

Clinical trial results:

A Phase 3, 2-Arm, Roll-Over Study to Evaluate the Long-term Safety and Pharmacodynamics of Ivacaftor Treatment in Pediatric Subjects With Cystic Fibrosis and a CFTR Gating Mutation

Summary

EudraCT number	2012-000386-20
Trial protocol	GB
Global end of trial date	17 December 2015

Results information

Result version number	v1 (current)
This version publication date	02 July 2016
First version publication date	02 July 2016

Trial information

Trial identification

Sponsor protocol code	VX11-770-109
-----------------------	--------------

Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT01946412
WHO universal trial number (UTN)	-

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	Yes

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	19 February 2016
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	17 December 2015
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To evaluate the long-term safety of ivacaftor treatment.

Protection of trial subjects:

The study was conducted in accordance with the ethical principles stated in the Declaration of Helsinki and the International Conference on Harmonization (ICH) Guideline for Good Clinical Practice (GCP).

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	16 December 2013
Long term follow-up planned	Yes
Long term follow-up rationale	Safety
Long term follow-up duration	6 Months
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	United States: 25
Country: Number of subjects enrolled	European Union: 8
Worldwide total number of subjects	33
EEA total number of subjects	0

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	33
Adolescents (12-17 years)	0
Adults (18-64 years)	0
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

This was a Phase 3, multicenter, 2 arm study in subjects who received at least 1 dose of study drug in parent study VX11-770-108 (study 108) (2012-000204-15).

Pre-assignment

Screening details:

In study VX11-770-109 (study 109) (2012-000386-20), subjects were to be enrolled in either ivacaftor arm or observational arm. However, there were no subjects enrolled in the observational arm. A total of 33 subjects were enrolled in the ivacaftor arm.

Period 1

Period 1 title	Overall study (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Arm title	Ivacaftor
-----------	-----------

Arm description:

Subjects received ivacaftor 50 milligram (mg) or 75 mg or 150 mg based on body weight and age. Ivacaftor 50 mg administered every 12 hours (q12h) for subjects aged 2 to less than (<) 6 years and weighing <14 kilograms (kg), ivacaftor 75 mg q12h for subjects aged 2 to <6 years and weighing greater than or equal to (>=) 14 kg and ivacaftor 150 mg q12h for subjects >=6 years.

Arm type	Experimental
Investigational medicinal product name	Ivacaftor
Investigational medicinal product code	VX-770
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Subjects received either ivacaftor 50 mg or 75 mg or 150 mg orally q12h. Mini-tablets were used for 50 and 75 mg doses and tablet for 150 mg dose.

Number of subjects in period 1	Ivacaftor
Started	33
Completed	28
Not completed	5
Non-Compliance	1
Adverse Event	1
Difficulty in swallowing	1
Continued with commercial Kalydeco	2

Baseline characteristics

Reporting groups

Reporting group title	Ivacaftor
-----------------------	-----------

Reporting group description:

Subjects received ivacaftor 50 milligram (mg) or 75 mg or 150 mg based on body weight and age. Ivacaftor 50 mg administered every 12 hours (q12h) for subjects aged 2 to less than (<) 6 years and weighing <14 kilograms (kg), ivacaftor 75 mg q12h for subjects aged 2 to <6 years and weighing greater than or equal to (>=) 14 kg and ivacaftor 150 mg q12h for subjects >=6 years.

Reporting group values	Ivacaftor	Total	
Number of subjects	33	33	
Age categorical Units: Subjects			
Age continuous Units: years arithmetic mean standard deviation	3.7 ± 1.04	-	
Gender categorical Units: Subjects			
Female	6	6	
Male	27	27	

End points

End points reporting groups

Reporting group title	Ivacaftor
Reporting group description: Subjects received ivacaftor 50 milligram (mg) or 75 mg or 150 mg based on body weight and age. Ivacaftor 50 mg administered every 12 hours (q12h) for subjects aged 2 to less than (<) 6 years and weighing <14 kilograms (kg), ivacaftor 75 mg q12h for subjects aged 2 to <6 years and weighing greater than or equal to (>=) 14 kg and ivacaftor 150 mg q12h for subjects >=6 years.	
Subject analysis set title	Ivacaftor 50 mg
Subject analysis set type	Safety analysis
Subject analysis set description: Subjects who received ivacaftor 50 mg q12h in parent study VX11-770-108 (2012-000204-15), received either ivacaftor 50 mg q12h for subjects aged 2 to <6 years and weighing <14 kg or ivacaftor 75 mg q12h for subjects aged 2 to <6 years and >=14 kg or ivacaftor 150 mg q12h for subjects >=6 years in this study (2012-000386-20).	
Subject analysis set title	Ivacaftor 75 mg
Subject analysis set type	Safety analysis
Subject analysis set description: Subjects who received ivacaftor 75 mg q12h in parent study VX11-770-108 (2012-000204-15), received either ivacaftor 50 mg q12h for subjects aged 2 to <6 years and weighing <14 kg or ivacaftor 75 mg q12h for subjects aged 2 to <6 years and >=14 kg or ivacaftor 150 mg q12h for subjects >=6 years in this study (2012-000386-20).	

Primary: Number of Subjects With Treatment-Emergent Adverse Events (AEs) and Serious Adverse Events (SAEs)

End point title	Number of Subjects With Treatment-Emergent Adverse Events (AEs) and Serious Adverse Events (SAEs) ^[1]
End point description: AE: any untoward medical occurrence in a subject during the study; the event does not necessarily have a causal relationship with the treatment. This includes any newly occurring event or previous condition that has increased in severity or frequency after the informed consent form is signed. AE includes serious as well as Non-serious AEs. SAE (subset of AE): medical event or condition, which falls into any of the following categories, regardless of its relationship to the study drug: death, life threatening adverse experience, Inpatient hospitalization/prolongation of hospitalization, persistent/significant disability or incapacity, congenital anomaly/birth defect, important medical event. AEs with start date or increased severity on or after the first dose of study drug through the end of study participation was considered treatment-emergent. Safety set included all subjects who received at least 1 dose of study drug in study 109 (2012-000386-20).	
End point type	Primary
End point timeframe: Day 1 up to Week 97 (for subjects who completed study drug dosing); Day 1 up to 24 weeks after the last dose of study drug (up to Week 108, for subjects who prematurely discontinued study drug dosing).	

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Only descriptive statistics were reported, inferential statistics were not planned for primary endpoint.

End point values	Ivacaftor 50 mg	Ivacaftor 75 mg		
Subject group type	Subject analysis set	Subject analysis set		
Number of subjects analysed	9 ^[2]	24 ^[3]		
Units: Subjects				
Subjects with SAEs	6	5		
Subjects with AEs	9	24		

Notes:

[2] - Subjects were to be analyzed based on their dosing as per parent study VX11-770-108 (2012-000204-15)

[3] - Subjects were to be analyzed based on their dosing as per parent study VX11-770-108 (2012-000204-15)

End point description:

BMI = (Weight [in kg]) divided by (Stature [in meters]) ^2. Baseline is defined as the most recent measurement prior to intake of the first dose of study drug in study 109 (2012-000386-20). Safety set included all subjects who received at least 1 dose of study drug in study 109 (2012-000386-20). Here "n" signifies those subjects who were evaluable at the specified time points for each arm, respectively.

End point type	Secondary
----------------	-----------

End point timeframe:

Baseline (study 109), Week 12, 24, 36, 48, 60, 72 and 84 (study 109)

End point values	Ivacaftor 50 mg	Ivacaftor 75 mg		
Subject group type	Subject analysis set	Subject analysis set		
Number of subjects analysed	9 ^[18]	24 ^[19]		
Units: kg/m ²				
arithmetic mean (standard deviation)				
Baseline (n= 9, 24)	16.07 (± 0.55)	16.33 (± 1.12)		
Absolute Change at Week 12 (n= 9, 23)	-0.3 (± 0.6)	-0.16 (± 0.48)		
Absolute Change at Week 24 (n= 9, 23)	-0.02 (± 0.7)	-0.36 (± 1.03)		
Absolute Change at Week 36 (n= 9, 23)	-0.18 (± 0.83)	-0.16 (± 0.63)		
Absolute Change at Week 48 (n= 9, 22)	-0.64 (± 0.81)	-0.35 (± 0.57)		
Absolute Change at Week 60 (n= 9, 22)	-0.45 (± 0.82)	-0.29 (± 0.72)		
Absolute Change at Week 72 (n= 9, 20)	-0.71 (± 0.9)	-0.21 (± 0.78)		
Absolute Change at Week 84 (n= 9, 19)	-0.49 (± 1.09)	-0.01 (± 0.87)		

Notes:

[18] - Subjects were to be analyzed based on their dosing as per parent study VX11-770-108 (2012-000204-15)

[19] - Subjects were to be analyzed based on their dosing as per parent study VX11-770-108 (2012-000204-15)

Statistical analyses

No statistical analyses for this end point

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Day 1 up to Week 97 (for subjects who completed study drug dosing); Day 1 up to 24 weeks after the last dose (up to Week 108, for subjects who prematurely discontinued study drug dosing)

Adverse event reporting additional description:

As per the planned analysis for this study, subjects were to be reported based on their dosing groups as per parent study VX11-770-108 (2012-000204-15).

Assessment type	Systematic

Reporting groups

Reporting group title	Ivacaftor 50 mg
-----------------------	-----------------

Reporting group description:

Subjects who received ivacaftor 50 mg q12h in parent study VX11-770-108 (2012-000204-15), received either ivacaftor 50 mg q12h for subjects aged 2 to <6 years and weighing <14 kg or ivacaftor 75 mg q12h for subjects aged 2 to <6 years and ≥14 kg or ivacaftor 150 mg q12h for subjects ≥6 years in this study (2012-000386-20).

Reporting group title	Ivacaftor 75 mg
-----------------------	-----------------

Reporting group description:

Subjects who received ivacaftor 75 mg q12h in parent study VX11-770-108 (2012-000204-15), received either ivacaftor 50 mg q12h for subjects aged 2 to <6 years and weighing <14 kg or ivacaftor 75 mg q12h for subjects aged 2 to <6 years and ≥14 kg or ivacaftor 150 mg q12h for subjects ≥6 years in this study (2012-000386-20).

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
12 March 2014	Changes to frequency of selected safety laboratory tests, study visit windows, and safety laboratory test panel.
16 January 2015	Changes to frequency of selected safety and efficacy laboratory tests, and changes to medical history data collection.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
