

Clinical trial results:

Safety of oral chronic administration of ivabradine modified release formulation compared to ivabradine immediate release formulation, in patients with stable coronary artery disease. A 6 to 12-month randomised double blind parallel groups multicentre study

Summary

EudraCT number	2012-001668-31
Trial protocol	GB HU DE SK NL ES BG IT

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	14 April 2014
Is this the analysis of the primary completion data?	Yes
Primary completion date	14 April 2014
Global end of trial reached?	Yes
Global end of trial date	14 April 2014
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To compare the safety profiles of the ivabradine modified release (MR) formulation and ivabradine immediate release (IR) formulation over a 6-month period

Protection of trial subjects:

Study treatment could be prematurely and definitively discontinued by the investigator for any of the following reasons:

Study drug not tolerated: occurrence of suspected adverse drug reaction that cause discomfort to the patient, led to interruption of usual activities, or was considered by the investigator as a safety issue (e.g. significant symptoms of low HR or HR < 50 bpm on the lowest study treatment doses).

Study drug no longer appropriated (e.g. permanent atrial fibrillation).

Study drug considered as contraindicated (e.g. pregnancy, sick sinus syndrome or concomitant administration of a strong cytochrome P450 3A4 inhibitor).

Unwillingness of the patient to continue with the study.

In case the investigator had no news of a patient, he/she had to make every effort to contact him/her (unless the patient withdrew her/his consent), to obtain the date and the reason for discontinuation, to kindly ask the patient to resume the study procedures or at least come for an end-of-study visit. If all attempts failed, the investigator declared the patient "lost to follow-up". All actions implemented were documented in the corresponding medical file

Background therapy:

Standard guideline recommended

Evidence for comparator: -

Actual start date of recruitment	13 November 2012
Long term follow-up planned	Yes
Long term follow-up rationale	Safety
Long term follow-up duration	12 Months
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Russian Federation: 83
Country: Number of subjects enrolled	Vietnam: 40
Country: Number of subjects enrolled	Korea, Republic of: 72
Country: Number of subjects enrolled	Netherlands: 91
Country: Number of subjects enrolled	Slovakia: 51
Country: Number of subjects enrolled	Spain: 107
Country: Number of subjects enrolled	United Kingdom: 58
Country: Number of subjects enrolled	Bulgaria: 117

Country: Number of subjects enrolled	Germany: 59
Country: Number of subjects enrolled	Hungary: 119
Country: Number of subjects enrolled	Italy: 45
Worldwide total number of subjects	842
EEA total number of subjects	647

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	479
From 65 to 84 years	360
85 years and over	3

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

- Women or men;
- Age \geq 18 years;
- Documented stable CAD with or without chronic stable angina pectoris;
- In stable condition for at least 1 month before selection with regards to clinical symptoms and cardiovascular treatments
- Normal sinus rhythm;
- Resting heart rate \geq 60bpm.

Period 1

Period 1 title	Overall study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Investigator, Monitor, Carer, Subject

Arms

Are arms mutually exclusive?	Yes
Arm title	Ivabradine MR

Arm description:

6-month treatment period in the SS.

Arm type	Experimental
Investigational medicinal product name	Ivabradine MR
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule, hard
Routes of administration	Oral use

Dosage and administration details:

During the randomised double-blind treatment period, patients received the study treatment (either ivabradine MR or IR and a placebo capsule or tablet), which were taken orally twice daily, at 12-hour intervals in the morning (one capsule and one tablet) and the evening (one tablet) during meals.

The starting dose of ivabradine or matching placebo was MR 15 mg o.d. / IR 5 mg b.i.d. at D0. At the subsequent follow-up visits, the study treatment was either maintained at the current dose, or increased in dose or reduced in dose or discontinued, depending on the patient's ECG resting HR and tolerability.

Arm title	Ivabradine IR
------------------	---------------

Arm description:

6-month treatment period in the SS.

Arm type	Active comparator
Investigational medicinal product name	Ivabradine IR
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

During the randomised double-blind treatment period, patients received the study treatment (either ivabradine MR or IR and a placebo capsule or tablet), which were taken orally twice daily, at 12-hour intervals in the morning (one capsule and one tablet) and the evening (one tablet) during meals.

The starting dose of ivabradine or matching placebo was MR 15 mg o.d. / IR 5 mg b.i.d. at D0. At the subsequent follow-up visits, the study treatment was either maintained at the current dose, or increased in dose or reduced in dose or discontinued, depending on the patient's ECG resting HR and tolerability.

Number of subjects in period 1	Ivabradine MR	Ivabradine IR
Started	421	421
Completed	351	371
Not completed	70	50
Other protocol withdrawal criteria	-	1
Adverse event	41	36
Lost to follow-up	1	-
Non-medical reason	19	11
Protocol deviation	9	2

Reporting group title	Ivabradine IR
Reporting group description: 6-month treatment period in the SS.	

Primary: Emergent adverse events

End point title	Emergent adverse events ^[1]
End point description: The primary objective was the safety assessment over the first 6 months.	
End point type	Primary
End point timeframe: the first 6 months.	

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Emergent adverse events have been analysed using descriptive statistics

End point values	Ivabradine MR	Ivabradine IR		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	419	421		
Units: Number of affected patients	240	265		

Statistical analyses

No statistical analyses for this end point

Primary: Emergent adverse events in the angina patients subgroup

End point title	Emergent adverse events in the angina patients subgroup ^[2]
End point description: Safety assessment over the first 6 months of treatment in the Angina patients subgroup.	
End point type	Primary
End point timeframe: the first 6 months of treatment	

Notes:

[2] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Emergent adverse events have been analysed using descriptive statistics

End point values	Ivabradine MR	Ivabradine IR		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	253	245		
Units: Number of affected patients	142	150		

Statistical analyses

No statistical analyses for this end point

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Overall study

Adverse event reporting additional description:

The first 6-month treatment period (main analysis) was followed by a blinded extension treatment period of 6 months for early recruited eligible patients in each group.

Therefore, In the following reporting groups, patients in the Ivabradine MR 12-month group were also in the Ivabradine MR 6-month group (same thing for Ivabradine IR groups).

Assessment type	Systematic

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
29 November 2012	Amendment No. 1, dated 29 November 2012, was applicable in Argentina. To comply with local requirements of the Medicine Agency of Argentina - ANMAT (Administración Nacional de Medicamentos, Alimentos y Tecnología Médica) for the implementation of the clinical trial in Argentina, a pregnancy test at the beginning of the study and at every patient visit for women with childbearing potential was added. Finally, due to dynamic recruitment in other participating countries together with regulatory timelines, there were no Argentinian centres opened for participation in this study.
29 April 2013	<p>Amendment No. 2, dated 29 April 2013, concerned all investigational sites in all countries.</p> <p>The main changes were:</p> <p>Following the European Medicine Agency scientific advice (issued on the 17th of January 2013):</p> <p>Given the importance of clinical data on the ivabradine IR and MR formulations switch, the number of patients evaluated in the setting of 3-month switch period was increased from 60 to 120 in each treatment arm.</p> <p>Patient's background treatment (in particular beta-blockers) at the time of formulation switch was collected.</p> <p>In order to reach the target of 120 patients for PK assessment, the total number of patients planned to be evaluated was increased from 700 up to approximately 850.</p> <p>Documentation of events of special interest for ivabradine (bradycardia, ECG prolonged QT interval, eye disorders, rhythm and conduction disorders, increase in blood pressure in hypertensive patients, immune disorders) was detailed, in order to harmonise the study protocol with the latest proposed version of the EU-Risk Management Plan (RMP) of ivabradine hydrochloride (issued on the 22nd of January 2013).</p> <p>The amendment also included diverse adaptations to improve the study patient's follow-up by the investigators, spelling corrections.</p>

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

The section NSAE presented EAEs on treatment and included SEAEs. The causality and seriousness of reported SAE can be ultimately upgraded by the sponsor. The sponsor took these decisions to be compliant with the existing ICH E3 ClinicalStudy Report.

Notes:
