Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	30 June 2014
Is this the analysis of the primary completion data?	No

Global end of trial reached?	Yes
Global end of trial date	22 November 2014
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

- To evaluate the safety of multiple intravenous (IV) doses of MCMV5322A/MCMV3068A given to cytomegalovirus (CMV) seronegative recipients of a renal transplant from a CMV-seropositive donor.
- To determine the clinical activity of multiple IV doses of MCMV5322A/MCMV3068A given to CMV-seronegative recipients of a renal transplant from a CMV-seropositive donor.

Protection of trial subjects:

This study was conducted in full conformance with the International Conference on Harmonisation (ICH) E6 guideline for Good Clinical Practice and the principles of the Declaration of Helsinki or the laws and regulations of the country in which the research was conducted, whichever affords the greater protection to the individual.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	06 October 2012
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects**Subjects enrolled per country**

Country: Number of subjects enrolled	Norway: 7
Country: Number of subjects enrolled	Spain: 13
Country: Number of subjects enrolled	Sweden: 12
Country: Number of subjects enrolled	United Kingdom: 6
Country: Number of subjects enrolled	Belgium: 9
Country: Number of subjects enrolled	Germany: 3
Country: Number of subjects enrolled	France: 12
Country: Number of subjects enrolled	United States: 58
Worldwide total number of subjects	120
EEA total number of subjects	62

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37	0

wk	
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	102
From 65 to 84 years	18
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

CMV-seronegative participants who received a renal allograft from a CMV-seropositive donor (D+R-) and met all inclusion/exclusion criteria were eligible for enrollment and randomization were screened and consented for enrollment.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Arms

Are arms mutually exclusive?	Yes
Arm title	MCMV5322A/MCMV3068A

Arm description:

Participants received a total of four doses of MCMV5322A/MCMV3068A in CMV-seronegative recipients of a renal transplant from a CMV-seropositive donor, with use of a pre-emptive approach for prevention of CMV disease.

Arm type	Experimental
Investigational medicinal product name	MCMV5322A/MCMV3068A
Investigational medicinal product code	RO6855849/RO6855848
Other name	RG7667
Pharmaceutical forms	Concentrate and solvent for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

MCMV5322A/MCMV3068A, 20 milligram per kilogram (mg/kg) [10 mg/kg each], IV infusion.

Arm title	Placebo
------------------	---------

Arm description:

Participants received a total of four doses of placebo matched with MCMV5322A/MCMV3068A in CMV-seronegative recipients of a renal transplant from a CMV-seropositive donor, with use of a pre-emptive approach for prevention of CMV disease.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate and solvent for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Placebo matched with MCMV5322A/MCMV3068A, 20 mg/kg (10 mg/kg each), IV infusion.

Number of subjects in period 1	MCMV5322A/MCMV3068A	Placebo
Started	60	60
Completed	48	52
Not completed	12	8
Consent withdrawn by subject	6	2
Physician decision	-	1
Protocol violation	1	-
Death	2	-
Adverse event	2	3
Unspecified	1	2

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
27 October 2012	Protocol was amended to clarify the inclusion criteria relating to sexual abstinence in the context of contraception and to clarify the process for emergency unblinding of study treatment.
30 October 2012	Protocol was amended to clarify the algorithm for resistance testing. The protocol was also revised to enhance the clarity of the Study Flowchart by including a footnote that references and to clarify that protocol-related decisions (e.g., additional visits between Weeks 13 and 24) are to be based on central, not local, laboratory viral load results.
15 July 2013	The study population was changed to 120 participants (60 active and 60 placebo) and the window for study drug administration was changed to 24 hours before transplantation.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

As the development of the drug was terminated, the planned analysis of some secondary endpoints was not performed.

Notes:
