#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	25 May 2016
Is this the analysis of the primary completion data?	Yes
Primary completion date	07 January 2016
Global end of trial reached?	Yes
Global end of trial date	07 January 2016
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

To assess the non-inferiority of ceftazidime-avibactam (CAZ-AVI) compared to meropenem with respect to clinical cure at the test of cure (TOC) visit (Day 21 - 25 from randomization) in patients in the clinically modified intent-to-treat (cMITT) population and patients in the clinically evaluable (CE) population.

Protection of trial subjects:

The final study protocol, including the final version of the informed consent form and any other written information or materials provided to the patients was approved by an independent ethics committee (EC) and/or institutional review board (IRB). The investigator ensured the distribution of these documents to the applicable EC and to the study center personnel. This study was performed in accordance with the ethical principles that have their origin in the Declaration of Helsinki and that are consistent with International Conference on Harmonisation (ICH) harmonised tripartite guideline E6(R1) Good Clinical Practice (GCP), applicable regulatory requirements, and the AstraZeneca policy on Bioethics and Human Biological Samples.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	13 April 2013
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Brazil: 85
Country: Number of subjects enrolled	Bulgaria: 7
Country: Number of subjects enrolled	China: 274
Country: Number of subjects enrolled	Czech Republic: 95
Country: Number of subjects enrolled	France: 46
Country: Number of subjects enrolled	Hungary: 20
Country: Number of subjects enrolled	India: 78
Country: Number of subjects enrolled	Japan: 21
Country: Number of subjects enrolled	Korea, Republic of: 20
Country: Number of subjects enrolled	Latvia: 1
Country: Number of subjects enrolled	Mexico: 5
Country: Number of subjects enrolled	Peru: 3
Country: Number of subjects enrolled	Philippines: 28
Country: Number of subjects enrolled	Poland: 25
Country: Number of subjects enrolled	Romania: 5

Country: Number of subjects enrolled	Russian Federation: 24
Country: Number of subjects enrolled	South Africa: 1
Country: Number of subjects enrolled	Spain: 9
Country: Number of subjects enrolled	Taiwan: 1
Country: Number of subjects enrolled	Turkey: 3
Country: Number of subjects enrolled	Ukraine: 27
Country: Number of subjects enrolled	United Kingdom: 10
Country: Number of subjects enrolled	Vietnam: 20
Worldwide total number of subjects	808
EEA total number of subjects	218

Notes:

---

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	394
From 65 to 84 years	376
85 years and over	38

## Subject disposition

### Recruitment

Recruitment details:

Overall, 879 patients were randomized, from 4 geographic regions. The first patient was enrolled on 13 Apr. 2013 and the last patient last visit was on 07 Jan. 2016. Summary tables exclude 62 patients with moderate/severe renal impairment recruited prior to a protocol amendment to the dose regimen for such patients. 817 randomized and 808 treated.

### Pre-assignment

Screening details:

After obtaining written informed consent patients underwent a preliminary evaluation for eligibility within the 24-hour period prior to initiation of IV study therapy. Eligible patients were randomized to 1 of 2 treatments in a 1:1 ratio according to the randomization schedule.

### Period 1

Period 1 title	Prior to Study Treatment (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Data analyst

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	CAZ-AVI

Arm description:

2000mg ceftazidime / 500mg avibactam intravenous (IV) infused over 2 hours plus appropriate placebo to meropenem

Arm type	Experimental
Investigational medicinal product name	Ceftazidime-Avibactam
Investigational medicinal product code	CAZ-AVI
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

- 2000mg ceftazidime / 500mg avibactam Intra-Venous (IV) infused over 2 hours plus appropriate placebo to meropenem

<b>Arm title</b>	Meropenem
------------------	-----------

Arm description:

meropenem 1000mg IV infused over 30 minutes plus CAZ-AVI placebo

Arm type	Active comparator
Investigational medicinal product name	Meropenem
Investigational medicinal product code	Meropenem
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

- meropenem 1000mg IV infused over 30 minutes plus CAZ-AVI placebo

<b>Number of subjects in period 1</b>	CAZ-AVI	Meropenem
Started	405	403
Completed	355	363
Not completed	50	40
Adverse event, serious fatal	37	28
Consent withdrawn by subject	8	4
Other Eligibility criteria	2	1
Lost to follow-up	3	7

### **Secondary: The proportion of favorable per-pathogen microbiologic responses in patients with pathogens resistant to ceftazidime at test-of-cure (TOC) visit in extended microbiologically evaluable at TOC analysis set (pathogens in $\geq 5$ patients)**

End point title	The proportion of favorable per-pathogen microbiologic responses in patients with pathogens resistant to ceftazidime at test-of-cure (TOC) visit in extended microbiologically evaluable at TOC analysis set (pathogens in $\geq 5$ patients)
-----------------	---

End point description:

The proportion of patients with a favorable per-pathogen microbiological response: favorable microbiological response includes: Eradication where, source specimen demonstrates absence of the original baseline pathogen. Presumed eradication where, source specimen was not available to culture and the patient was assessed as a clinical cure.

End point type Secondary

End point timeframe:

At the test-of-cure (TOC) visit (Day 21 to 25)

## Statistical analyses

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Nonserious AEs and SAEs were collected for each patient from the time when informed consent was obtained at Screening (Day -1 to 0) through the final protocol follow-up (FPFU) visit.

Adverse event reporting additional description:

AEs spontaneously reported by the patient or care provider or reported in response to the open question from the study center personnel, or revealed by observation were to be collected and recorded in the eCRF. Please note: "The section "total # of deaths resulting from adverse events" is for fatalities that are causally related to the treatment".

Assessment type	Systematic
-----------------	------------

### Dictionary used

Dictionary name	MedDRA
Dictionary version	18.1

### Reporting groups

Reporting group title	Meropenem
-----------------------	-----------

Reporting group description:

meropenem 1000mg IV infused over 30 minutes plus CAZ-AVI placebo. Total # Subjects Affected by Non Serious Adverse Events (with preferred terms meeting frequency threshold)

Reporting group title	CAZ-AVI
-----------------------	---------

Reporting group description:

2000mg ceftazidime / 500mg avibactam intravenous (IV) infused over 2 hours plus appropriate placebo to meropenem. Total # Subjects Affected by Non Serious Adverse Events (with preferred terms meeting frequency threshold)

Serious adverse events	Meropenem	CAZ-AVI

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
25 March 2014	1. Clarification of the visit structure and timing of visit and assessments
29 September 2014	1. Amendment of exclusion criteria with respect to moderate and severe renal impairment with estimated creatinine clearance (CrCl) $\leq 50$ ml/min
09 January 2015	1. Re-introducing the inclusion of patients with renal impairment (creatinine clearance (CrCl) $\leq 50$ ml/min).
25 September 2015	1. Changes to statistical methods and overall sample size of approximately 850 patients

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? Yes

Date	Interruption	Restart date
20 September 2014	There was an interruption to recruitment of moderate or severe renal impairment at baseline patients whilst a new dosing regimen was agreed.	13 January 2015

Notes:

### Limitations and caveats

None reported
