

## Clinical trial results:

**A multicenter, open-label, randomized phase II study to evaluate the efficacy of AUY922 vs. emetrexed or docetaxel in NSCLC patients with EGFR mutations who have progressed on prior EGFR TKI treatment**

### Summary

EudraCT number	2012-001050-25
Trial protocol	ES GB NO NL FR IT PL
Global end of trial date	25 November 2015

### Results information

Result version number	v1 (current)
This version publication date	19 November 2016
First version publication date	19 November 2016

### Trial information

#### Trial identification

Sponsor protocol code	CAUY922A2207
-----------------------	--------------

#### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT01646125
WHO universal trial number (UTN)	-

### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

---

**Results analysis stage**

Analysis stage	Final
Date of interim/final analysis	25 November 2015
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	25 November 2015
Was the trial ended prematurely?	No

Notes:

---

**General information about the trial**

Main objective of the trial:

The primary objective of the study was to compare progression-free survival (PFS) in patients treated with AUY922 versus pemetrexed or docetaxel.

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and the International Conference on Harmonization (ICH) Good Clinical Practice (GCP) guidelines. All the local regulatory requirements pertinent to safety of trial subjects were also followed during the conduct of the trial.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	23 November 2012
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

---

**Population of trial subjects****Subjects enrolled per country**

Country: Number of subjects enrolled	France: 13
Country: Number of subjects enrolled	Hong Kong: 4
Country: Number of subjects enrolled	Italy: 3
Country: Number of subjects enrolled	Japan: 6
Country: Number of subjects enrolled	Korea, Republic of: 1
Country: Number of subjects enrolled	Netherlands: 9
Country: Number of subjects enrolled	Norway: 2
Country: Number of subjects enrolled	Poland: 5
Country: Number of subjects enrolled	Spain: 2
Country: Number of subjects enrolled	Taiwan: 5
Country: Number of subjects enrolled	United Kingdom: 7
Country: Number of subjects enrolled	United States: 2
Worldwide total number of subjects	59
EEA total number of subjects	41

Notes:

<b>Subjects enrolled per age group</b>	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	36
From 65 to 84 years	23
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

A total of 59 patients were randomized in the study: 31 to the AUY922 arm and 28 to the chemotherapy arm. 2 patients from the AUY922 arm & 5 from the chemotherapy arm were not treated.

### Pre-assignment

Screening details:

Patients were randomized in a 1:1 ratio to receive either AUY922 or pemetrexed/docetaxel. The control arm treatment was defined as either pemetrexed or docetaxel (at the Investigator's discretion) as they were standard chemotherapeutic agents and were approved for use in patients with advanced NSCLC who had progressed on 1 prior line of treatment

### Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	AUY922 arm

Arm description:

Participants were assigned to one of two treatment arms in a ratio of 1:1. This was the investigational drug arm. AUY922 was to be administered weekly.

Arm type	Experimental
Investigational medicinal product name	AUY922
Investigational medicinal product code	AUY922
Other name	
Pharmaceutical forms	Concentrate and solvent for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

The investigational drug was AUY922 and the mode of administration was intravenous. The dose of AUY922 used in the study was 70 mg/m<sup>2</sup> once a week.

<b>Arm title</b>	Chemotherapy arm
------------------	------------------

Arm description:

Participants were assigned to one of two treatment arms in a ratio of 1:1. This was the control arm drug arm. Pemetrexed or docetaxel was to be given once every three weeks.

Arm type	Active comparator
Investigational medicinal product name	Pemetrexed
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate and solvent for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Pemetrexed 500 mg/m<sup>2</sup> every 3 weeks for intravenous use.

Investigational medicinal product name	Docetaxel
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate and solvent for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Docetaxel 75 mg/m<sup>2</sup> every 3 weeks for intravenous use.

<b>Number of subjects in period 1</b>	AUY922 arm	Chemotherapy arm
Started	31	28
Completed	0	0
Not completed	31	28
Adverse event, serious fatal	1	1
Physician decision	1	3
Adverse event, non-fatal	2	1
Untreated	2	5
Study terminated by sponsor	2	1
Subject/Guardian decision	1	1
Progressive disease	22	16

## Baseline characteristics

### Reporting groups

Reporting group title	AUY922 arm
-----------------------	------------

Reporting group description:

Participants were assigned to one of two treatment arms in a ratio of 1:1. This was the investigational drug arm. AUY922 was to be administered weekly.

Reporting group title	Chemotherapy arm
-----------------------	------------------

Reporting group description:

Participants were assigned to one of two treatment arms in a ratio of 1:1. This was the control arm drug arm. Pemetrexed or docetaxel was to be given once every three weeks.

Reporting group values	AUY922 arm	Chemotherapy arm	Total
Number of subjects	31	28	59

Male	4	7	11

## End points

### End points reporting groups

Reporting group title	AUY922 arm
Reporting group description:	
Participants were assigned to one of two treatment arms in a ratio of 1:1. This was the investigational drug arm. AUY922 was to be administered weekly.	
Reporting group title	Chemotherapy arm
Reporting group description:	
Participants were assigned to one of two treatment arms in a ratio of 1:1. This was the control arm drug arm. Pemetrexed or docetaxel was to be given once every three weeks.	

### Primary: Progression Free Survival (PFS) at Interim Analysis (IA)

End point title	Progression Free Survival (PFS) at Interim Analysis (IA)
End point description:	
Compared PFS between the treatment of AUY922 to comparators Pemetrexed or Docetaxel. Progression-free survival (PFS) based on local investigator assessment per RECIST 1.1 was the time from date of randomization/start of treatment to the date of event defined as the first documented progression or death due to any cause. If a patient had not had an event, progression-free survival is censored at the date of last adequate tumor assessment. Progression was defined using Response Evaluation Criteria In Solid Tumors Criteria (RECIST v1.1), as a 20% increase in the sum of the longest diameter of target lesions, or a measurable increase in a non-target lesion, or the appearance of new lesions	
End point type	Primary
End point timeframe:	
16 months	

End point values	AUY922 arm	Chemotherapy arm		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	19	17		
Units: Months				
median (confidence interval 90%)	1.5 (1.2 to 5.6)	2.3 (1.2 to 4)		

### Statistical analyses

Statistical analysis title	Posterior predictive probability for PFS
Comparison groups	Chemotherapy arm v AUY922 arm
Number of subjects included in analysis	36
Analysis specification	Pre-specified
Analysis type	
Parameter estimate	Cox proportional hazard
Point estimate	0.76

Confidence interval	
level	90 %
sides	2-sided
lower limit	0.35
upper limit	1.63

### Secondary: Overall Response Rate (ORR) at Interim analysis

End point title	Overall Response Rate (ORR) at Interim analysis
End point description:	
ORR was to be compared between treatment arms. The ORR was to be based on local investigator assessment per RECIST 1.1. This outcome measure was originally planned to be analyzed up to 24 months.	
End point type	Secondary
End point timeframe:	
16 months	

End point values	AUY922 arm	Chemotherapy arm		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	19	17		
Units: subjects				
Complete Response (CR)	0	0		
Partial Response (PR)	3	2		
ORR (CR + PR)	3	2		

### Statistical analyses

No statistical analyses for this end point

### Secondary: Overall Survival (OS)

End point title	Overall Survival (OS)
End point description:	
OS was defined as the time from the date of randomization to date of death due to any cause. If a death had not been observed by the date of analysis cutoff, then OS was to be censored at the last known date patient was alive.	
End point type	Secondary
End point timeframe:	
from randomization until death up to death	

End point values	AUY922 arm	Chemotherapy arm		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	0 <sup>[1]</sup>	0 <sup>[2]</sup>		
Units: months				
arithmetic mean (confidence interval 90%)	( to )	( to )		

Notes:

[1] - DMC recommendation at IA was to stop study for futility so collection of efficacy data was stopped.

[2] - DMC recommendation at IA was to stop study for futility so collection of efficacy data was stopped.

## Statistical analyses

No statistical analyses for this end point

### Secondary: Disease Control Rate (DCR)

End point title	Disease Control Rate (DCR)
-----------------	----------------------------

End point description:

Duration of DCR was to be compared between treatment arms. The duration of DCR was to be based on local investigator assessment per RECIST 1.1.

End point type	Secondary

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Adverse Events are collected from First Patient First Visit (FPFV) until Last Patient Last Visit (LPLV). All Adverse Events reported in this record are from date of First Patient First Treatment until Last Patient Last Visit

Adverse event reporting additional description:

Consistent with EudraCT disclosure specifications, Novartis has reported under the Serious adverse events field "number of deaths resulting from adverse events" all those deaths, resulting from serious adverse events that are deemed to be causally related to treatment by the investigator.

Assessment type	Systematic

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
26 February 2013	The primary purpose of this amendment was to implement an interim analysis for futility, in order to stop the study earlier in the event that the efficacy of the AUY922 arm was unlikely to be better than that of the chemotherapy comparator arm.
03 March 2014	A planned interim analysis was conducted per the protocol on May 23, 2014, and the DMC recommendation based on the IA results was to terminate the study due to futility. There were no new safety concerns from the data. Following the DMC recommendations, enrollment was stopped on 05 Jun 2014. In addition, patients will no longer be followed-up for survival. The study continued to offer study medication (AUY and Pemetrexed) and perform safety follow-up for the 6 patients remaining in the trial, whom the investigator deemed were benefiting from the treatment.
03 November 2014	This amendment was a global amendment. The main purpose of this amendment was to change the fresh baseline tumor biopsy from mandatory to optional for patients because this requirement appeared to impact the ability for patients to join the study.

Notes:

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

IA futility criterion was met based on estimated IA PFS HR = 0.76 (90% CI: 0.35, 1.63) & posterior predictive probability  $P(HR_{\text{final}} \leq 0.7 \mid HR_{\text{interim}}) = 0.421$ , below predefined threshold of a posterior predictive probability >85% to continue study
