EU Clinical Trials Register

Clinical trial results:
Ketamine augmentation of ECT to improve outcomes in depression

Summary

EudraCT number	2011-005476-41
Trial protocol	GB
Global end of trial date	30 September 2015

Results information

Result version number	v1 (current)
This version publication date	07 August 2020
First version publication date	07 August 2020
Summary attachment (see zip file)	Results summary (Final Report_Anderson Ketamine.pdf)

Trial information

Trial identification

Sponsor protocol code	MMHSCT1096

Additional study identifiers

ISRCTN number	ISRCTN14689382
ClinicalTrials.gov id (NCT number)	-
WHO universal trial number (UTN)	-

Notes:

Sponsors

Sponsor organisation name	Former Manchester Mental Health and Social Care Trust
Sponsor organisation address	Bury New Road, Prestwich, United Kingdom, M25 3BL
Public contact	Annya Sekula, Greater Manchester Mental Health Trust, researchoffice@gmmh.nhs.uk
Scientific contact	Prof Ian Anderson, University of Manchester, 0044 0161 275 7428, ian.anderson@manchester.ac.uk

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	16 December 2015
Is this the analysis of the primary completion data?	Yes
Primary completion date	01 June 2015
Global end of trial reached?	Yes
Global end of trial date	30 September 2015
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To test the effectiveness of adjunctive glutamate antagonist Ketamine in mitigating the adverse effects of electroconvulsive therapy and optimize symptomatic improvement in depression.

Protection of trial subjects:

Patients excluded if had a history of drug or alcohol abuse, known hypersensitivity or contraindications to ketamine or excipients in the injection, significant cardiovascular disease, uncontrolled hypertension, glaucoma, cirrhosis or abnormal liver function, liver disease, known hypersensitivity or contraindications to concomitant medications used for ECT (propofol, suxamethonium), evidence of organic brain disease, pregnancy or risk of pregnancy.

Background therapy:

Oral psychotropic medication continued by the patient's medical team remained unchanged whee possible for at least the first 4 ECT treatments, and ideally until end of ECT.
Anaesthetic for their ECT course.

Evidence for comparator:

Placebo (saline) comparator, no active comparator. Saline used as an adjunct to patient's anaesthetic for their ECT course

Actual start date of recruitment	01 August 2012
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	United Kingdom: 79
Worldwide total number of subjects	79
EEA total number of subjects	79

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0

Adolescents (12-17 years)	0
Adults (18-64 years)	62
From 65 to 84 years	17
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

7 NHS Trusts involved(UK sites only). Recruitment started in December 2012. Last patient assessment was in June 2015.

Pre-assignment

Screening details:

In total 628 patients received ECT of whom 31% were potentially eligible for the study (47% were ineligible due to detention under the MHA). Of the 196 potentially eligible patients, 79 (40%) were randomised and 70 (36%) formed the final mITT sample (37 in the saline arm, 33 in the Ketamine arm). More: https://pubmed.ncbi.nlm.nih.gov/28359862/

Pre-assignment period milestones

Number of subjects started	79
Number of subjects completed	79

Period 1

Period 1 title	Baseline
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Carer, Assessor

Blinding implementation details:

The patient, clinical team, ECT psychiatry team and investigator/assessor were blinded to the treatment arm. Only the anaesthetist was not blind. Dispensing was by prescription completed by the anaesthetist on study-approved forms that did not identify whether the drug is ketamine or normal saline and drew up by anaesthetist. ECT Clinic staff drug vials were dispensed boxed in plain packaging and the outer packaging 'labelled' as per Annex 13.

Arms

Are arms mutually exclusive?	Yes
Arm title	Ketamine

Arm description:

0.5mg Ketamine per kg, as an adjunct to anaesthetic for ECT.

Arm type	Experimental
Investigational medicinal product name	Ketamine hydrochloride
Investigational medicinal product code	N01AX03
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intravenous bolus use

Dosage and administration details:

0.5 mg/kg as an adjunct to anaesthetic for ECT, bolus.

Arm title	Placebo

Arm description:

Normal Saline bolus

Arm type	Placebo

Investigational medicinal product name	Normal saline
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intravenous bolus use

Dosage and administration details:

Saline bolus as an adjunct to ECT anaesthetic.

Number of subjects in period 1	Ketamine	Placebo
Started	40	39
Completed	33	37
Not completed	7	2
organisational reason	2	-
excluded post-randomisation (clinical reasons)	2	-
Medical contrainduction	-	1
Did not start ECT	3	1

Period 2

Period 2 title	Started ECT + Study Drug
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Carer, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	Ketamine

Arm description:

0.5mg Ketamine per kg, as an adjunct to anaesthetic for ECT.

Arm type	Experimental
Investigational medicinal product name	Ketamine hydrochloride
Investigational medicinal product code	AS1
Other name	
Pharmaceutical forms	Concentrate and solvent for solution for injection
Routes of administration	Intravenous bolus use

Dosage and administration details:

0.5 mg/kg as an adjunct to anaesthetic for ECT, bolus.

Arm title	Placebo

Arm description:

Normal Saline bolus

Arm type	Placebo

Investigational medicinal product name	Normal saline
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate and solvent for solution for injection/infusion
Routes of administration	Intravenous bolus use

Dosage and administration details:

Saline bolus as an adjunct to ECT anaesthetic.

Number of subjects in period 2	Ketamine	Placebo
Started	33	37
Completed	33	36
Not completed	0	1
Consent withdrawn by subject	-	1

Period 3

Period 3 title	Mid-ECT
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Investigator, Monitor, Carer, Assessor, Subject

Arms

Are arms mutually exclusive?	Yes
Arm title	Ketamine

Arm description:

0.5mg Ketamine per kg, as an adjunct to anaesthetic for ECT.

Arm type	Experimental
Investigational medicinal product name	Ketamine hydrochloride
Investigational medicinal product code	AS1
Other name	
Pharmaceutical forms	Concentrate and solvent for solution for injection
Routes of administration	Intravenous bolus use

Dosage and administration details:

0.5 mg/kg as an adjunct to anaesthetic for ECT, bolus.

Arm title	Placebo

Arm description:

Normal Saline bolus

Arm type	Placebo
Investigational medicinal product name	Normal saline
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate and solvent for solution for injection
Routes of administration	Intravenous bolus use

Dosage and administration details:

Saline bolus as an adjunct to ECT anaesthetic.

Number of subjects in period 3	Ketamine	Placebo
Started	33	36
Completed	28	32
Not completed	5	4
Lost capacity	1	-
Consent withdrawn by subject	1	-
Lost to follow-up	2	3
Detained under MHA	1	1

Period 4

Period 4 title	End of Treatment
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Carer, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	Ketamine

Arm description:

0.5mg Ketamine per kg, as an adjunct to anaesthetic for ECT.

Arm type	Experimental
Investigational medicinal product name	Ketamine hydrochloride
Investigational medicinal product code	AS1
Other name	
Pharmaceutical forms	Concentrate and solvent for solution for injection
Routes of administration	Intravenous bolus use

Dosage and administration details:

0.5 mg/kg as an adjunct to anaesthetic for ECT, bolus.

Arm title	Placebo

Arm description:

Normal Saline bolus

Arm type	Placebo

Investigational medicinal product name	Normal saline
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate and solvent for solution for injection
Routes of administration	Intravenous bolus use

Dosage and administration details:

Saline bolus as an adjunct to ECT anaesthetic.

Number of subjects in period 4	Ketamine	Placebo
Started	28	32
Completed	25	23
Not completed	3	9
Consent withdrawn by subject	2	2
Other	-	1
Further ECT	1	2
Lost to follow-up	-	4

Period 5

Period 5 title	1 month follow-up
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Carer, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	Ketamine

Arm description:

0.5mg Ketamine per kg, as an adjunct to anaesthetic for ECT.

Arm type	Experimental
Investigational medicinal product name	Ketamine hydrochloride
Investigational medicinal product code	AS1
Other name	
Pharmaceutical forms	Concentrate and solvent for solution for injection
Routes of administration	Intravenous bolus use

Dosage and administration details:

0.5 mg/kg as an adjunct to anaesthetic for ECT, bolus.

Arm title	Placebo

Arm description:

Normal Saline bolus

Arm type	Placebo

Investigational medicinal product name	Normal saline
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate and solvent for solution for injection
Routes of administration	Intravenous bolus use

Dosage and administration details:

Saline bolus as an adjunct to ECT anaesthetic.

Number of subjects in period 5	Ketamine	Placebo
Started	25	23
Completed	19	18
Not completed	6	5
Consent withdrawn by subject	-	1
Further ECT	2	1
Unavailable	1	-
Lost to follow-up	3	2
Detained under the MHA	-	1

Period 6

Period 6 title	4 month follow-up
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Carer, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	Ketamine

Arm description: -	
Arm type	Experimental
Investigational medicinal product name	Ketamine hydrochloride
Investigational medicinal product code	N01AX03
Other name	
Pharmaceutical forms	Injection, Concentrate and solvent for solution for injection
Routes of administration	Intravenous bolus use

Dosage and administration details:

0.5 mg/kg as an adjunct to anaesthetic for ECT, bolus.

Arm title	Placebo

Arm description: -	
Arm type	Placebo

Investigational medicinal product name	Normal saline
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate and solvent for solution for injection, Injection
Routes of administration	Intravenous bolus use

Dosage and administration details:

Saline bolus as an adjunct to ECT anaesthetic.

Number of subjects in period 6	Ketamine	Placebo
Started	19	18
Completed	19	18

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Baseline to 4 month follow-up. Time frame for ARs during administration of IMP

Adverse event reporting additional description:

Safety was monitored by standard clinical procedures during ECT treatments, degree of re-orientation 30min after ECT, and adverse event recording.

Assessment type	Systematic

Dictionary used

Dictionary name	MedDRA
Dictionary version	18

Reporting groups

Reporting group title	Ketamine

Reporting group description:

Ketamine 0.5mg/kg as an adjunct to anaesthetic for ECT.

occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
psychiatric deterioration	Additional description: clinical deterioration with suicidal ideation requiring admission to hospital		
subjects affected / exposed	1 / 33 (3.03%)	0 / 37 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	

Frequency threshold for reporting non-serious adverse events: 5 %

Non-serious adverse events	Ketamine	Placebo	
Total subjects affected by non-serious adverse events			
subjects affected / exposed	22 / 33 (66.67%)	10 / 37 (27.03%)	
Vascular disorders			
Vascular disorders	Additional description: Vascular disorders		
subjects affected / exposed	0 / 33 (0.00%)	1 / 37 (2.70%)	
occurrences (all)	0	1	
Respiratory, thoracic and mediastinal disorders			
Respiratory disorder	Additional description: Respiratory, thoracic and mediastinal disorders		
subjects affected / exposed	1 / 33 (3.03%)	1 / 37 (2.70%)	
occurrences (all)	1	1	
Psychiatric disorders			
Psychiatric disorders	Additional description: Psychiatric disorders		
subjects affected / exposed	7 / 33 (21.21%)	6 / 37 (16.22%)	
occurrences (all)	7	6	
Cardiac disorders			

Cardiac disorders	Additional description: Cardiac disorders		
subjects affected / exposed	0 / 33 (0.00%)	1 / 37 (2.70%)	
occurrences (all)	0	1	
Nervous system disorders			
Nervous system disorder	Additional description: Nervous system disorder		
subjects affected / exposed	4 / 33 (12.12%)	1 / 37 (2.70%)	
occurrences (all)	4	1	
Blood and lymphatic system disorders			
Blood and lymphatic system disorders	Additional description: Blood and lymphatic system disorder		
subjects affected / exposed	0 / 33 (0.00%)	1 / 37 (2.70%)	
occurrences (all)	0	1	
Eye disorders			
Eye disorders	Additional description: Eye disorders		
subjects affected / exposed	0 / 33 (0.00%)	1 / 37 (2.70%)	
occurrences (all)	0	1	
Gastrointestinal disorders			
Gastrointestinal disorders	Additional description: Gastrointestinal disorders		
subjects affected / exposed	1 / 33 (3.03%)	0 / 37 (0.00%)	
occurrences (all)	1	0	
Hepatobiliary disorders			
Hepatobiliary disorders	Additional description: Hepatobiliary disorders		
subjects affected / exposed	1 / 33 (3.03%)	0 / 37 (0.00%)	
occurrences (all)	1	0	
Skin and subcutaneous tissue disorders			
Skin and subcutaneous tissue disorder	Additional description: Skin and subcutaneous tissue disorder		
subjects affected / exposed	2 / 33 (6.06%)	0 / 37 (0.00%)	
occurrences (all)	2	0	
Renal and urinary disorders			
Renal and urinary disorders	Additional description: Renal and urinary disorders		
subjects affected / exposed	1 / 33 (3.03%)	0 / 37 (0.00%)	
occurrences (all)	1	0	
Musculoskeletal and connective tissue disorders			
Musculoskeletal disorder	Additional description: Musculoskeletal and connective tissue disorder		
subjects affected / exposed	3 / 33 (9.09%)	0 / 37 (0.00%)	
occurrences (all)	3	0	
Infections and infestations			

Infections and infestations	Additional description: Infections and infestations		
subjects affected / exposed	3 / 33 (9.09%)	0 / 37 (0.00%)	
occurrences (all)	3	0	

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
30 July 2012	Protocol changed to implement: -Change of timing of primary outcome and MR imaging -Definition clarified of timing of primary outcome (after 4th ECT subject to SOP defined variation) and end of ECT -Modification/addition of some assessments -Change of timing of ketamine administration to before the anaesthetic induction agent which has now been limited to propofol only -Addition of sample for DNA

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

Recruitment under 50%. In the fNIRS sub-study the effect of ketamine could not be assessed and the other findings must be viewed as preliminary. Included patients were younger, with limited cognitive impairment with ECT which limits generalisation.
