

## Clinical trial results:

### CLINICAL TRIAL TO EVALUATE THE EFFICACY, SAFETY AND ECONOMIC IMPACT OF REDUCING DOSES OF DARUNAVIR IN PATIENTS INFECTED WITH HIV TREATED WITH DARUNAVIR / RITONAVIR ONCE A DAY

#### Summary

EudraCT number	2011-006272-39
Trial protocol	ES
Global end of trial date	26 February 2014

#### Results information

Result version number	v1 (current)
This version publication date	30 July 2016
First version publication date	30 July 2016

#### Trial information

##### Trial identification

Sponsor protocol code	DRV600
-----------------------	--------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	-
WHO universal trial number (UTN)	-

Notes:

#### Sponsors

Sponsor organisation name	Fundació Lluita contra la Sida
Sponsor organisation address	Crta de Canyet s/n, Badalona, Spain, 08916
Public contact	Ensayos Clínicos, Fundació Lluita contra la Sida, +34 934978849, sgel@flsida.org
Scientific contact	Ensayos Clínicos, Fundació Lluita contra la Sida, +34 934978849, jmolto@flsida.org

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

---

**Results analysis stage**

---

Analysis stage	Final
Date of interim/final analysis	30 June 2014
Is this the analysis of the primary completion data?	Yes
Primary completion date	26 February 2014
Global end of trial reached?	Yes
Global end of trial date	26 February 2014
Was the trial ended prematurely?	No

Notes:

---

**General information about the trial**

---

Main objective of the trial:

Compare the proportion of patients maintaining HIV viral load in plasma <50 copies / mL after 48 weeks of follow-up.

Protection of trial subjects:

No specific measures.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	29 May 2012
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

---

**Population of trial subjects**

---

**Subjects enrolled per country**

Country: Number of subjects enrolled	Spain: 100
Worldwide total number of subjects	100
EEA total number of subjects	100

Notes:

---

**Subjects enrolled per age group**

---

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	96
From 65 to 84 years	4
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

Participants were recruited at four hospitals in the urban area of Barcelona, Spain. Eligible participants were HIV-infected patients aged  $\geq 18$  years who were on ART including 800/100 mg of darunavir/ritonavir once daily plus two NRTIs and who had had HIV-1 RNA levels in plasma  $\leq 50$  copies/mL for at least 12 weeks.

### Pre-assignment

Screening details:

Out of 105 patients screened from May 2012 to February 2013, a total of 100 fulfilled eligibility criteria and were enrolled and randomized (50 to each arm).

### Period 1

Period 1 title	Overall trial (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	DRV600

Arm description:

Darunavir (Prezista600®)/ ritonavir (Norvir®): 1 tablet 600mg/1 tablet 100mg QD

Arm type	Experimental
Investigational medicinal product name	DARUNAVIR ETHANOLATE
Investigational medicinal product code	
Other name	Prezista
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Darunavir (Prezista600®) 1 tablet of 600mg daily

Investigational medicinal product name	RITONAVIR
Investigational medicinal product code	
Other name	NORVIR
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Ritonavir (Norvir®): 1 tablet 100 mg daily

<b>Arm title</b>	DRV800
------------------	--------

Arm description:

Darunavir (Prezista400®)/ ritonavir (Norvir®): 2 tablets 800mg/1 tablet 100mg QD

Arm type	Active comparator
Investigational medicinal product name	DARUNAVIR ETHANOLATE
Investigational medicinal product code	
Other name	Prezista
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Darunavir (Prezista 800®) 2 tablets of 400mg daily

Investigational medicinal product name	RITONAVIR
Investigational medicinal product code	
Other name	NORVIR
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Ritonavir (Norvir®): 1 tablet 100 mg daily

<b>Number of subjects in period 1</b>	DRV600	DRV800
Started	50	50
Completed	45	47
Not completed	5	3
Adverse event, serious fatal	1	-
Lost to follow-up	1	1
Lack of efficacy	3	2

## Baseline characteristics

### Reporting groups

Reporting group title	DRV600
Reporting group description:	
Darunavir (Prezista600®)/ ritonavir (Norvir®): 1 tablet 600mg/1 tablet 100mg QD	
Reporting group title	DRV800
Reporting group description:	
Darunavir (Prezista400®)/ ritonavir (Norvir®): 2 tablets 800mg/1 tablet 100mg QD	

Reporting group values	DRV600	DRV800	Total
Number of subjects	50	50	100
Age categorical			
Date of birth			
Units: Subjects			
In utero	0	0	0
Preterm newborn infants (gestational age < 37 wks)	0	0	0
Newborns (0-27 days)	0	0	0
Infants and toddlers (28 days-23 months)	0	0	0
Children (2-11 years)	0	0	0
Adolescents (12-17 years)	0	0	0
Adults (18-64 years)	47	49	96
From 65-84 years	3	1	4
85 years and over	0	0	0
Age continuous			
Units: years			
arithmetic mean	45.6	44.8	
standard deviation	± 10.8	± 10.5	-
Gender categorical

Nadir CD4+ T cell count Units: cells/mm3 arithmetic mean standard deviation	197 ± 157	201 ± 136	-
Time since last HIV-1 RNA<50 copies/mL Units: weeks median inter-quartile range (Q1-Q3)	106.9 40.3 to 252.4	107.4 55.4 to 219	-
Body mass index Units: Kg/m2 arithmetic mean standard deviation	25.3 ± 3.4	24.9 ± 3.5	-

## End points

### End points reporting groups

Reporting group title	DRV600
Reporting group description:	
Darunavir (Prezista600®)/ ritonavir (Norvir®): 1 tablet 600mg/1 tablet 100mg QD	
Reporting group title	DRV800
Reporting group description:	
Darunavir (Prezista400®)/ ritonavir (Norvir®): 2 tablets 800mg/1 tablet 100mg QD	

### Primary: Absence of treatment failure

End point title	Absence of treatment failure
End point description:	
Compare the proportion of patients maintaining HIV viral load in plasma <50 copies / mL after 48 weeks of follow-up.	
Absence of treatment failure was achieved by 45/50 (90%) and by 47/50 (94%) patients in the DRV600 and DRV800 groups, respectively (difference -4%; 95% CI lower limit, -12.9%).	
End point type	Primary
End point timeframe:	
48 weeks	

End point values	DRV600	DRV800		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	50	50		
Units: Percentatge				
Absence of treatment failure	45	47		
No absence of treatment failure	5	3		

### Statistical analyses

Statistical analysis title	ITT comparative analysis
Statistical analysis description:	
The primary efficacy endpoint (absence of treatment failure) was evaluated considering all the patients randomized (ITT analysis).	
Comparison groups	DRV600 v DRV800
Number of subjects included in analysis	100
Analysis specification	Pre-specified
Analysis type	equivalence <sup>[1]</sup>
P-value	> 0.05
Method	comparing proportions

Notes:

[1] - Proportion of absence of treatment failure per group and confidence interval 95% of the difference between groups was reported

## Secondary: Incidence of adverse events

End point title	Incidence of adverse events
End point description: Compare the incidence of adverse events after 4, 12, 24, 36 and 48 weeks follow up	
End point type	Secondary
End point timeframe: 4, 12, 24, 36 and 48 weeks follow up	

End point values	DRV600	DRV800		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	50	50		
Units: Number of patients	5	11		

## Statistical analyses

No statistical analyses for this end point

## Secondary: Darunavir plasma concentration

End point title	Darunavir plasma concentration
End point description: The mean of DRV trough concentration	
End point type	Secondary
End point timeframe: 4, 12, 24, 36 and 48 weeks follow up	

End point values	DRV600	DRV800		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	50	50		
Units: mg/L				
number (not applicable)	2.19	2.21		

## Statistical analyses

Statistical analysis title	Pharmacokinetic study
Statistical analysis description: For the pharmacokinetic substudy, individual darunavir pharmacokinetic parameters [C <sub>max</sub> , AUC 0–24 and concentration at the end of the dosing interval (C <sub>trough</sub> )] were calculated using non-compartmental analysis (Winnonlin version 2.0; Pharsight, Mountain View, CA, USA) and the two study arms were compared with the geometric mean ratio and its 90% CI.	
Comparison groups	DRV800 v DRV600

Number of subjects included in analysis	100
Analysis specification	Pre-specified
Analysis type	equivalence <sup>[2]</sup>
P-value	> 0.05
Method	geometric mean ratio and its 90% CI.

Notes:

[2] - Full darunavir plasma concentration–time curves were determined in 15 patients in each arm

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

48 weeks

Assessment type	Non-systematic
-----------------	----------------

### Dictionary used
