

Clinical trial results:

A 24-Week, Worldwide, Multicenter, Double-Blind, Randomized, Parallel, Placebo-Controlled Study to Assess the Efficacy and Tolerability of Anacetrapib When Added to Ongoing Statin Therapy With or Without Other Lipid Modifying Medication(s) in Patients with Hypercholesterolemia or Low HDL-C

Due to the EudraCT – Results system being out of service between 31 July 2015 and 12 January 2016, these results have been published in compliance with revised timelines.

Summary

EudraCT number	2012-003110-14
Trial protocol	NL GB DE HU ES SK BG RO
Global end of trial date	29 October 2014

Results information

Result version number	v1 (current)
This version publication date	26 February 2016
First version publication date	26 February 2016

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	29 October 2014
Is this the analysis of the primary completion data?	Yes
Primary completion date	29 October 2014
Global end of trial reached?	Yes
Global end of trial date	29 October 2014
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

This study will evaluate the effects of 2 different dose levels of anacetrapib on low-density lipoprotein cholesterol (LDL-C) and high-density lipoprotein cholesterol (HDL-C) in participants with hypercholesterolemia when added to an existing statin-modifying therapy.

Protection of trial subjects:

This study was conducted in conformance with Good Clinical Practice standards and applicable country and/or local statutes and regulations regarding ethical committee review, informed consent, and the protection of human subjects participating in biomedical research.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	06 November 2012
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Bulgaria: 22
Country: Number of subjects enrolled	Canada: 16
Country: Number of subjects enrolled	Germany: 17
Country: Number of subjects enrolled	Spain: 15
Country: Number of subjects enrolled	United Kingdom: 24
Country: Number of subjects enrolled	Hungary: 32
Country: Number of subjects enrolled	Israel: 38
Country: Number of subjects enrolled	Netherlands: 28
Country: Number of subjects enrolled	Poland: 19
Country: Number of subjects enrolled	Puerto Rico: 20
Country: Number of subjects enrolled	Romania: 26
Country: Number of subjects enrolled	Slovakia: 47
Country: Number of subjects enrolled	United States: 155
Worldwide total number of subjects	459
EEA total number of subjects	230

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	289
From 65 to 84 years	170
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Participants were to complete a 2-week placebo run-in, a 24-week treatment period, and a 12-week safety follow-up.

Pre-assignment

Screening details:

Adult participants, with hypercholesterolemia or low HDL-C who had been treated with an appropriate statin dose with or without other lipid-modifying therapy (LMT) for at least 6 weeks and had not met their LDL-C goal. Additionally, participants on statin with or without other LMT with low HDL-C and LDL-C at goal were eligible to participate.

Period 1

Period 1 title	Treatment Period
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Arms

Are arms mutually exclusive?	Yes
Arm title	Anacetrapib 25 mg

Arm description:

One tablet of anacetrapib 25 mg and one tablet of placebo taken once daily with a meal for 24 weeks

Arm type	Experimental
Investigational medicinal product name	Anacetrapib
Investigational medicinal product code	
Other name	MK-0859
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

One tablet once daily with a meal for 24 weeks

Investigational medicinal product name	Placebo to match anacetrapib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

One or two placebo tablets once daily for 24 weeks

Arm title	Anacetrapib 100 mg
------------------	--------------------

Arm description:

One tablet of anacetrapib 100 mg and one tablet of placebo taken once daily with a meal for 24 weeks

Arm type	Experimental
Investigational medicinal product name	Anacetrapib
Investigational medicinal product code	
Other name	MK-0859
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

One tablet once daily with a meal for 24 weeks

Investigational medicinal product name	Placebo to match anacetrapib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

One or two placebo tablets once daily for 24 weeks

Arm title	Placebo
------------------	---------

Arm description:

Two matching placebo tablets once daily with a meal for 24 weeks

Arm type	Placebo
Investigational medicinal product name	Placebo to match anacetrapib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

One or two placebo tablets once daily for 24 weeks

Number of subjects in period 1	Anacetrapib 25 mg	Anacetrapib 100 mg	Placebo
Started	152	153	154
Completed	136	140	140
Not completed	16	13	14
Adverse event, serious fatal	1	-	-
Consent withdrawn by subject	7	7	3
Physician decision	-	-	1
Adverse event, non-fatal	5	4	9
Non-compliance with study drug	-	-	1
Lost to follow-up	-	1	-
Protocol deviation	3	1	-

Period 2

Period 2 title	Follow-up
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

Arm title	Anacetrapib 25 mg-Follow up
Arm description: Participants who completed treatment period and participants who were discontinued during treatment period (non-completers) who were administered anacetrapib 25 mg in treatment period and entered Follow-up period. No study drug was administered during Follow-up Period.	
Arm type	No intervention
No investigational medicinal product assigned in this arm	
Arm title	Anacetrapib 100 mg-Follow-up
Arm description: Participants who completed treatment period and participants who were discontinued during treatment period (non-completers) who were administered anacetrapib 100 mg in treatment period and entered Follow-up period. No study drug was administered during Follow-up Period.	
Arm type	No intervention
No investigational medicinal product assigned in this arm	
Arm title	Placebo-Follow-up
Arm description: Participants who completed treatment period and participants who were discontinued during treatment period (non-completers) who were administered placebo in treatment period and entered Follow-up period. No study drug was administered during Follow-up Period.	
Arm type	No intervention
No investigational medicinal product assigned in this arm	

Number of subjects in period 2	Anacetrapib 25 mg-Follow up	Anacetrapib 100 mg-Follow-up	Placebo-Follow-up
Started	136	140	140
Completed	144	148	152

Statistical analysis title	Difference in Least Squares Mean Change
Statistical analysis description:	
Between group comparison of percentage change from baseline performed using Constrained Longitudinal Data Analysis (cLDA) model with terms for treatment, time, and the interaction of time by treatment. Analysis population defined as participants who received at least 1 dose of study treatment and had baseline and at least 1 post-randomization observation for the analysis endpoint.	
Comparison groups	Anacetrapib 100 mg- Efficacy Population v Placebo - Efficacy Population
Number of subjects included in analysis	273
Analysis specification	Pre-specified
Analysis type	superiority
P-value	< 0.001
Method	Constrained Longitudinal Data Analysis
Parameter estimate	Difference in Least Squares Means
Point estimate	-18.8
Confidence interval	
level	95 %
sides	2-sided
lower limit	-24
upper limit	-13.7

Reporting groups

Reporting group title	Anacetrapib 25 mg
-----------------------	-------------------

Reporting group description:

Participants who received at least 1 dose of Anacetrapib 25 mg

Reporting group title	Placebo
-----------------------	---------

Reporting group description:

Participants who received at least 1 dose of placebo.

Reporting group title	Anacetrapib 100 mg
-----------------------	--------------------

Reporting group description:

Participants who received at least 1 dose of Anacetrapib 100 mg

Notes:

[1] - There are no non-serious adverse events recorded for these results. It is expected that there will be at least one non-serious adverse event reported.

Justification: None of the reported non-serious adverse events exceeded the 5% cut-off in any of the treatment arms.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
14 January 2013	Provided new data on the pharmacokinetic properties of anacetrapib and related changes to eligibility criteria and study procedures. Most notably, removed women of child-bearing potential from Inclusion Criteria and removed Inclusion Criteria regarding pregnancy and breast-feeding.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
