

## Clinical trial results:

**A multicenter, double-blind, randomized withdrawal extension study of subcutaneous secukinumab in prefilled syringes to demonstrate long-term efficacy, safety and tolerability up to 4 years in patients with moderate to severe chronic plaque-type psoriasis completing preceding psoriasis phase III studies with secukinumab**

### Summary

EudraCT number	2012-000533-39
Trial protocol	IS LV SE LT ES BE EE GB DE FI HU IT PL
Global end of trial date	26 June 2017

### Results information

Result version number	v1 (current)

### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	26 June 2017
Is this the analysis of the primary completion data?	No

Global end of trial reached?	Yes
Global end of trial date	26 June 2017
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

The primary objective was to demonstrate the efficacy of secukinumab 150 mg or 300 mg in patients with moderate to severe chronic plaque-type psoriasis, who were PASI 75 responders at Week 52 of the core study, with respect to loss of PASI 75 up to Week 68 compared to placebo.

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and the International Conference on Harmonization (ICH) Good Clinical Practice (GCP) guidelines. All the local regulatory requirements pertinent to safety of trial subjects were also followed during the conduct of the trial.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	19 June 2012
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Notes:

---

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	1055
From 65 to 84 years	91
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

Among the 1146 patients who completed the screening phase, 995 "PASI 75 responder at week 52" patients were randomized in a double blind fashion to either active treatment or placebo & entered the randomized withdrawal period and 151 "partial responders at week 52" patients entered treatment period of the Extension.

### Pre-assignment

Screening details:

1366 patients who completed the core studies (CAIN457A2302 or CAIN457A2303) and provided consent for participation in the extension study were screened, and 1146 (83.9%) completed the screening phase and entered the extension.

### Period 1

Period 1 title	Status at Week 68
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Investigator, Data analyst, Assessor, Subject

Blinding implementation details:

Randomised-Controlled

### Arms

Are arms mutually exclusive?	No
------------------------------	----

<b>Arm title</b>	AIN457 150 mg –Randomized withdrawal period
------------------	---

Arm description:

PASI 75 responders at Week 52, treated with AIN 150 mg in core study and randomized to AIN150 mg

Arm type	Experimental
Investigational medicinal product name	AIN457
Investigational medicinal product code	
Other name	Secukinumab
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:

Secukinumab 150 mg/1 mL solution for injection was provided in PFS for s.c. administration. The 150 mg/1 mL solution in PFS was used for s.c. 150 mg dose (1 syringe)

<b>Arm title</b>	AIN457 300 mg –Randomized withdrawal period
------------------	---

Arm description:

PASI 75 responders at Week 52, treated with AIN 300 mg in core study and randomized to AIN300 mg

Arm type	Experimental
Investigational medicinal product name	AIN457
Investigational medicinal product code	
Other name	Secukinumab
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:

Secukinumab 150 mg/1 mL solution for injection was provided in PFS for s.c. administration. The 150 mg/1 mL solution in PFS was used for s.c. 300 mg dose (2 syringes)

<b>Arm title</b>	AIN457 150 mg Placebo - Randomized withdrawal period
------------------	--

Arm description:

PASI 75 responders at Week 52, treated with AIN 150 mg in core study and randomized to placebo

Arm type	Active comparator
Investigational medicinal product name	AIN457
Investigational medicinal product code	
Other name	Secukinumab
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use

**Dosage and administration details:**

Secukinumab 150 mg/1 mL solution for injection was provided in PFS for s.c. administration during the core study and randomized to placebo at week 52. Placebo secukinumab 150 mg/1 mL solution for injection was provided in PFS for s.c. administration.

<b>Arm title</b>	AIN457 300 mg Placebo - Randomized withdrawal period
------------------	--

**Arm description:**

PASI 75 responders at Week 52, treated with AIN 300 mg in core study and randomized to placebo

Arm type	Active comparator
Investigational medicinal product name	AIN457
Investigational medicinal product code	
Other name	Secukinumab
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use

**Dosage and administration details:**

Secukinumab 150 mg/1 mL solution for injection was provided in PFS for s.c. administration (The 150 mg/1 mL solution in PFS was used for s.c. 300 mg dose (2 syringes)) during the core study and randomized to placebo at week 52. Placebo secukinumab 150 mg/1 mL solution for injection was provided in PFS for s.c. administration.

### **Primary: Subjects with Loss of Psoriasis Area and Severity Index (PASI) 75 response up to Week 68**

End point title	Subjects with Loss of Psoriasis Area and Severity Index (PASI) 75 response up to Week 68
End point description: The primary variable was the cumulative rate of patients who lost PASI 75 response up to Week 68 (time=0 being defined as Week 52). Loss of PASI 75 response was analyzed by means of a survival analysis defining "loss of PASI 75 response" as "failure". The term cumulative rate corresponded to 1 minus the survival function within this survival analysis, and the cumulative rate and the survival functions were dependent on time t. PASI 75 response: patients achieving $\geq 75\%$ improvement (reduction) in PASI score compared to baseline of the core study were defined as PASI 75 responders.	
End point type	Primary
End point timeframe: At week 68 (16 weeks after week 52)

EQ-5D: EuroQOL 5-Dimension Health Status Questionnaire. The EQ-5D© is a generic instrument to assess each patient's health status. It provides a simple descriptive profile and a single index value for health status. The EQ visual analog scale records the respondent's self-rated health on a vertical scale where the endpoints are labeled 'Best imaginable health state' and 'Worst imaginable health state'. This information can be used as a quantitative measure of health outcome as judged by the individual respondents.

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
08 April 2014	The purpose of this amendment was to provide continued treatment for patients in the trial for an additional 104 Weeks (or overall up to four years of treatment in the extension) or until the drug was commercially available in the market in the country of participation, whichever occurred first. This extension of treatment allowed for safety, tolerability, and efficacy data to be collected from the participating patients for a longer time period.
09 September 2014	The purpose of this amendment was to clarify the wording for countries not selected for early trial termination when the drug was commercially available, this study continued up to the end of additional 104 Weeks of treatment. It also clarified a discrepancy in the Assessment Schedule that PK samples at Week 140 were collected for all patients and at Week 144 in case of relapse.
29 April 2015	Patients who completed treatment period and follow-up period were evaluated for 4 years regarding respective adverse events. However, patient who prematurely discontinued treatment were evaluated for less than 4 years.

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
