

Clinical trial results:

An Open-Label, Extension (Rollover) Study of Vemurafenib in Patients With BRAF V600 Mutation-Positive Malignancies Previously Enrolled in an Antecedent Vemurafenib Protocol

Summary

EudraCT number	2012-003144-80
Trial protocol	GB BE HU DE GR NL ES FI PT IT HR FR CY
Global end of trial date	17 February 2020

Results information

Result version number	v1 (current)
This version publication date	12 November 2020
First version publication date	12 November 2020

Trial information

Trial identification

Sponsor protocol code	GO28399
-----------------------	---------

Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT01739764
WHO universal trial number (UTN)	-

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	17 February 2020
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	17 February 2020
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To assess the long-term safety of Vemurafenib

Protection of trial subjects:

All study subjects were required to read and sign an Informed Consent Form.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	19 February 2013
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Bosnia and Herzegovina: 3
Country: Number of subjects enrolled	Belarus: 2
Country: Number of subjects enrolled	Brazil: 1
Country: Number of subjects enrolled	Canada: 1
Country: Number of subjects enrolled	Cyprus: 3
Country: Number of subjects enrolled	Germany: 7
Country: Number of subjects enrolled	Egypt: 12
Country: Number of subjects enrolled	Spain: 22
Country: Number of subjects enrolled	France: 3
Country: Number of subjects enrolled	United Kingdom: 6
Country: Number of subjects enrolled	Greece: 1
Country: Number of subjects enrolled	Croatia: 5
Country: Number of subjects enrolled	Hungary: 14
Country: Number of subjects enrolled	Israel: 9
Country: Number of subjects enrolled	Italy: 4
Country: Number of subjects enrolled	Korea, Republic of: 41
Country: Number of subjects enrolled	Netherlands: 1
Country: Number of subjects enrolled	New Zealand: 2
Country: Number of subjects enrolled	Portugal: 2
Country: Number of subjects enrolled	Romania: 4
Country: Number of subjects enrolled	Russian Federation: 22
Country: Number of subjects enrolled	Serbia: 8

Country: Number of subjects enrolled	United States: 37
Country: Number of subjects enrolled	South Africa: 5
Worldwide total number of subjects	215
EEA total number of subjects	72

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	162
From 65 to 84 years	51
85 years and over	2

Subject disposition

Recruitment

Recruitment details:

The study was conducted at 82 centers in 24 countries.

Pre-assignment

Screening details:

215 subjects were enrolled into this OLE study and were included in the Safety population.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

Arm title	Vemurafenib 480mg BID
------------------	-----------------------

Arm description:

Subjects received oral vemurafenib at 480 mg BID, depending on the last dose in the antecedent protocol until progression of disease or as long as the subject is deriving clinical benefit, as judged by the investigator, death, withdrawal of consent, unacceptable toxicity, loss to follow-up, or decision of the sponsor to terminate the study, whichever occurs first.

Arm type	Experimental
Investigational medicinal product name	Vemurafenib
Investigational medicinal product code	
Other name	Zelboraf
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Vemurafenib was administered orally twice daily (BID) at a dose of 480mg.

Arm title	Vemurafenib 720mg BID
------------------	-----------------------

Arm description:

Subjects received oral vemurafenib at 720 mg BID, depending on the last dose in the antecedent protocol until progression of disease or as long as the subject is deriving clinical benefit, as judged by the investigator, death, withdrawal of consent, unacceptable toxicity, loss to follow-up, or decision of the sponsor to terminate the study, whichever occurs first.

Arm type	Experimental
Investigational medicinal product name	Vemurafenib
Investigational medicinal product code	
Other name	Zelboraf
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Vemurafenib was administered orally twice daily (BID) at a dose of 720mg.

Arm title	Vemurafenib 960mg BID
------------------	-----------------------

Arm description:

Subjects received oral vemurafenib at 960 mg BID, depending on the last dose in the antecedent protocol until progression of disease or as long as the subject is deriving clinical benefit, as judged by the investigator, death, withdrawal of consent, unacceptable toxicity, loss to follow-up, or decision of the sponsor to terminate the study, whichever occurs first.

Arm type	Experimental
----------	--------------

Investigational medicinal product name	Vemurafenib
Investigational medicinal product code	
Other name	Zelboraf
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Vemurafenib was administered orally twice daily (BID) at a dose of 960mg.

Number of subjects in period 1	Vemurafenib 480mg BID	Vemurafenib 720mg BID	Vemurafenib 960mg BID

Reporting group title	Vemurafenib 960mg BID
-----------------------	-----------------------

Reporting group description:

Subjects received oral vemurafenib at 960 mg BID, depending on the last dose in the antecedent protocol until progression of disease or as long as the subject is deriving clinical benefit, as judged by the investigator, death, withdrawal of consent, unacceptable toxicity, loss to follow-up, or decision of the sponsor to terminate the study, whichever occurs first.

Primary: Dose Intensity of Vemurafenib

End point title	Dose Intensity of Vemurafenib ^[1]
-----------------	--

End point description:

Dose Intensity was defined as (total actual doses taken/total planned doses) *100, where total planned doses = prescribed doses * planned days on treatment, where planned days on treatment were defined as the interval between date of first dose and date of last dose. Please note that for this Outcome Measure, one subject who received 960 mg BID of Vemurafenib had no treatment end date indicated and was excluded from the calculation of study treatment exposure summaries.

End point type	Primary
----------------	---------

End point timeframe:

Baseline up to a maximum of 7 years.

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: No statistical analyses were performed, as no efficacy analysis was conducted and only safety data was collected.

End point values	Vemurafenib 480mg BID	Vemurafenib 720mg BID	Vemurafenib 960mg BID

arithmetic mean (standard deviation)	95.3 (± 8.1)	92.9 (± 12.1)	94.5 (± 11.0)	

Statistical analyses

No statistical analyses for this end point

Secondary: Percentage of Subjects With Adverse Events (AEs) or Serious Adverse

Events (SAEs)

End point title	Percentage of Subjects With Adverse Events (AEs) or Serious Adverse Events (SAEs)
-----------------	---

End point description:

An Adverse Event (AE) is any untoward medical occurrence in a participant administered a pharmaceutical product and which does not necessarily have to have a causal relationship with the treatment. An Adverse Event can therefore be any unfavorable and unintended sign (including abnormal laboratory values or abnormal clinical test results), symptom, or disease temporally associated with the use of a pharmaceutical product, whether or not considered related to the pharmaceutical product. Preexisting conditions which worsen during a study are also considered as Adverse Events. Reported are the Percentage of Subjects with AEs and Serious Adverse Events (SAEs).

End point type	Secondary
----------------	-----------

End point timeframe:

Baseline up to 28 days after the last dose of study drug (up to a maximum of 7 years).

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
25 September 2013	Following updates were made: [1] Safety Information for Vemurafenib updated to include three newly identified adverse drug reactions in subjects treated with Vemurafenib; [2] Updates to Study Title, Medical Monitor contact information, references to Urinalysis removed; [3] Clarification of timing for prohibited therapy prior to study entry; [4] Clarification to personnel who can perform dermatological examinations and [5] Updating of language around serious adverse events and adverse events of special interest.
21 March 2014	Following updates were made: [1] Updating of Safety Information for Vemurafenib; [2] Modification of oral Vemurafenib dose to include 960 mg, 720 mg and 480 mg twice daily; [3] Deletion of anticoagulation therapy and antiplatelet agents from the list of prohibited medications; [4] Addition of instructions on the collection of electrocardiograms; [5] Changes to the permitted windows of time for the screening assessments; [6] Modification to the Schedule of Assessments and [7] Change to allow for a one-year safety follow-up visit for subjects with papillary thyroid cancer.
13 March 2015	Following update was made: [1] New safety information for subjects being treated with Vemurafenib for pancreatitis and for potentiation of radiation treatment toxicity and the reporting of a second case of progression of a preexisting RAS-mutated malignancy (pancreatic adenocarcinoma with KRAS mutation).
28 August 2018	Following updates were made: [1] Removal of Safety follow-up visits at 3 and 6 months; [2] Updating of End of study safety follow up and dermatological evaluations; [3] Updating of Follow-up for new primary malignancies; [4] Addition of new Safety information; [5] Clarification to Adverse Event reporting and [6] Clarification to language on partner pregnancies.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
