

Clinical trial results:

Translational therapy in patients with Osteogenesis imperfecta - a pilot trial on treatment with the RANKL-antibody Denosumab

Summary

EudraCT number	2012-002887-29
Trial protocol	DE
Global end of trial date	26 January 2015

Results information

Result version number	v1 (current)
This version publication date	06 January 2021
First version publication date	06 January 2021
Summary attachment (see zip file)	OI-AK_summary (OI-AK_Ergebnisbericht_EUCTR.pdf)

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	26 January 2015
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	26 January 2015
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

Pilot study to assess the safety and efficacy of a therapy with the RANKL-antibody Denosumab in children 5-10 years of age with mutation in COL1A1 or COL1A2 leading to a defect in collagen production (Osteogenesis imperfecta). Efficacy will be assessed by DXA measurements at the lumbar spine (BMD).

Protection of trial subjects:

The trial was conducted according to Good Clinical Practice guidelines, the applicable local laws, and in accordance with the ethical principles that have their origins in the Declaration of Helsinki.

The competent authorities approved the trial as required by national regulations.

Regulatory authorities were notified of the trial and amendments as required by national regulations.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	01 January 2013
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Germany: 10
Worldwide total number of subjects	10
EEA total number of subjects	10

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	10
Adolescents (12-17 years)	0
Adults (18-64 years)	0
From 65 to 84 years	0

85 years and over	0
-------------------	---

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

11 patients were screened into the trial (The screening period was defined as week -12 until week 0 (baseline). Patients who met all in- and exclusion criteria were enrolled (n=10) and received the investigational medicinal product

Period 1

Period 1 title	Overall trial (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Arm title	Denosumab
Arm description: -	
Arm type	Experimental
Investigational medicinal product name	Denosumab
Investigational medicinal product code	
Other name	Prolia
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

1mg/kg body weight in 3-monthly intervals

Number of subjects in period 1	Denosumab
Started	10
Completed	10

Baseline characteristics

Reporting groups

Reporting group title	Overall trial
Reporting group description: -	

Reporting group values	Overall trial	Total	
Number of subjects	10	10	
Age categorical			
Units: Subjects			

Age continuous			
Units: years			
arithmetic mean	7		
full range (min-max)	5.02 to 10.96	-	
Gender categorical			
Units: Subjects
