

Clinical trial results:

A 52-Week, Phase 3, Randomized, Active Comparator and Placebo-Controlled, Parallel Design Study to Evaluate the Efficacy and Safety/Tolerability of Subcutaneous Tildrakizumab (SCH 900222 / MK-3222), Followed by an Optional Long Term Safety Extension Study, in Subjects With Moderate-to-Severe Chronic Plaque Psoriasis (Protocol No. MK-3222-011)

Paediatric regulatory details

| | |
|--|----|
| Is trial part of an agreed paediatric investigation plan (PIP) | No |
| Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial? | No |
| Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial? | No |

Notes:

Results analysis stage

| | |
|--|-------------------|
| Analysis stage | Final |
| Date of interim/final analysis | 28 September 2015 |
| Is this the analysis of the primary completion data? | Yes |
| Primary completion date | 28 September 2015 |
| Global end of trial reached? | Yes |
| Global end of trial date | 26 October 2021 |
| Was the trial ended prematurely? | No |

Notes:

General information about the trial

Main objective of the trial:

Primary Efficacy Objective: To assess the efficacy of tildrakizumab (SCH 900222/MK-3222), hereafter referred to as tildrakizumab (MK-3222), compared to placebo in the treatment of moderate-to-severe chronic plaque psoriasis as measured by the proportion of subjects with at least 75% improvement in the Psoriasis Area and Severity Index from baseline (PASI 75 response) and the proportion of subjects with a Physician's Global Assessment (PGA) score of "clear" or "minimal" with at least a 2 grade reduction from baseline at Week 12.

Primary Safety/Tolerability Objective: To assess the safety/tolerability of tildrakizumab (MK-3222) in subjects with moderate-to-severe chronic plaque psoriasis at Week 12.

Protection of trial subjects:

The following measures are taken within the study for the protection of the trial subjects:

- The investigator or sub-investigator to stop treatment in any case in which emerging effects are of unacceptable risk to the individual subject.
- Subjects were free to withdraw his/her consent at any time without giving or stating any reason
- All subjects screened for presence of latent or untreated TB infections, HIV, hepatitis B surface antigen, hepatitis C virus, chronic disease, organ dysfunction, use of prohibited medications and presence of any other such conditions to ensure to minimize the potential risk to study subjects prior to enrollment
- Every subject will be monitored for the occurrence of SAEs immediately after the subject has signed informed consent form
- Each subject will be followed up for adverse events for 20 weeks after the last visit in the treatment period.

Protocol was developed in collaboration with a Scientific Advisory Committee (SAC).

The SAC comprised of both Sponsor and non-Sponsor scientific experts who provided input with respect to trial design, interpretation of trial results and subsequent peer reviewed scientific publications; all subjects signed ICF and study procedures were initiated after voluntary written ICF was obtained; study protocol and essential documents were approved by ECs and RAs; an external DMC made recommendations to the Sponsor regarding steps to ensure both subject safety and the continued ethical integrity of the trial safety, DMC also considered the overall risk and benefit to trial participants and recommend to the Sponsor if the trial should continue in accordance with the protocol; An Executive Oversight Committee (EOC) comprising of members of Sponsor Senior Management received and decide upon any recommendations made by the external DMC regarding the trial.

Background therapy: -

Evidence for comparator: -

| | |
|---|------------------|
| Actual start date of recruitment | 14 December 2012 |
| Long term follow-up planned | Yes |
| Long term follow-up rationale | Safety |
| Long term follow-up duration | 4 Years |
| Independent data monitoring committee (IDMC) involvement? | Yes |

Notes:

Population of trial subjects

Subjects enrolled per country

| | |
|--------------------------------------|--------------------|
| Country: Number of subjects enrolled | Netherlands: 7 |
| Country: Number of subjects enrolled | Poland: 97 |
| Country: Number of subjects enrolled | Austria: 13 |
| Country: Number of subjects enrolled | Belgium: 36 |
| Country: Number of subjects enrolled | Czech Republic: 5 |
| Country: Number of subjects enrolled | Denmark: 11 |
| Country: Number of subjects enrolled | France: 43 |
| Country: Number of subjects enrolled | Germany: 401 |
| Country: Number of subjects enrolled | Hungary: 27 |
| Country: Number of subjects enrolled | Italy: 50 |
| Country: Number of subjects enrolled | Israel: 4 |
| Country: Number of subjects enrolled | Canada: 94 |
| Country: Number of subjects enrolled | United States: 302 |
| Worldwide total number of subjects | 1090 |
| EEA total number of subjects | 690 |

Notes:

Subjects enrolled per age group

| | |
|---|-----|
| In utero | 0 |
| Preterm newborn - gestational age < 37 wk | 0 |
| Newborns (0-27 days) | 0 |
| Infants and toddlers (28 days-23 months) | 0 |
| Children (2-11 years) | 0 |
| Adolescents (12-17 years) | 0 |
| Adults (18-64 years) | 993 |
| From 65 to 84 years | 97 |
| 85 years and over | 0 |

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

A total of 1372 subjects were screened for the study, of which 282 subjects were not randomized into the study.

Period 1

| | |
|------------------------------|--|
| Period 1 title | Base Study - Part 1 (Day 1 to Week 12) |
| Is this the baseline period? | Yes |
| Allocation method | Randomised - controlled |
| Blinding used | Double blind |
| Roles blinded | Subject, Investigator, Carer, Assessor |

Arms

| | |
|------------------------------|---------|
| Are arms mutually exclusive? | Yes |
| Arm title | Placebo |

Arm description:

Tildrakizumab placebo SC at Weeks 0 and 4 and etanercept placebo SC twice weekly

Reporting groups

| | |
|-----------------------|---------------------|
| Reporting group title | Placebo- Base study |
|-----------------------|---------------------|

Reporting group description:

Participants received matching placebo to tildrakizumab SC on Weeks 0 and 4.

| | |
|-----------------------|---------------------------------------|
| Reporting group title | Tildrakizumab 100 mg (Parts 1, 2 & 3) |
|-----------------------|---------------------------------------|

Reporting group description:

Participants received tildrakizumab 100 mg SC on Weeks 0, 4 and then every 12 weeks.

| | |
|-----------------------|---|
| Reporting group title | Tildrakizumab 200 mg (Parts 1, 2 & 3) Wk-28 R |
|-----------------------|---|

Reporting group description:

Participants received tildrakizumab 200 mg SC on Weeks 0 and 4 (Part 1), Week 16 (Part 2), and Weeks 28 and 40 (Part 3) plus etanercept PBO twice weekly until Week 12 and once weekly from Week 12 to Week 28.

| | |
|-----------------------|------------------|
| Reporting group title | Etanercept 50 mg |
|-----------------------|------------------|

Reporting group description:

Participants received etanercept 50 mg twice weekly up to Week 12 and once weekly from Week 12 to Week 28.

| Serious adverse events | Placebo- Base study | Tildrakizumab 100 mg (Parts 1, 2 & 3) | Tildrakizumab 200 mg (Parts 1, 2 & 3) Wk-28 R |
