Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	12 March 2014
Is this the analysis of the primary completion data?	Yes
Primary completion date	12 March 2014
Global end of trial reached?	Yes
Global end of trial date	12 March 2014
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

1) To evaluate the efficacy of each treatment arm of grazoprevir (MK-5172) in combination with ribavirin (RBV) for 12 or 24 weeks as assessed by the percentage of participants achieving SVR12 (Sustained Virologic Response 12 weeks after the end of all study therapy), defined as hepatitis C virus (HCV) ribonucleic acid (RNA) <25 IU/mL (either "target detectable but unquantifiable" [TD(u)] or "target not detected" [TND]) 12 weeks after the end of all study therapy. 2) To evaluate the safety and tolerability of grazoprevir in combination with RBV.

Protection of trial subjects:

This study was conducted in conformance with Good Clinical Practice standards and applicable country and/or local statutes and regulations regarding ethical committee review, informed consent, and the protection of human subjects participating in biomedical research. The following additional measure defined for this individual study was in place for the protection of trial subjects: Peg-IFN (1.5 µg/kg/wk) + RBV (weight-based) was offered as rescue therapy to any participant who met the criteria for virologic failure and futility or discontinued study medications due to safety concerns that were not attributed to RBV. Participants had to start on rescue within 4 months from the time of discontinuing therapy or within 4 months of follow-up week 24 in case of relapse, if indicated.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	18 January 2013
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Australia: 6
Country: Number of subjects enrolled	Israel: 18
Country: Number of subjects enrolled	New Zealand: 2
Worldwide total number of subjects	26
EEA total number of subjects	0

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0

Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	25
From 65 to 84 years	1
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

A total of 26 treatment-naïve, non-cirrhotic, adult participants with HCV genotype 1 were recruited in Australia, Israel, and New Zealand.

Pre-assignment

Screening details:

Participants received grazoprevir + RBV for either 12 weeks or 24 weeks (participants in the 12-week arm with detectable HCV RNA at Treatment Week [TW] 4 received 12 additional weeks of study treatment). The allocation of participants to the 2 arms was stratified according to HCV GT1a vs. GT1b infection.

Period 1

Period 1 title	Treatment (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

Blinding implementation details:

This was an open-label study.

Arms

Are arms mutually exclusive?	Yes
Arm title	Grazoprevir 100 mg + RBV 12 Weeks

Arm description:

Grazoprevir 100 mg tablet once per day by mouth, and RBV capsules twice per day at a total daily dose from 800 to 1400 mg based on participant body weight, for 12 weeks.

Arm type	Experimental
Investigational medicinal product name	Ribavirin
Investigational medicinal product code	
Other name	Rebetol™
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

RBV 200 mg capsules twice daily by mouth at a total daily dose of 800 mg/day to 1400 mg/day based on participant body weight on Day 1.

Investigational medicinal product name	Grazoprevir
Investigational medicinal product code	
Other name	MK-5172
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Grazoprevir 100 mg tablet once daily by mouth for 12 or 24 weeks.

Arm title	Grazoprevir 100 mg + RBV 12 Weeks Extended
------------------	--

Arm description:

Grazoprevir 100 mg tablet once per day by mouth, and RBV capsules twice per day at a total daily dose from 800 to 1400 mg based on participant body weight, for 12 weeks. Participants with detectable HCV RNA at TW4 received an additional 12 weeks of study therapy for a total of 24 week of treatment.

Arm type	Experimental
----------	--------------

Investigational medicinal product name	Grazoprevir

Subject analysis set title	Grazoprevir 100 mg + RBV: HCV GT1a
Subject analysis set type	Sub-group analysis
Subject analysis set description: This group consisted of all participants with HCV GT1a infection pooled across treatment arms.	
Subject analysis set title	Grazoprevir 100 mg + RBV: HCV GT1non-a
Subject analysis set type	Sub-group analysis
Subject analysis set description: This group consisted of all participants with HCV GT1non-a infection, pooled across treatment arms.	
Subject analysis set title	Grazoprevir 100 mg + RBV: Up to 12 Weeks
Subject analysis set type	Safety analysis
Subject analysis set description: The All Patients as Treated (APaT) population included all randomized participants who received at least 1 dose of study therapy. The 12-week group consists of participants in the APaT who only received 12 weeks of treatment and not those originally assigned to 12 weeks that went on to receive 24 total weeks of treatment.	
Subject analysis set title	Grazoprevir 100 mg + RBV: Beyond 12 Weeks
Subject analysis set type	Safety analysis
Subject analysis set description: The APaT population included all randomized participants who received at least 1 dose of study therapy. The 24-week group consists of participants in the APaT who received 24 total weeks of treatment, regardless of original treatment regimen assignment.	

Primary: Percentage of participants with undetectable HCV ribonucleic acid (RNA) 12 weeks after completing study therapy (SVR12)

End point title	Percentage of participants with undetectable HCV ribonucleic acid (RNA) 12 weeks after completing study therapy (SVR12) ^[1]
End point description: HCV RNA was measured using the Roche COBAS™ Taqman™ HCV Test, v2.0® assay, which has a lower limit of quantification of 25 IU/mL and a limit of detection of 9.3 IU/mL. SVR12 was defined as Hepatitis C Virus (HCV) ribonucleic acid (RNA) <25 IU/mL 12 weeks after the end of all study therapy.	
End point type	Primary
End point timeframe: Up to 36 weeks	

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Per protocol, only descriptive statistics are presented.

End point values	Grazoprevir 100 mg + RBV 12 Weeks	Grazoprevir 100 mg + RBV 12 Weeks Extended	Grazoprevir 100 mg + RBV 24 Weeks	
Subject group type	Reporting group	Reporting group	Reporting group

Units: percentage of participants				
number (confidence interval 95%)	62.5 (24.5 to 91.5)	50 (6.8 to 93.2)	90 (55.5 to 99.7)	

Notes:

[2] - All randomized participants receiving ≥ 1 dose of study therapy and no important protocol deviations.

[3] - All randomized participants receiving ≥ 1 dose of study therapy and no important protocol deviations.

[4] - All randomized participants receiving ≥ 1 dose of study therapy and no important protocol deviations.

Statistical analyses

No statistical analyses for this end point

Primary: Percentage of participants experiencing an adverse event (AE)

End point title	Percentage of participants experiencing an adverse event
-----------------	--

End point description:

An adverse event is defined as any untoward medical occurrence in a patient or clinical investigation subject administered a pharmaceutical product and which does not necessarily have to have a causal relationship with this treatment. An adverse event can therefore be any unfavourable and unintended sign (including an abnormal laboratory finding, for example), symptom, or disease temporally associated with the use of a medicinal product or protocol-specified procedure, whether or not considered related to the medicinal product or protocol-specified procedure. Any worsening (i.e., any clinically significant adverse change in frequency and/or intensity) of a preexisting condition that is temporally associated with the use of the Sponsor's product, is also an adverse event. Data are presented according to actual treatment duration (12 weeks or 24 weeks) regardless of participants' initial arm assignment.

End point type	Primary
----------------	---------

End point timeframe:

Up to 14 days following last dose of study drug (up to 26 weeks).

Notes:

[5] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Per protocol, only descriptive statistics are presented.

subjects affected / exposed	4 / 15 (26.67%)	4 / 11 (36.36%)	
occurrences (all)	6	10	
Dizziness			
subjects affected / exposed	0 / 15 (0.00%)	1 / 11 (9.09%)	
occurrences (all)	0	1	
Blood and lymphatic system disorders			
Anaemia			
subjects affected / exposed	1 / 15 (6.67%)	2 / 11 (18.18%)	
occurrences (all)	1	2	
Ear and labyrinth disorders			

Ear pain subjects affected / exposed occurrences (all)	1 / 15 (6.67%) 1	1 / 11 (9.09%) 1	
Eye disorders Eye inflammation subjects affected / exposed occurrences (all)	0 / 15 (0.00%) 0	1 / 11 (9.09%) 1	
Gastrointestinal disorders Abdominal pain subjects affected / exposed occurrences (all)	1 / 15 (6.67%) 1	1 / 11 (9.09%) 1	
Abdominal pain lower subjects affected / exposed occurrences (all)	2 / 15 (13.33%) 2	0 / 11 (0.00%) 0	
Abdominal pain upper subjects affected / exposed occurrences (all)	0 / 15 (0.00%) 0	1 / 11 (9.09%) 1	
Constipation subjects affected / exposed occurrences (all)	1 / 15 (6.67%) 1	0 / 11 (0.00%) 0	
Dry mouth subjects affected / exposed occurrences (all)	1 / 15 (6.67%) 1	1 / 11 (9.09%) 1	
Dyspepsia subjects affected / exposed occurrences (all)	2 / 15 (13.33%) 4	2 / 11 (18.18%) 3	
Frequent bowel movements subjects affected / exposed occurrences (all)	1 / 15 (6.67%) 1	0 / 11 (0.00%) 0	
Gastritis subjects affected / exposed occurrences (all)	0 / 15 (0.00%) 0	1 / 11 (9.09%) 1	
Diarrhoea subjects affected / exposed occurrences (all)	1 / 15 (6.67%) 1	1 / 11 (9.09%) 1	
Paraesthesia oral			

subjects affected / exposed	1 / 15 (6.67%)	0 / 11 (0.00%)	
occurrences (all)	1	0	
Flatulence			
subjects affected / exposed	1 / 15 (6.67%)	0 / 11 (0.00%)	
occurrences (all)	1	0	
Lip dry			
subjects affected / exposed	0 / 15 (0.00%)	1 / 11 (9.09%)	
occurrences (all)	0	1	
Gastrooesophageal reflux disease			
subjects affected / exposed	1 / 15 (6.67%)	0 / 11 (0.00%)	
occurrences (all)	1	0	
Vomiting			
subjects affected / exposed	0 / 15 (0.00%)	1 / 11 (9.09%)	
occurrences (all)	0	1	
Nausea			
subjects affected / exposed	1 / 15 (6.67%)	2 / 11 (18.18%)	
occurrences (all)	3	2	
Skin and subcutaneous tissue disorders			
Alopecia			
subjects affected / exposed	1 / 15 (6.67%)	0 / 11 (0.00%)	
occurrences (all)	1	0	
Dry skin			
subjects affected / exposed	0 / 15 (0.00%)	1 / 11 (9.09%)	
occurrences (all)	0	1	
Rash			
subjects affected / exposed	1 / 15 (6.67%)	1 / 11 (9.09%)	
occurrences (all)	1	1	
Pruritus			
subjects affected / exposed	1 / 15 (6.67%)	1 / 11 (9.09%)	
occurrences (all)	1	1	
Hyperhidrosis			
subjects affected / exposed	1 / 15 (6.67%)	0 / 11 (0.00%)	
occurrences (all)	1	0	
Renal and urinary disorders			
Haematuria			

subjects affected / exposed occurrences (all)	0 / 15 (0.00%) 0	1 / 11 (9.09%) 1	
Musculoskeletal and connective tissue disorders			
Arthralgia			
subjects affected / exposed	1 / 15 (6.67%)	0 / 11 (0.00%)	
occurrences (all)	1	0	
Muscle spasms			
subjects affected / exposed	3 / 15 (20.00%)	0 / 11 (0.00%)	
occurrences (all)	4	0	
Back pain			
subjects affected / exposed	1 / 15 (6.67%)	1 / 11 (9.09%)	
occurrences (all)	1	2	
Pain in extremity			
subjects affected / exposed	1 / 15 (6.67%)	0 / 11 (0.00%)	
occurrences (all)	1	0	
Musculoskeletal pain			
subjects affected / exposed	1 / 15 (6.67%)	0 / 11 (0.00%)	
occurrences (all)	1	0	
Myalgia			
subjects affected / exposed	1 / 15 (6.67%)	0 / 11 (0.00%)	
occurrences (all)	1	0	
Neck pain			
subjects affected / exposed	0 / 15 (0.00%)	1 / 11 (9.09%)	
occurrences (all)	0	1	
Pain in jaw			
subjects affected / exposed	1 / 15 (6.67%)	0 / 11 (0.00%)	
occurrences (all)	1	0	
Infections and infestations			
Gastroenteritis			
subjects affected / exposed	1 / 15 (6.67%)	0 / 11 (0.00%)	
occurrences (all)	1	0	
Upper respiratory tract infection			
subjects affected / exposed	1 / 15 (6.67%)	1 / 11 (9.09%)	
occurrences (all)	1	1	
Rhinitis			

subjects affected / exposed occurrences (all)	0 / 15 (0.00%) 0	1 / 11 (9.09%) 1	
Metabolism and nutrition disorders Decreased appetite subjects affected / exposed occurrences (all)	0 / 15 (0.00%) 0	1 / 11 (9.09%) 1	

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? No

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
