### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	31 July 2023
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	31 July 2023
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

The primary objective of the study was to evaluate the efficacy of dabrafenib and trametinib combination therapy compared to two placebos with respect to Relapse Free Survival (RFS) in patients with completely resected, histologically confirmed, BRAF V600E/K high-risk, stage III cutaneous melanoma.

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and the International Conference on Harmonization (ICH) Good Clinical Practice (GCP) guidelines. All the local regulatory requirements pertinent to safety of trial subjects were also followed during the conduct of the trial.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	08 January 2013
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Argentina: 5
Country: Number of subjects enrolled	Australia: 103
Country: Number of subjects enrolled	Austria: 11
Country: Number of subjects enrolled	Belgium: 21
Country: Number of subjects enrolled	Brazil: 3
Country: Number of subjects enrolled	Canada: 27
Country: Number of subjects enrolled	Czechia: 15
Country: Number of subjects enrolled	Denmark: 19
Country: Number of subjects enrolled	France: 109
Country: Number of subjects enrolled	Germany: 90
Country: Number of subjects enrolled	United Kingdom: 86
Country: Number of subjects enrolled	Greece: 13
Country: Number of subjects enrolled	Israel: 12
Country: Number of subjects enrolled	Italy: 97
Country: Number of subjects enrolled	Japan: 5
Country: Number of subjects enrolled	Netherlands: 21
Country: Number of subjects enrolled	New Zealand: 4
Country: Number of subjects enrolled	Norway: 19

Country: Number of subjects enrolled	Poland: 22
Country: Number of subjects enrolled	Russian Federation: 29
Country: Number of subjects enrolled	Spain: 41
Country: Number of subjects enrolled	Sweden: 27
Country: Number of subjects enrolled	Switzerland: 18
Country: Number of subjects enrolled	Taiwan: 4
Country: Number of subjects enrolled	United States: 69
Worldwide total number of subjects	870
EEA total number of subjects	505

Notes:

<b>Subjects enrolled per age group</b>	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	712
From 65 to 84 years	156
85 years and over	2

## Subject disposition

### Recruitment

Recruitment details:

The study was conducted in 169 centers across 25 countries.

### Pre-assignment

Screening details:

Patients were planned to be randomized in a 1:1 ratio, stratified by BRAF mutation status (V600E, V600K) and stage of disease (Stage IIIa, IIIb, IIIc).

### Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Dabrafenib and Trametinib combination therapy

Arm description:

Subjects received dabrafenib (150 mg twice daily) and trametinib (2 mg once daily) orally for 12 months.

Arm type	Experimental
Investigational medicinal product name	Dabrafenib
Investigational medicinal product code	
Other name	GSK2118436
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

Dabrafenib, 150 mg twice daily (bid) + trametinib, 2 mg (once daily). Dabrafenib was provided as 50 mg and 75 mg capsules. Each capsule contained 50 mg or 75 mg of free base (present as the mesylate salt).

Investigational medicinal product name	Trametinib
Investigational medicinal product code	
Other name	GSK1120212
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

Dabrafenib, 150 mg twice daily (bid) + trametinib, 2 mg (once daily). Trametinib study treatment was provided as 0.5 mg and 2 mg tablets. Each tablet contained 0.5 mg or 2 mg of trametinib parent (present as the dimethyl sulfoxide solvate).

<b>Arm title</b>	Dabrafenib and Trametinib placebos
------------------	------------------------------------

Arm description:

Subjects received matching placebos orally for 12 months

Arm type	Placebo
Investigational medicinal product name	Matching placebo capsules for dabrafenib, 150 mg (bid) + placebo tablets for trametinib, 2 mg (once daily)
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

---

**Dosage and administration details:**

The placebo capsules/tablets contained the same inactive ingredients and film coatings as the dabrafenib and trametinib study treatment.

<b>Number of subjects in period 1</b>	Dabrafenib and Trametinib combination therapy	Dabrafenib and Trametinib placebos
Started	438	432
Untreated	3	0
Safety Population	435	432
Completed	0	0

## End points

### End points reporting groups

Reporting group title	Dabrafenib and Trametinib combination therapy
Reporting group description: Subjects received dabrafenib (150 mg twice daily) and trametinib (2 mg once daily) orally for 12 months.	
Reporting group title	Dabrafenib and Trametinib placebos
Reporting group description: Subjects received matching placebos orally for 12 months	

### Primary: Percentage of Participants with Relapse-free survival (RFS) events

End point title	Percentage of Participants with Relapse-free survival (RFS) events <sup>[1]</sup>
End point description: Patients with no event by the time of the analysis cut-off date (30-Jun-2017) were censored at the date of the last efficacy assessment (i.e., either radiological or non-radiological) prior to the analysis cut-off. Patients lost to follow-up prior to disease recurrence were censored. Patients who started subsequent anti-cancer therapy prior to disease recurrence were censored at the date of last efficacy assessment (either radiological or non-radiological) before the initiation of subsequent anti-cancer therapy. Patients for whom an event occurred after a period of extended lost-to-follow-up were censored.	
End point type	Primary
End point timeframe: Approximately 3.5 years	
Notes: [1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point. Justification: Only descriptive statistics performed

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Adverse events were collected from first dose of study treatment to 30 days after last dose of study medication (on-treatment), up to approximately 12 months.

Adverse event reporting additional description:

Consistent with EudraCT disclosure specifications, Novartis has reported under the Serious adverse events field "number of deaths resulting from adverse events" all those deaths, resulting from serious adverse events that are deemed to be causally related to treatment by the investigator.

Assessment type	Systematic

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
10 October 2012	Amendment 1: • Updated RFS and OS analysis and study completion definitions; • Deleted the formal interim efficacy analysis; • Added details of randomization capping and interim analysis for OS at the time of the RFS analysis; • Updated male contraception requirements to align with current standard for dabrafenib and trametinib; • Revised Dose Modification Guidelines for Pyrexia, Visual Changes, and LVEF; • Added table showing statistical power scenario for OS analysis; • Minor changes for clarification and consistency throughout the protocol
12 November 2012	Amendment 2: • Country specific amendment for France to include tables for the management and dose modification for hypertension and renal insufficiency in response to a request from the French regulatory agency
13 December 2012	Amendment 3: • Added CT/MRI assessment at Month 21; • Included 80% power calculation for OS; • Provided the rationale for use of the Pike estimator of the treatment hazard ratio; • Updated male and female contraception requirements
17 January 2013	Amendment 4: • Country specific amendment for Sweden to include Risk/Benefit Assessment in Section 1 at the request of the Swedish regulatory agency
24 October 2013	Amendment 5: • Clarifications and updates to eligibility criteria; • Deleted exclusion for glucose-6-phosphate dehydrogenase (G6PD) deficiency; • Clarified follow-up assessments required for subjects that discontinue treatment prior to Month 12 without evidence of disease recurrence; • Updated dosing instructions; • Updated dose modification guidelines for visual changes; • Updated guidance for symptomatic decreased LVEF; • Updated guidelines for QTc prolongation; • Updated prohibited and cautionary medications; • Clarifications and updates to the Time and Events tables; • Clarified imaging requirements for efficacy assessments; • Added collection of new malignancy information; • Added Appendix 15 to address request by French Regulatory Authority for additional monitoring following discontinuation of dabrafenib (applied only to subjects enrolled in France)
05 October 2016	Amendment 6: • Deleted or replaced references to GSK or its staff with that of Novartis/Novartis and its authorized agents and administrative changes to align with Novartis processes and procedures
31 May 2017	Amendment 7: • Updated Sponsor contact information; • Added language to state the primary analysis of RFS can be performed using a data cut-off at approximately 2.5 years after Last patient First Dose. Updated data-cut-off date for final RFS analysis and provided related updated statistical assumptions; • Clarified that the primary analysis for RFS was the first interim analysis for Overall Survival and added a second interim analysis for survival after approximately 299 events
21 December 2018	Amendment 8: • Updated the Final OS analysis to occur after 50% of OS events rather than at 70% and addressed statistical considerations in the relevant sections; • Statistical assumptions updated for Statistical Power Scenarios for Overall Survival (Additional analyses added for 5-year and study completion RFS rates / Additional descriptive analysis added for post-recurrence antineoplastic treatment); • Updates made to the Time and events Schedule to reduce the number of assessments for both pre-and post-recurrence after patients have been on study for more than 60 months

05 November 2021	Amendment 9: • Ceased central imaging collection; • Disruption proof language has been added in the event of a public health emergency how the site should proceed if the subject could not attend study visits at site; • Clarification provided, PK samples for ocular events were no longer required for subjects that discontinued study treatment; • Updates made in Prompt reporting of SAEs and other events for Novartis section based on feedback from the Federal Institute for Drugs and Medical Devices (BfArM) in Germany to require prompt SAE follow up reporting
08 February 2023	Amendment 10: • Updated the Final OS analysis to occur when approximately 260 events occurred (or by the end of Jul-2023, whichever comes first); • All remaining alpha was spent for this final OS analysis by taking into account alpha spent at the first interim analysis; • Updated number of OS events and updated the percentage (%) of statistical power for 255, 260 and 299 events. Additional text regarding statistical power added

Notes:

## Interruptions (globally)

Were there any global interruptions to the trial? No

## Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

Due to EudraCT system limitations, which EMA is aware of, data using 999 as data points in this record are not an accurate representation of the clinical trial results.  
Please use <https://www.novctrd.com> for complete trial results.
