

## Clinical trial results:

**A randomised, double-blind, double-dummy, placebo and active-controlled, three-way crossover study to evaluate the safety, tolerability and efficacy of 28-day inhaled CHF 6001 DPI (1200 microgrammes daily) in subjects with COPD.**

### Summary

EudraCT number	2012-001005-25
Trial protocol	GB
Global end of trial date	25 October 2013

### Results information

Result version number	v1
This version publication date	12 July 2016
First version publication date	09 August 2015

### Trial information

#### Trial identification

Sponsor protocol code	CCD-1201-PR-0079
-----------------------	------------------

#### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT01730404
WHO universal trial number (UTN)	-

### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

---

**Results analysis stage**

---

Analysis stage	Final
Date of interim/final analysis	25 October 2013
Is this the analysis of the primary completion data?	Yes
Primary completion date	25 October 2013
Global end of trial reached?	Yes
Global end of trial date	25 October 2013
Was the trial ended prematurely?	No

Notes:

---

**General information about the trial**

---

Main objective of the trial:

The primary objectives of the study are:

- to evaluate the effect of CHF 6001 DPI on biological markers of inflammation in induced sputum and in the blood, and on pulmonary function.
- to evaluate the safety and tolerability of CHF 6001 DPI after 28 days of inhaled dosing.
- to assess the blood PK profile of CHF6001 and its metabolite at steady-state in GOLD stage 2-3 COPD patients.

---

Protection of trial subjects:

The study was conducted in accordance with the Declaration of Helsinki, Good Clinical Practice (GCP) guidelines and local law requirements . Other than routine care, no specific measures for protection of trial subjects were implemented.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	04 October 2012
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

---

**Population of trial subjects**

---

**Subjects enrolled per country**

Country: Number of subjects enrolled	United Kingdom: 55
Worldwide total number of subjects	55
EEA total number of subjects	55

Notes:

---

**Subjects enrolled per age group**

---

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0

Adults (18-64 years)	43
From 65 to 84 years	12
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details: -

### Pre-assignment

Screening details:

Fifty-five patients were actually randomised into the study; following the randomization 13 patients were withdrawn due to adverse events (AE), and 5 patients withdrew their consent for participation. All 55 patients were analysed as part of the Safety population. Fifty-three patients were analysed as part of the modified ITT population.

### Period 1

Period 1 title	Overall trial by sequence (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Data analyst, Carer, Assessor

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Sequence C--R--P

Arm description:

- Test treatment (C):  
3 inhalations of CHF 6001 400 µg + 1 tablet Roflumilast Placebo; giving a total dose of 1200 µg of CHF 6001
- Reference treatment (R):  
3 inhalations of CHF 6001 Placebo DPI + 1 tablet Roflumilast 500 µg; giving a total dose of 500 µg of Roflumilast
- Placebo (P):  
3 inhalations of CHF 6001 Placebo DPI + 1 tablet Roflumilast Placebo

After a 15 ±2 days run-in Period, patients were randomised to receive CHF 6001 1200µg using Aerolizer® DPI (T), Roflumilast 500µg (Daxas®) (R) or matched Placebo daily in the morning for 28 days, according to the above sequence. Each treatment period was separated from the other by a wash-out Period of 4-5 weeks.

Arm type	Experimental
Investigational medicinal product name	CHF 6001
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Inhalation powder
Routes of administration	Inhalation use

Dosage and administration details:

3 inhalations of CHF 6001 400 µg administered using Aerolizer® DPI; giving a total dose of 1200 µg of CHF 6001

Investigational medicinal product name	Roflumilast
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

1 tablet Roflumilast 500 µg; giving a total dose of 500µg of Roflumilast

3 inhalations of CHF 6001 400 µg + 1 tablet Roflumilast Placebo; giving a total dose of 1200 µg of CHF 6001
- Reference treatment (R):  
3 inhalations of CHF 6001 Placebo DPI + 1 tablet Roflumilast 500 µg; giving a total dose of 500 µg of Roflumilast
- Placebo (P):  
3 inhalations of CHF 6001 Placebo DPI + 1 tablet Roflumilast Placebo

After a 15 ±2 days run-in Period, patients were randomised to receive CHF 6001 1200µg using Aerolizer® DPI (T), Roflumilast 500µg (Daxas®) (R) or matched Placebo daily in the morning for 28 days, according to the above sequence. Each treatment period was separated from the other by a wash-out Period of 4-5 weeks.

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Throughout the study (from run-in to follow-up)

Adverse event reporting additional description:

It was the responsibility of the Investigator to collect all AEs (both serious and non-serious), derived by spontaneous, unsolicited reports of patients, by observation and by routine open questioning

Assessment type	Systematic
-----------------	------------

### Dictionary used

Dictionary name	MedDRA
-----------------	--------

Dictionary version	14.0

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
16 July 2012	<p>Substantial Amendment 01 was written following a request from the Medicines and Healthcare products Regulatory Agency (MHRA) to modify the exclusion criteria such that patients with known contraindications or hypersensitivity to roflumilast, tiotropium bromide, or salbutamol, and patients with moderate or severe hepatic impairment, would not be considered eligible for the study. The MHRA also requested that rationale to justify both the selected dose of CHF 6001 and duration of its use in this study be added.</p> <p>Requests made by the IEC to amend the Information Sheet and Informed Consent Form ( II of the protocol) were also addressed in this amendment, as follows:</p> <p>1. Information Sheet</p> <ul style="list-style-type: none"><li>• the language and terminology used were simplified;</li><li>• prohibited medications were included;</li><li>• information on the National Health Service Patient Advice and Liaison Service was added;</li><li>• it was included that patients should not donate blood during participation;</li><li>• it was included that participants should be advised to use 2 forms of contraception during the course of the study and for 3 months later.</li></ul> <p>2. Informed Consent Form</p> <ul style="list-style-type: none"><li>• the term 'patients' was amended to read 'patients' or 'participants'.</li></ul> <p>This amendment also added the evaluation of the systemic exposure to metabolite CHF 5956 to the pharmacokinetic assessments in this study. Preclinical studies and preliminary data from the human metabolic profiling of CHF 6001 suggest that its main metabolites are CHF 5956 and CHF 6095, though the investigation of systemic exposure to CHF 6001 metabolites had been focussed only on CHF 5956 which had appeared to be the most abundant compound. More recent preliminary toxicokinetic data had shown detectable concentrations of metabolite CHF 6095 in plasma samples from the rat and dog. Consequently, CHF 6095 was considered of interest and its evaluation was thus added to this protocol.</p>

Notes:

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

No limitations or caveats are reported in this study

Notes:
