomycin Plus Aztreonam in the Treatment of Patients With Complicated Bacterial Skin and Soft Tissue Infections With Evidence of Systemic Inflammatory Response or Underlying Comorbidities

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	05 March 2015
Is this the analysis of the primary completion data?	Yes
Primary completion date	26 June 2014
Global end of trial reached?	Yes
Global end of trial date	30 April 2015
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The primary objective of the study was to assess whether ceftaroline fosamil was non inferior to vancomycin plus aztreonam in the clinical cure rate at the TOC visit in both the MITT and CE analysis sets of adult patients with cSSTI.

Protection of trial subjects:

The study will be performed in accordance with the ethical principles that have their origin in the Declaration of Helsinki and are consistent with the International Conference on Harmonisation (ICH) harmonised tripartite guideline E6(R1): Good Clinical Practice, applicable regulatory requirements and the AstraZeneca policy on Bioethics and Human Biological Samples.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	17 May 2012
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	578
From 65 to 84 years	178
85 years and over	16

Subject disposition

Recruitment

Recruitment details:

Overall, 802 patients were enrolled from 111 centres in 6 regions in this study. The first patient was enrolled on 17 May 2012 and the last patient last visit was on 26 June 2014.

Pre-assignment

Screening details:

None

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Carer, Data analyst, Assessor

Blinding implementation details:

Individual treatment codes, indicating the treatment randomisation for each randomised patient, will be available to the investigators from the IVRS/IWRS. Routines for this will be described in the IVRS/IWRS user manual that will be provided to each centre.

Arms

Are arms mutually exclusive?	Yes
Arm title	Ceftaroline fosamil at 600 mg every 8 hours (q8h)

Arm description: -

Arm type	Experimental
Investigational medicinal product name	Ceftaroline fosamil
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder and solvent for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Sterile crystalline powder in a single-dose, clear glass 20-mL vial,

Arm title	Vancomycin Plus Aztreonam
------------------	---------------------------

Pharmaceutical forms	Powder for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Sterile powder containing approximately 1 gram of aztreonam per

Number of subjects in period 1^[1]	Ceftaroline fosamil at 600 mg every 8 hours (q8h)	Vancomycin Plus Aztreonam
Started	506	255
Completed	459	223
Not completed	47	32
Adverse event, serious fatal	3	2
Consent withdrawn by subject	16	6
Lack of therapeutic response	5	6
Adverse event, non-fatal	3	6
Other	3	1
Lost to follow-up	15	8
Protocol deviation	2	3

Notes:

[1] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: Overall 802 patients were recruited, 772 patients were randomized, but only 761 patients had data for the study.
