Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	12 May 2016
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	14 December 2015
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The primary objectives of this study are to assess the safety and the efficacy of 2 doses of once daily EVP-6124 tablets (1 and 2 mg) as an adjunctive pro-cognitive treatment, versus placebo, when added to chronic, stable, atypical antipsychotic therapy in subjects with schizophrenia. Safety will be determined by clinical and laboratory safety assessments. Efficacy will be determined by cognitive function as measured by the Measurement and Treatment Research to Improve Cognition in Schizophrenia (MATRICS™) Consensus Cognitive Battery (MCCB™) Neurocognitive Composite Score, and by clinical function as measured by the interview-based Schizophrenia Cognition Rating Scale (SCoRS).

Protection of trial subjects:

Measures to minimize pain and discomfort secondary to phlebotomy were used on an as-needed basis. As there were no other invasive measures in this study, additional interventions were not needed.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	31 December 2012
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Poland: 19
Country: Number of subjects enrolled	United Kingdom: 10
Country: Number of subjects enrolled	Italy: 21
Country: Number of subjects enrolled	Argentina: 26
Country: Number of subjects enrolled	Australia: 3
Country: Number of subjects enrolled	Colombia: 51
Country: Number of subjects enrolled	Mexico: 19
Country: Number of subjects enrolled	Romania: 43
Country: Number of subjects enrolled	Russian Federation: 73
Country: Number of subjects enrolled	Ukraine: 147
Country: Number of subjects enrolled	United States: 354
Worldwide total number of subjects	766
EEA total number of subjects	93

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	766
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

Subjects will be screened for eligibility within 28 days of entry into the single-blind placebo Run-in Period. On Day -14 subjects will be dispensed a 32-day supply of single-blind, placebo study medication.

Pre-assignment period milestones

Number of subjects started	1146 ^[1]
Intermediate milestone: Number of subjects	Entered Run-In: 818
Number of subjects completed	766

Pre-assignment subject non-completion reasons

Reason: Number of subjects	Screen Fails Prior to Run-In: 329
Reason: Number of subjects	Withdrawn Prior to Randomization: 51

Notes:

[1] - The number of subjects reported to have started the pre-assignment period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: The worldwide number corresponds to the number of patients randomized (766) and not to the number of patients screened (1146).

Period 1

Period 1 title	Double-blind period (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

Arm title	EVP-6124, 1 mg
------------------	----------------

Arm description:

Eligible subjects will be randomized in a 1:1:1 allocation to 1 of 3 double-blind treatment groups: once daily EVP-6124 tablets (1 or 2 mg) or placebo for 26 weeks (Days 1 to 182).

Arm type	Experimental
Investigational medicinal product name	Encenicline
Investigational medicinal product code	EVP-6124
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Subjects will be instructed to take 1 tablet of study medication once daily at the same time each day, preferably between 8 to 10 AM, with or without food, and with an adequate amount of water.

Arm title	EVP-6124, 2 mg
------------------	----------------

Arm description:

Eligible subjects will be randomized in a 1:1:1 allocation to 1 of 3 double-blind treatment groups: once daily EVP-6124 tablets (1 or 2 mg) or placebo for 26 weeks (Days 1 to 182).
