

Clinical trial results:

A Phase IIb, Partially-Blinded Randomized, Active Comparator-Controlled Study to Evaluate the Pharmacokinetics/Pharmacodynamics, Safety, and Tolerability of Fosaprepitant in Pediatric Patients for the Prevention of Chemotherapy-Induced Nausea and Vomiting (CINV) Associated with Emetogenic Chemotherapy

Subtitle:

Open-Label Cohort to Further Evaluate the Pharmacokinetics/Pharmacodynamics, Safety, and Tolerability of Fosaprepitant in Pediatric Patients Birth to <12 Years Old

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	Yes

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	21 November 2016
Is this the analysis of the primary completion data?	No

Global end of trial reached?	Yes
Global end of trial date	21 November 2016
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The purpose of this study was to determine the appropriate dosing regimen of fosaprepitant, when administered with ondansetron (with or without dexamethasone), for the prevention of CINV in children from birth to <17 years of age. Fosaprepitant is a prodrug to aprepitant. All participants who completed the randomized Cycle 1 could elect to receive open-label fosaprepitant during optional Cycles 2-6.

Protection of trial subjects:

This study was conducted in conformance with Good Clinical Practice standards and applicable country and/or local statutes and regulations regarding ethical committee review, informed consent, and the protection of human subjects participating in biomedical research.

The following additional measure defined for this individual study was in place for the protection of trial subjects: Participants will be permitted to take "rescue medication" for established (not anticipated) nausea and vomiting throughout the study.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	13 December 2012
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	23
Children (2-11 years)	149
Adolescents (12-17 years)	68
Adults (18-64 years)	0
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

This study enrolled participants scheduled to receive chemotherapeutic agent(s) associated with moderate, high, or very high risk of emetogenicity for no more than 5 consecutive days and was expected to receive ondansetron as part of their antiemetic regimen. Additional inclusion and exclusion criteria applied.

Pre-assignment

Screening details:

Participants (2 to <6, 6 to <12 and 12 to 17 years-old) were enrolled in a randomized, partially-blinded study of 4 doses of fosaprepitant and a control in Cycle 1. Participants (0 to <2, 2 to <6 and 6 to <12 years-old) were invited to participate in optional Cycles 2-6 which was an open-label study of 2 doses of fosaprepitant.

Period 1

Period 1 title	Base Study-Cycle 1
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Arms

Are arms mutually exclusive?	Yes
Arm title	Fosaprepitant 5 mg/kg-Cycle 1

Arm description:

Participants were administered intravenous (IV) fosaprepitant at the following weight-adjusted doses: Participants 4 months to <12 years old were administered 5 mg/kg (not to exceed 150 mg), Participants 1 to <4 months old were administered 2.5 mg/kg; Participants 0 to <1 month old were administered 1.25 mg/kg. Participants were also administered IV ondansetron (0.15 mg/kg x 3 doses for children 6 months to 17 years of age or per local standard of care for children <6 months of age), with or without dexamethasone.

Arm type	Experimental
Investigational medicinal product name	Fosaprepitant
Investigational medicinal product code	
Other name	Emend® for injection Fosaprepitant dimeglumine MK-0517
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Fosaprepitant 5 mg/kg administered IV as a single dose.

Investigational medicinal product name	Dexamethasone
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Administered as specified by local labeling and/or local standard of care

Investigational medicinal product name	Ondansetron
Investigational medicinal product code	
Other name	Ondansetron hydrochloride Zofran® Injection
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Administered IV

Arm title	Fosaprepitant 3 mg/kg-Cycle 1
Arm description:	
Participants 12 to 17 years old were administered 150 mg IV fosaprepitant. Participants 2 to <12 years old were administered a weight-adjusted dose of 3 mg/kg (not to exceed 150 mg). Participants were also administered IV ondansetron 0.15 mg/kg x 3 doses with or without dexamethasone.	
Arm type	Experimental
Investigational medicinal product name	Fosaprepitant
Investigational medicinal product code	
Other name	Emend® for injection Fosaprepitant dimeglumine MK-0517
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use
Dosage and administration details:	
Fosaprepitant 3 mg/kg administered IV as a single dose.	
Investigational medicinal product name	Ondansetron
Investigational medicinal product code	
Other name	Ondansetron hydrochloride Zofran® Injection
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use
Dosage and administration details:	
Administered IV	
Investigational medicinal product name	Dexamethasone
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use
Dosage and administration details:	
Administered as specified by local labeling and/or local standard of care	
Arm title	Fosaprepitant 1.2 mg/kg-Cycle 1
Arm description:	
Participants 12 to 17 years old were administered 60 mg IV fosaprepitant. Participants 2 to <12 years old were administered a weight-adjusted dose of 1.2 mg/kg (not to exceed 60 mg). Participants were also administered IV ondansetron 0.15 mg/kg x 3 doses with or without dexamethasone.	
Arm type	Experimental
Investigational medicinal product name	Fosaprepitant
Investigational medicinal product code	
Other name	Emend® for injection Fosaprepitant dimeglumine MK-0517
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use
Dosage and administration details:	
Fosaprepitant 1.2 mg/kg administered IV as a single dose.	
Investigational medicinal product name	Ondansetron
Investigational medicinal product code	
Other name	Ondansetron hydrochloride Zofran® Injection
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use
Dosage and administration details:	
Administered IV	
Investigational medicinal product name	Dexamethasone
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Administered as specified by local labeling and/or local standard of care

Arm title	Fosaprepitant 0.4 mg/kg-Cycle 1
------------------	---------------------------------

Arm description:

Participants 12 to 17 years old were administered 20 mg IV fosaprepitant. Participants 2 to <12 years old were administered a weight-adjusted dose of 0.4 mg/kg (not to exceed 20 mg). Participants were also administered IV ondansetron 0.15 mg/kg x 3 doses with or without dexamethasone.

Arm type	Experimental
Investigational medicinal product name	Fosaprepitant
Investigational medicinal product code	
Other name	Emend® for injection Fosaprepitant dimeglumine MK-0517
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Fosaprepitant 0.4 mg/kg administered IV as a single dose.

Investigational medicinal product name	Ondansetron
Investigational medicinal product code	
Other name	Ondansetron hydrochloride Zofran® Injection
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Administered IV

Investigational medicinal product name	Dexamethasone
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Administered as specified by local labeling and/or local standard of care

Arm title	Placebo Control-Cycle 1
------------------	-------------------------

Arm description:

Participants were administered IV normal saline at volume to match age and weight specific doses of fosaprepitant. Participants were also administered IV ondansetron (0.15 mg/kg x 3 doses for children 6 months to 17 years of age or per local standard of care for children <6 months of age), with or without dexamethasone.

Arm type	Placebo
Investigational medicinal product name	Fosaprepitant Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Placebo Fosaprepitant administered IV as a single dose.

Investigational medicinal product name	Ondansetron
Investigational medicinal product code	
Other name	Ondansetron hydrochloride Zofran® Injection
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Administered IV

Investigational medicinal product name	Dexamethasone
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Administered as specified by local labeling and/or local standard of care

Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

Arm title	Fosaprepitant 5 mg/kg Cycle 2-6
Arm description:	
For optional Cycles 2-6, participants from the 5 mg/kg fosaprepitant arm in Cycle 1 were administered fosaprepitant 5 mg/kg IV (or age-adjusted equivalent). For Cycle 2, fosaprepitant was administered IV plus ondansetron with or without dexamethasone. For Cycles 3-6, fosaprepitant was administered IV plus a 5-hydroxytryptamine 3 (5-HT3) antagonist with or without dexamethasone. Participants 1 year or less were required to receive ondansetron in all cycles as the 5-HT3 antagonist.	
Arm type	Experimental
Investigational medicinal product name	Fosaprepitant
Investigational medicinal product code

Subject analysis set type	Per protocol

Subject analysis set description:

Participants were administered a weight-adjusted dose of 5 mg/kg fosaprepitant IV (not to exceed 150 mg). Participants also were administered IV ondansetron at 0.15 mg/kg x 3 doses with or without dexamethasone. Analysis was in the PP population which includes all participants 6 to <12 years of age that received one dose of study therapy, did not have important deviations from the study protocol, and had data that contributed to the outcome being measured.

Subject analysis set title	Fosaprepitant 3 mg/kg: 2 to <6 Years-Cycle 1
Subject analysis set type	Per protocol

Subject analysis set description:

Participants were administered a weight-adjusted dose of 3 mg/kg fosaprepitant IV (not to exceed 150 mg). Participants were also administered IV ondansetron at 0.15 mg/kg x 3 doses with or without dexamethasone. Analysis was in the PP population which includes all participants 2 to <6 years of age that received one dose of study therapy, did not have important deviations from the study protocol, and had data that contributed to the outcome being measured.

Subject analysis set title	Fosaprepitant 1.2 mg/kg: 12 to 17 Years-Cycle 1
Subject analysis set type	Per protocol

Subject analysis set description:

Participants were administered 60 mg fosaprepitant IV. Participants were also administered IV ondansetron at 0.15 mg/kg x 3 doses with or without dexamethasone. Analysis was in the PP population which includes all participants 12 to 17 years of age that received one dose of study therapy, did not have important deviations from the study protocol, and had data that contributed to the outcome being measured.

Subject analysis set title	Fosaprepitant 0.4 mg/kg: 2 to <6 Years-Cycle 1
Subject analysis set type	Per protocol

Subject analysis set description:

Participants were administered a weight-adjusted dose of 0.4 mg/kg fosaprepitant IV (not to exceed 20 mg). Participants were also administered IV ondansetron at 0.15 mg/kg x 3 doses with or without dexamethasone. Analysis was in the PP population which includes all participants 2 to <6 years of age that received one dose of study therapy, did not have important deviations from the study protocol, and had data that contributed to the outcome being measured.

Subject analysis set title	Fosaprepitant 0.4 mg/kg: 6 to <12 Years-Cycle 1
Subject analysis set type	Per protocol

Subject analysis set description:

Participants were administered a weight-adjusted dose of 0.4 mg/kg fosaprepitant IV (not to exceed 20 mg). Participants were also administered IV ondansetron at 0.15 mg/kg x 3 doses with or without dexamethasone. Analysis was in the PP population which includes all participants 6 to <12 years of age

that received one dose of study therapy, did not have important deviations from the study protocol, and had data that contributed to the outcome being measured.

Subject analysis set title	Fosaprepitant 0.4 mg/kg: 12 to 17 Years-Cycle 1
Subject analysis set type	Per protocol

Subject analysis set description:

Participants were administered 20 mg fosaprepitant IV. Participants were also administered IV ondansetron at 0.15 mg/kg x 3 doses with or without dexamethasone. Analysis was in the PP population which includes all participants 12 to 17 years of age that received one dose of study therapy, did not have important deviations from the study protocol, and had data that contributed to the outcome being measured.

Subject analysis set title	Fosaprepitant 5 mg/kg Cycles 2-6
Subject analysis set type	Safety analysis

Subject analysis set description:

For optional Cycles 2-6, participants from the 5 mg/kg fosaprepitant arm in Cycle 1 were administered fosaprepitant 5 mg/kg IV (or age-adjusted equivalent). For Cycle 2, fosaprepitant was administered IV plus ondansetron with or without dexamethasone. For Cycles 3-6, fosaprepitant was administered IV plus a 5-hydroxytryptamine 3 (5-HT₃) antagonist with or without dexamethasone. Participants 1 year or less were required to receive ondansetron in all cycles as the 5-HT₃ antagonist. Analysis was in the All Patients as Treated Population that included all randomized participants who received at least one dose of study treatment.

Subject analysis set title	Fosaprepitant 3 mg/kg Cycles 2-6
Subject analysis set type	Safety analysis

Subject analysis set description:

For optional Cycles 2-6, participants from Cycle 1 fosaprepitant arms (3, 1.2, or 0.4 mg/kg) or Cycle 1 Control arm were administered fosaprepitant 3 mg/kg IV (or age-adjusted equivalent). For Cycle 2, fosaprepitant was administered IV plus ondansetron with or without dexamethasone. For Cycles 3-6, fosaprepitant was administered IV plus a 5-HT₃ antagonist with or without dexamethasone. Analysis was in the All Patients as Treated Population that included all randomized participants who received at least one dose of study treatment.

Primary: Maximum concentration (C_{max}) of aprepitant in participants 0 to <2 years of age

End point title	Maximum concentration (C _{max}) of aprepitant in participants 0 to <2 years of age ^[1]
-----------------	---

End point description:

Fosaprepitant is a pro-drug that is rapidly converted to aprepitant. Because of this rapid conversion to aprepitant, fosaprepitant cannot be assessed directly. The pharmacokinetics for each fosaprepitant dose were determined by analyzing aprepitant in plasma. The C_{max} for aprepitant was determined by measuring aprepitant levels at pre-infusion, immediately after infusion, and 2-4, 5-7, 8-10, 23-25, and 46-50 hours post-infusion.

End point type	Primary
----------------	---------

Primary: C48hr of aprepitant in participants 2 to <6 years of age

End point title	C48hr of aprepitant in participants 2 to <6 years of age ^[15]
-----------------	--

End point description:

Fosaprepitant is a pro-drug that is rapidly converted to aprepitant. Because of this rapid conversion to aprepitant, fosaprepitant cannot be assessed directly. The pharmacokinetics for each fosaprepitant dose were determined by analyzing aprepitant in plasma. The C48hr for aprepitant was determined by measuring aprepitant levels in the time frame of 46 to 50 hours post-infusion. The C48hr was only planned to be measured in the 5 mg/mL dose for each age group.

End point type	Primary
----------------	---------

End point timeframe:

Approximately 48 hours (from 46 to 50 hours) post-infusion

Notes:

[15] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: No statistical analyses for group comparisons were planned for this endpoint.

Fosaprepitant is a pro-drug that is rapidly converted to aprepitant. Because of this rapid conversion to aprepitant, fosaprepitant cannot be assessed directly. The pharmacokinetics for each fosaprepitant dose were determined by analyzing aprepitant in plasma. The C48hr for aprepitant was determined by measuring aprepitant levels in the time frame of 46 to 50 hours post-infusion. The C48hr was only planned to be measured in the 5 mg/mL dose for each age group.

End point type	Primary
----------------	---------

End point timeframe:

Approximately 48 hours (from 46 to 50 hours) post-infusion

Notes:

[37] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: No statistical analyses for group comparisons were planned for this endpoint.

End point values	Fosaprepitant 3 mg/kg: 12 to 17 Years-Cycle 1	Fosaprepitant 1.2 mg/kg: 12 to 17 Years-Cycle 1	Fosaprepitant 0.4 mg/kg: 12 to 17 Years-Cycle 1

Primary: Percentage of participants who experienced at least one adverse event (AE) in Cycle 1

End point title	Percentage of participants who experienced at least one adverse event (AE) in Cycle 1 ^[42]
-----------------	---

End point description:

AE was defined as any untoward medical occurrence in a participant administered a pharmaceutical product and which did not necessarily have to have a causal relationship with this treatment. An AE could therefore be any unfavorable and unintended sign, symptom, or disease temporally associated with the use of a medicinal product/protocol specified procedure, whether or not considered related to the medicinal product/protocol specified procedure. Any worsening of a preexisting condition temporally associated with the use of the product was also an AE.

End point type	Primary
----------------	---------

End point timeframe:

Up to 14 days postdose in Cycle 1

Notes:

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Up to 14 days after the dose of study drug for Cycles 1-6 (approximately up to 84 days total)

Adverse event reporting additional description:

AEs were reported for the All Patients as Treated Population that included all randomized participants who received at least one dose of study treatment. All AEs (serious and non-serious) were reported in Cycle 1. In Cycles 2-6, only serious AEs and non-serious AEs that were either drug-related AEs or led to discontinuation were reported.

Assessment type	Systematic

Reporting groups

Reporting group title	Fosaprepitant 0.4 mg/kg-Cycle 1
-----------------------	---------------------------------

Reporting group description:

Participants 12 to 17 years old were administered 20 mg IV fosaprepitant. Participants 2 to <12 years old were administered a weight-adjusted dose of 0.4 mg/kg (not to exceed 20 mg). Participants were also administered IV ondansetron (0.15 mg/kg x 3 doses for children 6 months to 17 years of age or per local standard of care for children <6 months of age), with or without dexamethasone.

Reporting group title	Fosaprepitant 3 mg/kg-Cycle 1
-----------------------	-------------------------------

Reporting group description:

Participants 12 to 17 years old were administered 150 mg IV fosaprepitant. Participants 2 to <12 years old were administered a weight-adjusted dose of 3 mg/kg (not to exceed 150 mg). Participants were also administered IV ondansetron 0.15 mg/kg x 3 doses with or without dexamethasone.

Reporting group title	Fosaprepitant 1.2 mg/kg-Cycle 1
-----------------------	---------------------------------

Reporting group description:

Participants 12 to 17 years old were administered 60 mg IV fosaprepitant. Participants 2 to <12 years old were administered a weight-adjusted dose of 1.2 mg/kg (not to exceed 60 mg). Participants were also administered IV ondansetron 0.15 mg/kg x 3 doses with or without dexamethasone.

Reporting group title	Fosaprepitant 5 mg/kg-Cycle 1
-----------------------	-------------------------------

Reporting group description:

Participants were administered IV fosaprepitant at the following weight-adjusted doses: Participants 4 months to <12 years old were administered 5 mg/kg (not to exceed 150 mg), Participants 1 to <4 months old were administered 2.5 mg/kg; Participants 0 to <1 month old were administered 1.25 mg/kg. Participants were also administered IV ondansetron (0.15 mg/kg x 3 doses for children 6 months to 17 years of age or per local standard of care for children <6 months of age), with or without dexamethasone.

Reporting group title	Placebo Control-Cycle 1
-----------------------	-------------------------

Reporting group description:

Participants were administered IV normal saline at volume to match age and weight specific doses of fosaprepitant. Participants were also administered IV ondansetron (0.15 mg/kg x 3 doses for children 6 months to 17 years of age or per local standard of care for children <6 months of age), with or without dexamethasone.

Reporting group title	Fosaprepitant 3 mg/kg-Cycles 2-6
-----------------------	----------------------------------

Reporting group description:

For optional Cycles 2-6, participants from Cycle 1 fosaprepitant arms (3, 1.2, or 0.4 mg/kg) or Cycle 1 Control arm were administered fosaprepitant 3 mg/kg IV (or age-adjusted equivalent). For Cycle 2, fosaprepitant was administered IV plus ondansetron with or without dexamethasone. For Cycles 3-6, fosaprepitant was administered IV plus a 5-HT3 antagonist with or without dexamethasone. Analysis was in the All Patients as Treated Population that included all randomized participants who received at least one dose of study treatment.

Reporting group title	Fosaprepitant 5 mg/kg-Cycles 2-6
-----------------------	----------------------------------

Reporting group description:

For optional Cycles 2-6, participants from the 5 mg/kg fosaprepitant arm in Cycle 1 were administered fosaprepitant 5 mg/kg IV (or age-adjusted equivalent). For Cycle 2, fosaprepitant was administered IV

plus ondansetron with or without dexamethasone. For Cycles 3-6, fosaprepitant was administered IV plus a 5-hydroxytryptamine 3 (5-HT3) antagonist with or without dexamethasone. Participants 1 year or less were required to receive ondansetron in all cycles as the 5-HT3 antagonist. Analysis was in the All Patients as Treated Population that included all randomized participants who received at least one dose of study treatment.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
06 August 2012	Amendment 01: Revised the study phase from 4 to IIb and added additional ondansetron administration guidance.
19 December 2014	Amendment 04: Added an open-label, single-treatment arm, added collection of an optional PK sample approximately 48 hours after completion of fosaprepitant administration, opened enrollment in the birth to <2 years old cohort, and implemented Dexamethasone PK Sampling in participants birth to 1 year old.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? Yes

Date	Interruption	Restart date
19 May 2014	Enrollment put on hold to allow for authoring of and implementation of Amendment 04.	04 February 2015

Notes:

Limitations and caveats

None reported
