

Clinical trial results:

Clinical non-inferiority study between Daflon® 1000 mg, one oral suspension in a sachet per day and Daflon 500® mg, 2 tablets daily after eight weeks of treatment in patients suffering from symptomatic Chronic Venous Disease (CVD). International, multicenter, double-blind, randomized, parallel group study.

Due to the EudraCT – Results system being out of service between 31 July 2015 and 12 January 2016, these results have been published in compliance with revised timelines.

Summary

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	15 December 2014
Is this the analysis of the primary completion data?	Yes
Primary completion date	15 December 2014
Global end of trial reached?	Yes
Global end of trial date	15 December 2014
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To demonstrate the clinical non inferiority of efficacy between Daflon® 1000 mg (1 sachet per day) and Daflon® 500 mg (2 tablets per day), in improving lower limb discomfort assessed by a 10 cm visual analogue scale (VAS) after eight weeks of treatment in patients suffering from CVD

Protection of trial subjects:

This study was conducted in accordance with Good Clinical Practice standards, ethical principles stated in the Declaration of Helsinki and applicable regulatory requirements. After the subject has ended his/her participation in the trial, the investigator provided appropriate medication and/or arranged access to appropriate care for the patient.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	22 July 2013
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Argentina: 146
Country: Number of subjects enrolled	Brazil: 65
Country: Number of subjects enrolled	Malaysia: 3
Country: Number of subjects enrolled	Mexico: 48
Country: Number of subjects enrolled	Romania: 194
Country: Number of subjects enrolled	Russian Federation: 255
Country: Number of subjects enrolled	Czech Republic: 94
Country: Number of subjects enrolled	Slovakia: 94
Country: Number of subjects enrolled	Slovenia: 53
Country: Number of subjects enrolled	Spain: 67
Country: Number of subjects enrolled	Thailand: 47
Country: Number of subjects enrolled	Turkey: 51
Country: Number of subjects enrolled	Vietnam: 22
Worldwide total number of subjects	1139
EEA total number of subjects	502

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	1050
From 65 to 84 years	89
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

Male or female outpatient aged between 20 and 75 years old (inclusive), suffering from primary chronic venous disease, with lower limb discomfort ≥ 4 cm on the VAS scale and at least leg pain ≥ 3 cm on the VAS scale and belonging to the Clinical Etiological Anatomic Pathophysiologic (CEAP) class C0s to C4s on the most affected leg.

Period 1

Period 1 title	Double-blind treatment period (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Arms

Are arms mutually exclusive?	Yes
Arm title	MPFF sachet 1000 mg o.d.

Arm description: -

Arm type	Experimental
Investigational medicinal product name	MPFF 1000 mg sachet
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Oral suspension in sachet
Routes of administration	Oral use

Dosage and administration details:

One sachet taken daily (in the morning) per os.

Arm title	MPFF tablet 500 mg b.i.d.
------------------	---------------------------

Arm description: -

Arm type	Active comparator
Investigational medicinal product name	MPFF 500 mg tablet
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

2 tablets daily (one at midday and one in the evening) taken per os

Number of subjects in period 1	MPFF sachet 1000 mg o.d.	MPFF tablet 500 mg b.i.d.
Started	571	568
Completed	540	536
Not completed	31	32
Adverse event, non-fatal	6	9
Lost to follow-up	-	1

Non-medical reason	9	8
Lack of efficacy	1	-
Protocol deviation	15	14

End points reporting groups

Reporting group title	MPFF sachet 1000 mg o.d.
Reporting group description: -	
Reporting group title	MPFF tablet 500 mg b.i.d.
Reporting group description: -	
Subject analysis set title	Full Analysis Set
Subject analysis set type	Full analysis
Subject analysis set description:	
All patients of the Randomised Set having taken at least one dose of IMP and having a value at baseline and at least one post-baseline value for the lower limb discomfort assessed by a VAS scale.	

Primary: Lower limb discomfort (VAS)

End point title	Lower limb discomfort (VAS)
End point description:	
On the VAS scale: 0 cm = no discomfort and 10 cm = extreme discomfort	
End point type	Primary
End point timeframe:	
Evaluation at selection, W0, W2, W4 and W8.	
The primary analysis was the change from baseline to last post-baseline value up to W8 visit	

End point values	MPFF sachet 1000 mg o.d.	MPFF tablet 500 mg b.i.d.		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	568	557		
Units: cm				
arithmetic mean (standard deviation)	-3.272 (\pm 2.419)	-3.33 (\pm 2.404)		

Statistical analyses

Statistical analysis title	Non-inferiority analysis
Comparison groups	MPFF sachet 1000 mg o.d. v MPFF tablet 500 mg b.i.d.
Number of subjects included in analysis	1125
Analysis specification	Pre-specified
Analysis type	non-inferiority ^[1]
P-value	< 0.0001
Method	ANCOVA

Notes:

[1] - Non-inferiority limit = 1 cm. One-sided type I error rate = 0.025.

Analysis included the fixed, categorical effects of treatment and centre, as well as the continuous, fixed covariate of baseline.

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Adverse events were reported all over the study.

Assessment type	Systematic

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
25 November 2013	<p>Applicable in all centres and concerned mainly:</p> <ul style="list-style-type: none">- Deletion of urinary proteinuria test; blood biochemistry testing was maintained to ensure detection of abnormality in renal dysfunction.- Reduce to one measurement, instead of three, of sitting blood pressure, considered as reliable enough in blood pressure assessment.- Change to one month before the selection of the patient, the planned period of 3 months without compression and for non-authorized pharmacological treatment.- Deletion of the detailed mention regarding Ankle Brachial Pressure Index for assessment of peripheral arterial occlusive disease.- Clarification of the definition and wording of following non-selection criteria: "on going deep or superficial vein thrombosis" and "Evidence of cancer".- Precision regarding non-compliance (protocol deviation).- Deletion of the question 8a in CIVIQ-20 in accordance with Pr Launois (author of CIVIQ-20). Only the question 8b was taken in account for the questionnaire analysis for the study. Indeed, question 8a was restrictive to car use which was not common in all countries.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
