

Clinical trial results:

A randomized, double-blind, placebo-controlled, multi-center study to assess the safety and efficacy of different oral doses of BAY 94-8862 in subjects with type 2 diabetes mellitus and the clinical diagnosis of diabetic nephropathy

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	07 August 2014
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	07 August 2014
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

Primary objective of the study was to investigate the change of urinary albumin-to-creatinine ratio (UACR) after treatment with different oral doses of BAY94-8862 given once daily over 90 days.

Protection of trial subjects:

The conduct of this clinical study met all local legal and regulatory requirements. The study was conducted in accordance with the ethical principles that have their origin in the Declaration of Helsinki and the International Conference on Harmonization guideline E6: Good Clinical Practice. Before entering the study, the informed consent form was read by and explained to all subjects. Participating subjects signed informed consent form and could withdraw from the study at any time without any disadvantage and without having to provide a reason for this decision. Only investigators qualified by training and experience were selected as appropriate experts to investigate the study drug.

Background therapy:

Standard of care for renal and cardiovascular disease (CVD) protection (i.e. according to local guidelines: angiotensin-converting enzyme inhibitor [ACEI] or angiotensin receptor blocker [ARB] and optimal antihypertensive therapy; statins, anti-platelets, and beta-blockers; and glycemic control).

Evidence for comparator: -

Actual start date of recruitment	12 June 2013
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

EEA total number of subjects	569

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	388
From 65 to 84 years	431
85 years and over	4

Subject disposition

Recruitment

Recruitment details:

The study was conducted at 148 study centers in 23 countries, from 12 June 2013 (first subject, first visit) to 07 August 2014 (last subject, last visit). The randomization was stratified by region (Europe, North America, Asia, others [Australia, Israel, and South Africa]), and type of albuminuria at screening (very high or high albuminuria).

Pre-assignment

Screening details:

Of 1501 subjects screened, 823 were randomized and 821 were treated at 128 study centers.

Period 1

Period 1 title	Treatment Period (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Carer, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	Finerenone (BAY94-8862) (1.25 mg)

Arm description:

1.25 milligram (mg) BAY94-8862 tablet once daily in the morning for 90 days.

Arm type	Experimental
Investigational medicinal product name	Finerenone
Investigational medicinal product code	BAY94-8862
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

Immediate-release (IR) light orange film-coated tablets, oval (modified oblong), containing 1.25 mg BAY94-8862, were administered once daily in the morning for 90 days.

Arm title	Finerenone (BAY94-8862) (2.5 mg)
------------------	----------------------------------

Arm description:

2.5 mg BAY94-8862 tablet once daily in the morning for 90 days.

Arm type	Experimental
Investigational medicinal product name	Finerenone
Investigational medicinal product code	BAY94-8862
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

IR light orange film-coated tablets, oval (modified oblong), containing 2.5 mg BAY94-8862, were administered once daily in the morning for 90 days.

Arm title	Finerenone (BAY94-8862) (5 mg)
------------------	--------------------------------

Arm description:

5 mg BAY94-8862 tablet once daily in the morning for 90 days.

Arm type	Experimental
----------	--------------

Investigational medicinal product name	Finerenone
Investigational medicinal product code	BAY94-8862
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use
Dosage and administration details:	
IR light orange film-coated tablets, oval (modified oblong), containing 5 mg BAY94-8862, were administrated once daily in the morning for 90 days.	
Arm title	Finerenone (BAY94-8862) (7.5 mg)
Arm description:	
7.5 mg BAY94-8862 tablet once daily in the morning for 90 days.	
Arm type	Experimental
Investigational medicinal product name	Finerenone
Investigational medicinal product code	BAY 94-8862
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use
Dosage and administration details:	
IR light orange film-coated tablets, oval (modified oblong), containing 7.5 mg BAY94-8862, were administrated once daily in the morning for 90 days.	
Arm title	Finerenone (BAY94-8862) (10 mg)
Arm description:	
10 mg BAY94-8862 tablet once daily in the morning for 90 days.	
Arm type	Experimental
Investigational medicinal product name	Finerenone
Investigational medicinal product code	BAY94-8862
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use
Dosage and administration details:	
IR light orange film-coated tablets, oval (modified oblong), containing 10 mg BAY94-8862, were administrated once daily in the morning for 90 days.	
Arm title	Finerenone (BAY94-8862) (15 mg)
Arm description:	
15 mg BAY94-8862 tablet once daily in the morning for 90 days.	
Arm type	Experimental
Investigational medicinal product name	Finerenone
Investigational medicinal product code	BAY94-8862
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use
Dosage and administration details:	
IR light orange film-coated tablets, oval (modified oblong), containing 15 mg BAY94-8862, were administrated once daily in the morning for 90 days.	
Arm title	Finerenone (BAY94-8862) (20 mg)
Arm description:	
20 mg BAY94-8862 tablet once daily in the morning for 90 days	
Arm type	Experimental

Investigational medicinal product name	Finerenone
Investigational medicinal product code	BAY94-8862
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

IR light orange film-coated tablets, oval (modified oblong), containing 20 mg BAY94-8862, were administrated once daily in the morning for 90 days.

Arm title	Placebo
------------------	---------

Arm description:

Placebo tablet once daily in the morning for 90 days.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

Placebo tablets (matching BAY94-8862 tablets) were administrated once daily in the morning for 90 days.

standard deviation	± 21.923	± 20.164	± 22.205
Baseline KDQOL-36 domain score (Effects of Kidney Disease)			
The Kidney Disease QOL [KDQOL]-36 questionnaire is a specific measure of Health-Related Quality of Life (HRQoL) for chronic kidney disease (CKD) that includes effects and burden of kidney disease as well as physical and mental health scores. Index score ranges from 0 (serve problems in all items) to 100 (no problem in all items). "Effects of Kidney disease" sub-score was analyzed. Data for subjects with valid data for this baseline characteristic were reported.			
Units: Scores on a scale			
arithmetic mean	90.78	92.53	91.78
standard deviation	± 10.28	± 9.57	± 12.55
Baseline EQ-5D scores (EQ5D - Visual Analog Scale)			
EuroQol Group 5-Dimension, 3-Level (EQ-5D-3L) questionnaires consist of the EQ-5D descriptive system and the EQ visual analogue scale (EQ VAS). The EQ-5D-3L descriptive system comprises the following 5 dimensions: mobility, self-care, usual activities, pain/discomfort, and anxiety/depression. Each dimension has 3 levels: no problems, some problems, extreme problems. EQ VAS was analyzed for this endpoint and it ranges from 0 (worst possible health state) to 100 (best possible health state). Data for subjects with valid data for this baseline characteristic were reported.

Secondary: Change From Baseline to Day 90 in KDQOL-36 Domain Score (Effects of

Kidney Disease)

End point title	Change From Baseline to Day 90 in KDQOL-36 Domain Score (Effects of Kidney Disease)
-----------------	---

End point description:

The Kidney Disease QOL [KDQOL]-36 questionnaire is a specific measure of Health-Related Quality of Life (HRQoL) for chronic kidney disease (CKD) that includes effects and burden of kidney disease as well as physical and mental health scores. Index score ranges from 0 (severe problems in all items) to 100 (no problem in all items). "Effects of Kidney disease" sub-score was analyzed. Data for subjects in FAS with valid data for this endpoint were reported.

Secondary: Change From Baseline to Day 90 in EQ-5D Scores (EQ5D - Visual Analog Scale)

End point title	Change From Baseline to Day 90 in EQ-5D Scores (EQ5D - Visual Analog Scale)
-----------------	---

End point description:

EuroQol Group 5-Dimension, 3-Level (EQ-5D-3L) questionnaires consist of the EQ-5D descriptive system and the EQ visual analogue scale (EQ VAS). The EQ-5D-3L descriptive system comprises the following 5 dimensions: mobility, self-care, usual activities, pain/discomfort, and anxiety/depression. Each dimension has 3 levels: no problems, some problems, extreme problems. EQ VAS was analyzed for this endpoint and it ranges from 0 (worst possible health state) to 100 (best possible health state). Data for subjects in FAS with valid data for this endpoint were reported.

subjects affected / exposed	2 / 97 (2.06%)	2 / 98 (2.04%)	5 / 119 (4.20%)
occurrences (all)	2	2	5
Infections and infestations			
Nasopharyngitis			
subjects affected / exposed	9 / 97 (9.28%)	5 / 98 (5.10%)	8 / 119 (6.72%)
occurrences (all)	9	5	9

Non-serious adverse events	Finerenone (BAY 94-8862)(15 mg)	Placebo	
Total subjects affected by non-serious adverse events			
subjects affected / exposed	11 / 125 (8.80%)	8 / 94 (8.51%)	
Nervous system disorders			
Dizziness			

subjects affected / exposed occurrences (all)	5 / 125 (4.00%) 5	2 / 94 (2.13%) 2	
Gastrointestinal disorders Diarrhoea subjects affected / exposed occurrences (all)	3 / 125 (2.40%) 4	2 / 94 (2.13%) 2	
Infections and infestations Nasopharyngitis subjects affected / exposed occurrences (all)	4 / 125 (3.20%) 4	5 / 94 (5.32%) 6	

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
04 December 2013	Amendment 1 was implemented globally. In this amendment changes to ensure consistency within the document and the central and local laboratory as well as clarifications of the study procedure have been implemented.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
