

Clinical trial results:

A Phase 3 Study with Asunaprevir and Daclatasvir (DUAL) for Null or Partial Responders to Peginterferon Alfa and Ribavirin (P/R), Intolerant or Ineligible to P/R Subjects and Treatment- Naive Subjects with Chronic Hepatitis C Genotype 1b Infection.

Summary

EudraCT number	2011-005446-35
Trial protocol	IE AT GB NL ES DE IT

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	20 September 2014
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	20 September 2014
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

For the prior null or partial responders to peginterferon alfa and ribavirin (pegIFN alfa/ribavirin) cohort: To estimate efficacy, as determined by the proportion of subjects with sustained virologic response at post-treatment Week 12 (SVR12), defined as hepatitis C virus (HCV) RNA <limit of quantitation at post-treatment Week 12.

For the treatment naive cohort: To determine whether the SVR12 rate in subjects treated with daclatasvir/asunaprevir therapy is similar to the historical SVR rate for telaprevir in combination with pegIFN alfa/ribavirin in previously untreated, genotype 1b, HCV subjects.

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and in compliance with all International Conference on Harmonization Good Clinical Practice Guidelines. All the local regulatory requirements pertinent to safety of trial subjects were followed.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	11 May 2012
Long term follow-up planned	Yes
Long term follow-up rationale	Efficacy
Long term follow-up duration	6 Months
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Argentina: 25
Country: Number of subjects enrolled	Austria: 37
Country: Number of subjects enrolled	Australia: 89
Country: Number of subjects enrolled	Canada: 57
Country: Number of subjects enrolled	France: 118
Country: Number of subjects enrolled	Germany: 76
Country: Number of subjects enrolled	Ireland: 9
Country: Number of subjects enrolled	Israel: 24
Country: Number of subjects enrolled	Italy: 21
Country: Number of subjects enrolled	Korea, Republic of: 92
Country: Number of subjects enrolled	Netherlands: 19
Country: Number of subjects enrolled	New Zealand: 8
Country: Number of subjects enrolled	Poland: 7
Country: Number of subjects enrolled	Russian Federation: 34
Country: Number of subjects enrolled	Spain: 24

Country: Number of subjects enrolled	Taiwan: 121
Country: Number of subjects enrolled	United Kingdom: 24
Country: Number of subjects enrolled	United States: 190
Worldwide total number of subjects	975
EEA total number of subjects	335

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	784
From 65 to 84 years	191
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

The study was conducted at 116 sites in 18 countries.

Pre-assignment

Screening details:

A total of 975 subjects were enrolled, of which 747 were treated. Remaining 228 subjects did not receive any treatment; Reasons: no longer met the study criteria-192, subject withdrew consent to participate-29; other reasons-7.

Period 1

Period 1 title	Treatment Period
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Blinding implementation details:

Randomized treatment assignment in the treatment naive cohort was placebo-controlled and investigator site, subject and sponsor were blinded until the Week 12 visit.

Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

Arm title	Prior Null or partial responder: Asunaprevir+ Daclatasvir
------------------	---

Arm description:

Subjects with Hepatitis C virus genotype 1b, null or partial responder to peginterferon alfa and ribavirin received daclatasvir 60 mg orally once daily and asunaprevir 100 mg orally twice daily for up to 24 weeks.

Arm type	Experimental
Investigational medicinal product name	Asunaprevir
Investigational medicinal product code	BMS-650032
Other name	
Pharmaceutical forms	Capsule, soft
Routes of administration	Oral use

Dosage and administration details:

Asunaprevir 100-mg softgel capsule was administered twice daily.

Investigational medicinal product name	Daclatasvir
Investigational medicinal product code	BMS-790052
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

Daclatasvir 60-mg film coated tablet was administered once daily.

Arm title	Intolerant or Ineligible: Asunaprevir+ Daclatasvir
------------------	--

Arm description:

Subjects with Hepatitis C virus genotype 1b, intolerant to or ineligible for peginterferon alfa and ribavirin received daclatasvir 60 mg orally once daily and asunaprevir 100 mg orally twice daily for up to 24 weeks.

Arm type	Experimental
----------	--------------

Investigational medicinal product name	Daclatasvir
Investigational medicinal product code	BMS-790052
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use
Dosage and administration details:	
Daclatasvir 60-mg film coated tablet was administered once daily.	
Investigational medicinal product name	Asunaprevir
Investigational medicinal product code	BMS-650032
Other name	
Pharmaceutical forms	Capsule, soft
Routes of administration	Oral use
Dosage and administration details:	
Asunaprevir 100-mg softgel capsule was administered twice daily.	
Arm title	Treatment-naïve: Asunaprevir+ Daclatasvir
Arm description:	
Treatment-naïve subjects with Hepatitis C virus genotype 1b received daclatasvir 60 mg orally once daily, asunaprevir 100 mg twice daily for up to 24 weeks.	
Arm type	Experimental
Investigational medicinal product name	Daclatasvir
Investigational medicinal product code	BMS-790052
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use
Dosage and administration details:	
Daclatasvir 60-mg film coated tablet was administered orally once daily.	
Investigational medicinal product name	Asunaprevir
Investigational medicinal product code	BMS-650032
Other name	
Pharmaceutical forms	Capsule, soft
Routes of administration	Oral use
Dosage and administration details:	
Asunaprevir 100-mg softgel capsule was administered orally twice daily.	
Arm title	Treatment-naïve: Placebo for Asunaprevir + Daclatasvir
Arm description:	
Treatment-naïve subjects with Hepatitis C virus genotype 1b received placebo of daclatasvir once daily and placebo of asunaprevir twice daily for 12 weeks. Subjects were then entered in study NCT01428063 where they receive daclatasvir 60 mg once daily and asunaprevir 100 mg twice daily for 24 weeks.	
Arm type	Placebo
Investigational medicinal product name	Placebo (for Daclatasvir)
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use
Dosage and administration details:	
Placebo matched to daclatasvir was administered once daily.	
Investigational medicinal product name	Placebo (for Asunaprevir)
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule, soft
Routes of administration	Oral use

Dosage and administration details:

Placebo matched to asunaprevir was administered twice daily.

Number of subjects in period 1^[1]	Prior Null or partial responder: Asunaprevir+ Daclatasvir	Intolerant or Ineligible: Asunaprevir+ Daclatasvir	Treatment-naïve: Asunaprevir+ Daclatasvir
Started	205	235	205
Completed	177	208	190
Not completed	28	27	15
Consent withdrawn by subject	-	4	-
Adverse event, non-fatal	2	2	6
Subject request to discontinue study treatment	-	1	-
Lost to follow-up	-	-	1
Lack of efficacy	26	20	8

Number of subjects in period 1^[1]	Treatment-naïve: Placebo for Asunaprevir + Daclatasvir
Started	102
Completed	102
Not completed	0
Consent withdrawn by subject	-
Adverse event, non-fatal	-
Subject request to discontinue study treatment	-
Lost to follow-up	-
Lack of efficacy	-

Notes:

[1] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: Out of 975 subjects who were enrolled, only 747 were treated. Remaining 228 subjects did not receive any treatment. 192 subjects no longer met the study criteria, 29 subjects withdrew consent to participate, and 7 due to other reasons.

Period 2

Period 2 title	Follow-up Period
Is this the baseline period?	No
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

Arm title	Prior Null or partial responder: Asunaprevir+ Daclatasvir
------------------	---

Arm description:

Subjects with Hepatitis C virus genotype 1b, null or partial responder to peginterferon alfa and ribavirin received daclatasvir 60 mg once daily and asunaprevir 100 mg twice daily for 24 weeks. Subjects were followed for 24 weeks of follow-up after completion of treatment or upon early discontinuation of treatment.

Arm type	Experimental
Investigational medicinal product name	Daclatasvir
Investigational medicinal product code	BMS-790052
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

Daclatasvir 60-mg film coated tablet was administered once daily.

Investigational medicinal product name	Asunaprevir
Investigational medicinal product code	BMS-650032
Other name	
Pharmaceutical forms	Capsule, soft
Routes of administration	Oral use

Dosage and administration details:

Asunaprevir 100-mg softgel capsule was administered twice daily.

Arm title	Intolerant or Ineligible: Asunaprevir+ Daclatasvir
------------------	--

Arm description:

Subjects with Hepatitis C virus genotype 1b, intolerant to or ineligible for peginterferon alfa and ribavirin received daclatasvir 60 mg once daily and asunaprevir 100 mg twice daily for 24 weeks. Subjects were followed for 24 weeks of follow-up after completion of treatment or upon early discontinuation of treatment.

Arm type	Experimental
Investigational medicinal product name	Asunaprevir
Investigational medicinal product code	BMS-650032
Other name	
Pharmaceutical forms	Capsule, soft
Routes of administration	Oral use

Dosage and administration details:

Asunaprevir 100-mg softgel capsule was administered twice daily.

Investigational medicinal product name	Daclatasvir
Investigational medicinal product code	BMS-790052
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

Daclatasvir 60-mg film coated tablet was administered once daily.

Arm title	Treatment-naive: Asunaprevir+ Daclatasvir
------------------	---

Arm description:

Treatment-naive subjects with Hepatitis C virus genotype 1b received daclatasvir 60 mg orally once daily, asunaprevir 100 mg twice daily for up to 24 weeks. Subjects were then followed for 24 weeks of follow-up after completion of treatment or upon early discontinuation of treatment.

Arm type	Experimental
Investigational medicinal product name	Asunaprevir
Investigational medicinal product code	BMS-650032
Other name	
Pharmaceutical forms	Capsule, soft
Routes of administration	Oral use

Dosage and administration details:

Asunaprevir 100-mg softgel capsule was administered orally twice daily.

Investigational medicinal product name	Daclatasvir
Investigational medicinal product code	BMS-790052
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

Daclatasvir 60-mg film coated tablet was administered orally once daily.

Number of subjects in period 2^[2]	Prior Null or partial responder: Asunaprevir+ Daclatasvir	Intolerant or Ineligible: Asunaprevir+ Daclatasvir	Treatment-naïve: Asunaprevir+ Daclatasvir
Started	203	230	204
Completed	202	228	204
Not completed	1	2	0
Consent withdrawn by subject	1	1	-
Lost to follow-up	-	1	-

Notes:

[2] - The number of subjects starting the period is not consistent with the number completing the preceding period. It is expected the number of subjects starting the subsequent period will be the same as the number completing the preceding period.

Justification: The number of subjects starting the follow-up period includes those completing previous period plus those that re-joined for followup.

Baseline characteristics

Reporting groups

Reporting group title	Prior Null or partial responder: Asunaprevir+ Daclatasvir
Reporting group description: Subjects with Hepatitis C virus genotype 1b, null or partial responder to peginterferon alfa and ribavirin received daclatasvir 60 mg orally once daily and asunaprevir 100 mg orally twice daily for up to 24 weeks.	
Reporting group title	Intolerant or Ineligible: Asunaprevir+ Daclatasvir
Reporting group description: Subjects with Hepatitis C virus genotype 1b, intolerant to or ineligible for peginterferon alfa and ribavirin received daclatasvir 60 mg orally once daily and asunaprevir 100 mg orally twice daily for up to 24 weeks.	
Reporting group title	Treatment-naïve: Asunaprevir+ Daclatasvir
Reporting group description: Treatment-naïve subjects with Hepatitis C virus genotype 1b received daclatasvir 60 mg orally once daily, asunaprevir 100 mg twice daily for up to 24 weeks.	
Reporting group title	Treatment-naïve: Placebo for Asunaprevir + Daclatasvir
Reporting group description: Treatment-naïve subjects with Hepatitis C virus genotype 1b received placebo of daclatasvir once daily and placebo of asunaprevir twice daily for 12 weeks. Subjects were then entered in study NCT01428063 where they receive daclatasvir 60 mg once daily and asunaprevir 100 mg twice daily for 24 weeks.

Primary: Percentage of Genotype 1b Chronic Hepatitis C Infected Subjects Who Were Prior Null or Partial Responders to Peginterferon Alfa/Ribavirin or Treatment Naïve Achieving Sustained Virologic Response at Follow-Up Week 12 (SVR12)

End point title	Percentage of Genotype 1b Chronic Hepatitis C Infected Subjects Who Were Prior Null or Partial Responders to Peginterferon Alfa/Ribavirin or Treatment Naïve Achieving Sustained Virologic Response at Follow-Up Week 12 (SVR12) ^{[1][2]}
-----------------	--

End point description:

Sustained Virologic Response at Post-Treatment Week 12 was defined as hepatitis C Virus (HCV) RNA levels to be <lower limit of quantitation i.e., 25 international unit per milliliter, target detected or target not detected, at follow-up Week 12 for subjects who were prior null or partial responders to Peginterferon Alfa/Ribavirin or were treatment-naïve. HCV RNA levels were measured by the Roche COBAS® TaqMan® HCV Test version 2.0 from the central laboratory. The analysis was performed in all genotype 1b subjects who received at least 1 dose of study therapy, active or placebo. For subjects who missed the follow-up Week 12 visit, SVR12 was imputed using the first available HCV RNA measurement

after the follow-up Week 12 window.

End point type	Primary
End point timeframe:	
Follow-Up Week 12	

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Only descriptive summary statistics were planned for this outcome measure.

[2] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: The endpoint was planned to evaluate for the specified arm only.

Through Week 12

Notes:

[7] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period. Justification: The endpoint was planned to evaluate for the specified arm only.

End point values	Treatment-naïve: Asunaprevir+ Daclatasvir	Treatment-naïve: Placebo for Asunaprevir + Daclatasvir		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	203	102		
Units: Percentage of Subjects				
number (confidence interval 95%)				
Hemoglobin	0 (0 to 0)	1 (0 to 2.9)		
Neutrophils + Bands	1 (0 to 2.3)	1 (0 to 2.9)		
Alanine Aminotransferase	2 (0.1 to 3.9)	2 (0 to 4.7)		
Aspartate Aminotransferase	1.5 (0 to 3.1)	1 (0 to 2.9)		
Bilirubin Total	0 (0 to 0)	1 (0 to 2.9)		

Statistical analyses

No statistical analyses for this end point

Secondary: Percentage of Subjects With Sustained Virologic Response (SVR12) by rs12979860 Single Nucleotide Polymorphisms (SNP) in the IL28B Gene

End point title	Percentage of Subjects With Sustained Virologic Response (SVR12) by rs12979860 Single Nucleotide Polymorphisms (SNP) in the IL28B Gene ^[8]
-----------------	---

End point description:

SVR12 rate was defined as HCV RNA levels to be < lower limit of quantitation i.e., 25 international unit per milliliter, target detected or target not detected at post-treatment Week 12. HCV RNA levels were measured by the Roche COBAS® TaqMan® HCV Test version 2.0 from the central laboratory. SNP included wild type (common homozygous), mixed (heterozygous), mutant (minor homozygous). Here 'n' specify the number of subjects analysed for specified time point in each group, respectively. The analysis was performed on all treated subjects who received at least 1 dose of study therapy.

End point type	Secondary
----------------	-----------

End point timeframe:

Post-treatment Week 12

Notes:

[8] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period. Justification: The endpoint was planned to evaluate for the specified arm only.

End point values	Prior Null or partial responder: Asunaprevir+ Daclatasvir	Intolerant or Ineligible: Asunaprevir+ Daclatasvir	Treatment-naïve: Asunaprevir+ Daclatasvir	
Subject group type	Reporting group	Reporting group	Reporting group	
Number of subjects analysed	205	235	203	
Units: Percentage of Subjects				
number (confidence interval 80%)				
CC wild type (n= 29, 82, 76)	75.9 (65.7 to 86)	80.5 (74.9 to 86.1)	89.5 (85 to 94)	
CT heterozygous (n= 123, 102, 99)	81.3 (76.8 to 85.8)	81.4 (76.4 to 86.3)	87.9 (83.7 to 92.1)

Reporting groups

Reporting group title	Prior Null or partial responder: Asunaprevir+ Daclatasvir
-----------------------	---

Reporting group description:

Subjects with Hepatitis C virus genotype 1b, null or partial responder to peginterferon alfa and ribavirin received daclatasvir 60 mg orally once daily and asunaprevir 100 mg orally twice daily for up to 24 weeks.

Reporting group title	Intolerant or Ineligible: Asunaprevir+ Daclatasvir
-----------------------	--

Reporting group description:

Subjects with Hepatitis C virus genotype 1b, intolerant to or ineligible for peginterferon alfa and ribavirin received daclatasvir 60 mg orally once daily and asunaprevir 100 mg orally twice daily for up to 24 weeks.

Reporting group title	Treatment-naive: Asunaprevir+ Daclatasvir
-----------------------	---

Reporting group description:

Treatment-naive subjects with Hepatitis C virus genotype 1b received daclatasvir 60 mg orally once daily, and asunaprevir 100 mg twice daily for up to 24 weeks.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
04 June 2012	Updated the protocol with new safety information and added guidance regarding the management of subjects treated with daclatasvir/asunaprevir with unexplained pyrexia. Hemophilia was added as an exclusion criteria.
21 August 2012	Added the collection of cortisol in urine at Day 1, Week 12, and Week 24. Modified the research hypothesis by adding a well-defined criterion for the success of daclatasvir/asunaprevir therapy in the treatment-naive cohort. Separated the primary objective into 1 objective for prior null or partial responders to pegylated-interferon and a second for treatment-naive subjects, in accordance with the modification to the research hypothesis.
14 June 2013	Added description of available data for subjects who have received rescue therapy with QUAD (ASV/DCV/pegIFN-alpha/RBV) rescue therapy. Added option for subjects to continue rescue therapy with QUAD for 48 weeks. Revised contraception guidance for women of childbearing potential (WOCBP) and male subjects sexually active with WOCBP.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
