

## Clinical trial results:

**A phase III, randomised, open-label study comparing the combination of the BRAF inhibitor, dabrafenib and the MEK inhibitor, trametinib to the BRAF inhibitor vemurafenib in subjects with unresectable (stage IIIc) or metastatic (stage IV) BRAF V600E/K mutation positive cutaneous melanoma**

### Summary

EudraCT number	2011-006088-23
Trial protocol	SE GB BE AT NO IE CZ ES NL HU FI IT PL DK
Global end of trial date	25 April 2019

### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	25 April 2019
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	25 April 2019
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

The primary objective was to establish the superiority of dabrafenib and trametinib combination therapy over vemurafenib monotherapy with respect to Overall Survival (OS) for subjects with advanced/metastatic BRAF V600E/K mutation-positive cutaneous melanoma

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and the International Conference on Harmonization (ICH) Good Clinical Practice (GCP) guidelines. All the local regulatory requirements pertinent to safety of trial subjects were also followed during the conduct of the trial.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	04 June 2012
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	538
From 65 to 84 years	162
85 years and over	4

## Subject disposition

### Recruitment

Recruitment details:

This study was conducted at 207 centers in 28 countries worldwide (Argentina, Australia, Austria, Belgium, Brazil, Canada, Czech Republic, Denmark, Finland, France, Germany, Hungary, Ireland, Israel, Italy, South Korea, Netherlands, New Zealand, Norway, Poland, Russian Federation, Spain, Sweden, Switzerland, Taiwan, Ukraine, UK and USA).

### Pre-assignment

Screening details:

694 subjects were planned and 704 subjects (352 each in combination therapy arm and vemurafenib monotherapy arm) were actually randomized and analyzed. Subjects were stratified by LDH level (> the ULN versus  $\leq$  ULN) and BRAF mutation (V600E versus V600K).

### Period 1

Period 1 title	Randomized Phase (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Dabrafenib plus Trametinib

Arm description:

Dabrafenib 150 milligrams (mg) orally twice daily (BID) and Trametinib 2 mg orally once daily until disease progression, death, unacceptable toxicity, or withdrawal of consent.

Arm type	Experimental
Investigational medicinal product name	Dabrafenib
Investigational medicinal product code	
Other name	GSK2118436
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

Dabrafenib 150 mg twice daily orally

Investigational medicinal product name	Trametinib
Investigational medicinal product code	
Other name	GSK1120212
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

Trametinib 2 mg once daily orally

<b>Arm title</b>	Vemurafenib
------------------	-------------

Arm description:

Vemurafenib 960 mg orally BID until disease progression, death, unacceptable toxicity, or withdrawal of consent.

Arm type	Active comparator
Investigational medicinal product name	Vemurafenib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

Vemurafenib 960 mg twice daily orally

<b>Number of subjects in period 1</b>	Dabrafenib plus Trametinib	Vemurafenib
Started	352	352
Safety Set	350	349
Completed	1	0
Not completed	351	352
Adverse event, serious fatal	217	238
Consent withdrawn by subject	26	22
Physician decision	6	3
Crossover to Dabrafenib&Trametinib	-	34
Sponsor Decision	93	39
Lost to follow-up	9	16

## End points

### End points reporting groups

Reporting group title	Dabrafenib plus Trametinib
Reporting group description:	Dabrafenib 150 milligrams (mg) orally twice daily (BID) and Trametinib 2 mg orally once daily until disease progression, death, unacceptable toxicity, or withdrawal of consent.
Reporting group title	Vemurafenib
Reporting group description:	Vemurafenib 960 mg orally BID until disease progression, death, unacceptable toxicity, or withdrawal of consent.
Subject analysis set title	Crossover Dabrafenib + Trametinib
Subject analysis set type	Safety analysis
Subject analysis set description:	With Protocol Amendment 7, patients still receiving study treatment on the Vemurafenib monotherapy arm were allowed to cross over to the Dabrafenib and Trametinib combination arm.

### Primary: Overall Survival (OS)

End point title	Overall Survival (OS)
End point description:	Overall Survival (OS) was defined as the interval of time between the date of randomization and the date of death due to any cause. For patients who did not die, OS was censored at the date of last contact.
End point type	Primary
End point timeframe:	From the date of randomization until date of death due to any cause (up to approximately 6 years)

End point values	Dabrafenib plus Trametinib	Vemurafenib		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	352	352		
Units: Months				
median (confidence interval 95%)	26.0 (22.1 to 33.8)	17.8 (15.6 to 20.7)		

### Statistical analyses

Statistical analysis title	Overall Survival (OS)
Comparison groups	Dabrafenib plus Trametinib v Vemurafenib
Number of subjects included in analysis	704
Analysis specification	Pre-specified
Analysis type	superiority
Parameter estimate	Hazard ratio (HR)
Point estimate	0.7

Confidence interval	
level	95 %
sides	2-sided
lower limit	0.58
upper limit	0.83

### Secondary: Progression-Free Survival (PFS), as assessed by the Investigator

End point title	Progression-Free Survival (PFS), as assessed by the Investigator
-----------------	--

End point description:

Progression-free survival (PFS) was defined as the interval of time between the date of randomization and the first documented occurrence of disease progression or death due to any cause. PFS for investigator-assessed response was summarized per Response Evaluation Criteria in Solid Tumors (RECIST), Version 1.1, which is a set of published rules defining when cancer patients improve (respond), stay the same (stabilize), or worsen (progress) during treatment. Disease progression was defined as at least a 20% increase in the sum of the diameters of target lesions with an absolute increase of at least 5 millimeters (mm) or the appearance of at least 1 new lesion, or the worsening of non-target lesions significant enough to require study treatment discontinuation.

End point type	Secondary
----------------	-----------

End point timeframe:

From randomization until the earliest date of disease progression (PD) or death due to any cause (up to approximately 6 years)

End point values	Dabrafenib plus Trametinib	Vemurafenib		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	352	352		
Units: Months				
median (confidence interval 95%)	12.1 (9.7 to 14.7)	7.3 (6.0 to 8.1)

upper limit	0.73

---

**Secondary: Overall Response Rate (ORR) during randomized phase, as assessed by the Investigator**

---

End point title	Overall Response Rate (ORR) during randomized phase, as assessed by the Investigator
-----------------	--

---

End point description:

Overall response was defined as the percentage of confirmed responders (complete response [CR] + partial response [PR] per RECIST, Version 1.1) as summarized by Investigator assessment. CR was defined as the disappearance of all evidence of target lesions. PR was defined as at least a 30% reduction from Baseline in the sum of the longest diameter (LD) of all target lesions. Data were reported as those participants with measurable disease at Baseline.

End point type	Secondary
----------------	-----------

---

End point timeframe:

From randomization until the first documented complete response or partial response (up to approximately 6 years)

---

---

**Secondary: Duration of Response (DOR), as assessed by the Investigator**

---

End point title	Duration of Response (DOR), as assessed by the Investigator
-----------------	---

---

End point description:

Duration of Response (DOR) was defined as the time from the first documented evidence of a CR (disappearance of all evidence of target lesions) or a PR (at least a 30% reduction from Baseline in the sum of the longest diameter of all target lesions) until disease progression or death due to any cause. PD was defined as at least a 20% increase in the sum of the diameters of target lesions with an absolute increase of at least 5 mm or the appearance of at least 1 new lesion, or the worsening of non-target lesions significant enough to require study treatment discontinuation. Data were summarized per RECIST, Version 1.1.

### Post-hoc: All collected deaths

<b>End point title</b>	All collected deaths
End point description:	Pre-treatment deaths were collected from screening visit up to the first day of treatment, for a maximum duration of 28 days. Patients who died during the screening period are considered as screen failure. On treatment deaths were collected from FPFT up to 30 days after study drug discontinuation, for a maximum duration of 81.1 months (treatment duration ranged from 0.1 to 80.1 months). Deaths post treatment survival follow up were collected after the on- treatment period, up to approximately 6 years. Patients who didn't die during the on-treatment period and had not stopped study participation at the time of data cut-off (end of study) were censored.
End point type	Post-hoc
End point timeframe:	up to 28 days before Day 1 (Screening), up to 81.1 months (on-treatment), up to approximately 6 years (study duration)

<b>End point values</b>	Dabrafenib plus Trametinib	Vemurafenib	Crossover Dabrafenib + Trametinib

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Adverse Events are collected from First Patient First Visit (FPFV) until Last Patient Last Visit (LPLV). All Adverse events are reported in this record from First Patient First Treatment until Last Patient Last Visit

Adverse event reporting additional description:

Consistent with EudraCT disclosure specifications, Novartis has reported under the Serious adverse events field "number of deaths resulting from adverse events" all those deaths, resulting from serious adverse events that are deemed to be causally related to treatment by the investigator

Assessment type	Systematic

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
21 June 2012	Amendment 1 made the following changes based on feedback from the FDA: 1) Included new requirements for subjects that remain on study treatment after radiographic disease progression; 2) Required that study treatment will be interrupted for any treatment-related AE of grade 3; 3) Required that rash of $\geq$ grade 3 must resolve to $\leq$ grade 1 before study treatment can be re-started; 4) Removed the allowance for palliative radiation therapy and stated that subjects should not receive palliative radiation therapy prior to documented disease progression; 5) Added an ophthalmic examination at week 4 to enhance the monitoring and more accurately assess the incidence of ophthalmic toxicities; 6) Clarified that the LDH value collected within 14 days of randomization will be used for stratification; 7) Added bicarbonate and chloride to the clinical chemistry parameters; 8) Requirements for cervical and rectal exams, at baseline and end of study. Clarifications of inclusion criteria no. 5, exclusion criteria no. 8 and exclusion criteria no. 10 were made; and exclusion criteria no. 12 added. Changes were made to the vemurafenib label: 1) Addition of QT interval guidance for vemurafenib; 2) Addition of magnesium to clinical chemistry to ensure adequate electrolyte monitoring; 3) Addition of ECG at day 15; 4) Addition of chemistry panel at day 15 to monitor electrolytes; 5) Extension of use of contraception to 6 months in men and women posttreatment. The following additional changes were made to the study protocol: 1) Clarified the definition of asymptomatic hypertension as well as withholding and stopping criteria for QTc-prolongation; 2) Addition of basal cell carcinoma and secondary melanoma to protocol-specific SAEs for new malignancies; 3) Updated prohibited medications and medications to be used with caution based on new data; 5) Correction of typographical errors and change to UK English.
29 June 2012	Country-specific Amendment 02 made the following changes to the study protocol: 1) Added the valvular toxicity withholding criteria for subjects enrolled in France, as requested by the French regulatory agency; 2) Added potassium level monitoring within 72 hours prior to first dose for subjects enrolled in France, as per feedback from French regulatory agency.
22 October 2013	Amendment 03: 1) Revised inclusion criterion #4 and inclusion criterion #7; 2) Added new Section 4.2.2 outlining process for subjects who continue study treatment after disease progression; 3) Removed language prohibiting the intake of food and drink containing grapefruit, Seville oranges, and pommelos; 4) Revised Table 7 regarding dose modifications for LVEF decrease; 5) Clarified in Table 10 Guidelines for Supportive Care of Rash that topical steroids or antibiotics should be used for prevention/prophylaxis; 6) Revised Section 5.8.5.3 to include monitoring guidelines for new cutaneous and non-cutaneous malignancies; 7) Added text in Section 5.8.6.1 Guidelines for pyrexia regarding monitoring of serum creatinine and other evidence of renal function for severe cases of pyrexia; 8) Clarified in Table 16 Management and Dose Modification Guidelines for visual changes that central serous retinopathy and retinal vein occlusion are reportable SAEs, and trametinib should be interrupted or reduced for visual changes. In addition, guidance on action to be taken for cases of uveitis; 9) Revised prohibited and cautionary medications text and tables based on emerging data; 10) Revised text to clarify that the removal or reduction of lesions that are being followed for disease assessments is considered anti-cancer therapy and prohibited during the study; 11) Revised Section 7.3.2.5 to include reporting requirements and actions that should be taken for new primary cancers and treatment emergent malignancies; 12) Revised text in Section 7.3.3.1 to include new guidance for female and male effective contraceptive methods after last dose of study treatment; 13) Added a note within the footnotes of Table 23 Laboratory assessments to include laboratory tests that should be collected to confirm diagnosis of pancreatitis; 14) Added new Section 12.10 Appendix 10 to include new monitoring guidelines for malignancies for subjects enrolled in France (country-specific amendment).

26 February 2014	Amendment 04 made the following major changes to the study protocol all other changes were for clarification or administrative purposes: 1) Revised study design language regarding when study will be considered closed and also, removed reference to the rollover study as an option for subjects; 2) Added information regarding the approval of dabrafenib and trametinib in various countries; 3) Added new data for the integrated safety population for dabrafenib; 4) Revised effective contraception requirements for women to align with the correct timing, per vemurafenib label; 5) Revised dose modification guidelines table for dabrafenib and trametinib combination; 6) Revised guidelines for handfoot skin reactions; 7) Revised management and dose modification guidelines for renal insufficiency; 8) Revised management and dose modification guidelines for pyrexia to remove blood sample for cytokine analysis; 9) Added new guidelines for pancreatitis and hyperglycemia; 10) Revised guidelines for visual changes for the dabrafenib and trametinib combination therapy arm to replace CSR with retinal pigment epithelium detachment and align with asset standard language.
07 August 2014	Protocol Amendment 5: 1) Revised medical monitors; 2) Revised study design to allow subjects randomized to the vemurafenib treatment the option to crossover to the dabrafenib and trametinib combination arm and included new Time and Events Table for crossover subjects; 3) Revised requirement for subjects who have been permitted to continue on study treatment after disease progression; 4) Revised and/or clarified the following dose modification guidelines based on emerging data to improve the management of adverse events: LVEF, cuSCC, new primary melanoma, non-cutaneous malignancies, pyrexia, renal insufficiency, visual changes, pancreatitis, and pneumonitis; 5) Based on emerging data, updated list of concomitant medications and clarified that oral contraceptives are not permitted for use as contraceptives; 6) Revised and/or clarified protocol-specific SAEs; 7) Clarified treatment of study-treatment overdose regarding hemodialysis; 8) Minor administrative changes, including formatting and re numbering of tables
22 July 2016	Protocol Amendment 6: 1) Delete or replace references to GlaxoSmithKline or its staff with that of Novartis and its authorized agents to align with the change of sponsorship; 2) Make administrative changes to align with Novartis processes and procedures
07 November 2017	Protocol Amendment 7: 1) Reduced RECIST v1.1 assessments after Week 56; from "every 12 weeks" to "as clinically indicated (at least every 24 weeks)"; 2) Increased the contraception requirement for male participants from 12 to 16 weeks in the period following stopping of study treatment. 4. Clarified that the lesion assessment scan were no longer collected for central review after 17 April 2014 (interim analysis cutoff date). All the scans were collected and assessed by the Investigator only since 23 April 2015.

Notes:

## Interruptions (globally)

Were there any global interruptions to the trial? No

## Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

New malignancies and AEs possibly related to study treatment were collected even if they occurred more than 30 days post-treatment.

Notes:
