

## Clinical trial results:

**A randomised double-blind, parallel group, dose-ranging study to evaluate the efficacy and safety of three different total daily doses of fluticasone propionate inhaled from a new dry powder inhaler in subjects with severe persistent asthma requiring oral corticosteroid therapy**

### Summary

EudraCT number	2011-005030-19
Trial protocol	GB DE HU PL BG ES
Global end of trial date	31 October 2013

### Results information

Result version number	v1 (current)
This version publication date	22 July 2016
First version publication date	22 July 2016

### Trial information

#### Trial identification

Sponsor protocol code	VR506/2/004
-----------------------	-------------

#### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT01720069
WHO universal trial number (UTN)	-
Other trial identifiers	IND number : 107310

Notes:

### Sponsors

Sponsor organisation name	Vectura Limited
Sponsor organisation address	1 Prospect West, Chippenham, United Kingdom,
Public contact	Clinical Trials Information, Vectura Limited, +44 1249667700, clinical.enquiries@vectura.com
Scientific contact	Clinical Trials Information, Vectura Limited, +44 1249667700, clinical.enquiries@vectura.com

Notes:

### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	31 October 2013
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	31 October 2013
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

To evaluate the clinical efficacy and dose-response relationship, using oral corticosteroid (OCS) modulation, of 3 different total daily doses of Fluticasone Propionate Inhalation Powder taken using a twice daily regimen from nDPI for 16 weeks in subjects with severe persistent asthma requiring OCS therapy, i.e. Step 5 treatment as defined by modified Global Initiative for Asthma (GINA) guidelines (GINA 2011).

Protection of trial subjects:

There are no specific measures for protection of patients.

Background therapy:

Evidence for comparator: -

Actual start date of recruitment	29 October 2012
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Poland: 49
Country: Number of subjects enrolled	United Kingdom: 2
Country: Number of subjects enrolled	Bulgaria: 19
Country: Number of subjects enrolled	Germany: 10
Country: Number of subjects enrolled	Hungary: 10
Country: Number of subjects enrolled	United States: 10
Country: Number of subjects enrolled	Romania: 49
Country: Number of subjects enrolled	Ukraine: 47
Worldwide total number of subjects	196
EEA total number of subjects	139

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23	0

months)	
Children (2-11 years)	0
Adolescents (12-17 years)	1
Adults (18-64 years)	195
From 65 to 84 years	0
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

Recruitment period covered 29 October 2012 to 31 October 2013. Subjects were screened at 61 sites in 8 countries: Bulgaria, Germany, Hungary, Poland, Romania, Ukraine, United Kingdom (UK) and United States of America (USA).

### Pre-assignment

Screening details:

Subjects were screened at 61 sites in 8 countries: Bulgaria, Germany, Hungary, Poland, Romania, Ukraine, UK & US.

Total of 285 subjects were screened of whom 197 from 56 sites were randomised. 1 subject in Romania was randomised, not treated. So only 196 were treated. 88 subjects failed screening, 35 discontinued during treatment period.

### Period 1

Period 1 title	Randomisation (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor

Blinding implementation details:

Double-blind conditions were secured by the identical appearance of 3 strengths of the Test Product. Due to the coded labelling of the IMPs, neither site personnel nor subject knew which treatment was being administered.

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Test product 1

Arm description:

Fluticasone Propionate Inhalation Powder 50ug

Arm type	Experimental
Investigational medicinal product name	Fluticasone Propionate
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Inhalation powder
Routes of administration	Inhalation use

Dosage and administration details:

50ug Inhalation Powder per actuation. Self administered twice daily

Investigational medicinal product name	Fluticasone Propionate
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Inhalation powder
Routes of administration	Inhalation use

Dosage and administration details:

50ug Inhalation Powder per actuation. Self administered twice daily

<b>Arm title</b>	Test Product 2
------------------	----------------

Arm description:

Fluticasone Propionate Inhalation Powder 250ug

Arm type	Experimental
----------	--------------

Investigational medicinal product name	Fluticasone Propionate
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Inhalation powder
Routes of administration	Inhalation use
Dosage and administration details: 250ug Inhalation Powder per actuation. Self administered twice daily	
<b>Arm title</b>	Test Product 3

Arm description:

Fluticasone Propionate Inhalation Powder 500ug

Arm type	Experimental
Investigational medicinal product name	Fluticasone Propionate
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Inhalation powder
Routes of administration	Inhalation use

Dosage and administration details:

500ug Inhalation Powder per actuation. Self administered twice daily

<b>Number of subjects in period 1</b>	Test product 1	Test Product 2	Test Product 3
Started	62	71	63
Completed	57	56	48
Not completed	5	15	15
Consent withdrawn by subject	-	2	1
Non-compliance on using e-diary	-	-	1
Asthma exacerbation	-	4	-
Adverse event, non-fatal	-	-	1
OCS bursts occurred, discontinued in line with IWRS	1	-	-
Could not use e-diary correctly	-	1	1
Treatment period withdrawal criteria met	4	8	9
Lost to follow-up	-	-	1
Randomised without baseline values	-	-	1

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
24 August 2012	<p>The reasons for the amendment are as follows:</p> <p>"Risk/Benefit Assessment" section amended to include justification of doses, in order to provide information on the reasons for the selection of the proposed doses to be used in the study;</p> <p>Removal of inclusion criterion requiring subjects to have a documented history of airway inflammation indicated by an elevated blood eosinophil count. On review of the literature, the presence of raised levels of eosinophils in the blood was not considered to be an adequate predictor of either airway inflammation or steroid responsive asthma, so this criterion did not offer a useful selection criterion to predict response but would have reduced the eligible population.</p> <p>Addition of acetaminophen as well as paracetamol in concomitant medication list as clinics in the US are taking part in this study;</p> <p>Correction to Figure 1;</p> <p>Correction to in clinic FEV1 withdrawal criterion to ensure consistency with inclusion criteria;</p> <p>Correction to albuterol/salbutamol use withdrawal criterion;</p> <p>Increased number of study sites;</p> <p>Clarification that patients are invited to return to the study clinic for end-of-study assessments;</p> <p>References added to support additional information provided in "Risk/Benefit Assessment".</p>
05 October 2012	<p>To clarify and make consistent information regarding prednisone/prednisolone dose reductions and escalations throughout the protocol and appendices.</p>
