

## Clinical trial results:

### A Phase IIa, Randomized, Double-blind, Placebo-controlled, Parallel Group Study to Assess the Safety and Efficacy of 28 Day Oral Administration of BAY 85-8501 in Patients with non-Cystic Fibrosis Bronchiectasis

#### Summary

EudraCT number	2012-004491-18
Trial protocol	GB ES IT
Global end of trial date	13 June 2014

#### Results information

Result version number	v1
This version publication date	12 July 2016
First version publication date	24 July 2015

#### Trial information

##### Trial identification

Sponsor protocol code	BAY85-8501 / 16359
-----------------------	--------------------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT01818544
WHO universal trial number (UTN)	-

Notes:

#### Sponsors

Sponsor organisation name	Bayer HealthCare AG
Sponsor organisation address	Kaiser Wilhelm Allee, Leverkusen, Germany, D-51368
Public contact	Therapeutic Area Head, Bayer HealthCare AG, clinical-trials-contact@bayerhealthcare.com
Scientific contact	Therapeutic Area Head, Bayer HealthCare AG, clinical-trials-contact@bayerhealthcare.com

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	22 September 2014
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	13 June 2014
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

To assess the safety and tolerability of 28 day oral administration of BAY 85-8501 versus placebo in subjects with non-Cystic Fibrosis (CF) Bronchiectasis (BE).

Protection of trial subjects:

The conduct of this clinical study met all local legal and regulatory requirements. The study was conducted in accordance with the ethical principles that have their origin in the Declaration of Helsinki and the International Conference on Harmonization guideline E6: Good Clinical Practice. Before entering the study, the informed consent form was read by and explained to all subjects. Participating subjects signed informed consent form and could withdraw from the study at any time without any disadvantage and without having to provide a reason for this decision. Only investigators qualified by training and experience were selected as appropriate experts to investigate the study drug.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	22 April 2013
Long term follow-up planned	Yes
Long term follow-up rationale	Safety
Long term follow-up duration	1 Months
Independent data monitoring committee (IDMC) involvement?	No

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Germany: 13
Country: Number of subjects enrolled	Spain: 18
Country: Number of subjects enrolled	United Kingdom: 9
Country: Number of subjects enrolled	Italy: 54
Worldwide total number of subjects	94
EEA total number of subjects	94

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23	0

months)	
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	29
From 65 to 84 years	65
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

The study was conducted at 27 sites in 4 countries between 22 April 2013 (first subject first visit) and 13 June 2014 (last subject last visit).

### Pre-assignment

Screening details:

Of 139 subjects screened, 94 subjects were randomized to the study. The reason for 45 screen failures was non-fulfilment of the inclusion or exclusion and subject withdrawal criteria.

### Period 1

Period 1 title	Overall Trial (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Investigator, Carer, Subject, Assessor

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	BAY85-8501

Arm description:

Daily oral dose of 1 milligram (mg) BAY85-8501 tablets for 28 days.

Arm type	Experimental
Investigational medicinal product name	BAY85-8501
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Daily oral dose of 1 mg BAY85-8501 tablets for 28 days.

<b>Arm title</b>	Placebo
------------------	---------

Arm description:

Placebo matched to BAY85-8501 for 28 days.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Placebo matched to BAY85-8501 for 28 days.

<b>Number of subjects in period 1</b>	BAY85-8501	Placebo
Started	47	47
Treated	45	47
Completed	37	45
Not completed	10	2
Consent withdrawn by subject	1	-
Protocol violation	2	-
Adverse event	6	1
Unspecified	1	-
Lost to follow-up	-	1

## Baseline characteristics

### Reporting groups

Reporting group title	BAY85-8501
-----------------------	------------

Reporting group description:

Daily oral dose of 1 milligram (mg) BAY85-8501 tablets for 28 days.

Reporting group title	Placebo
-----------------------	---------

Reporting group description:

Placebo matched to BAY85-8501 for 28 days.

Reporting group values	BAY85-8501	Placebo	Total
Number of subjects	47	47	94
Age categorical Units: Subjects			

Age continuous Units: years arithmetic mean standard deviation	64.1 ± 12.21	68.6 ± 8.04	-
Gender categorical Units: Subjects			
Female	22	22	44
Male	25	25	50

## End points

### End points reporting groups

Reporting group title	BAY85-8501
Reporting group description: Daily oral dose of 1 milligram (mg) BAY85-8501 tablets for 28 days.	
Reporting group title	Placebo
Reporting group description: Placebo matched to BAY85-8501 for 28 days.	
Subject analysis set title	Safety Population
Subject analysis set type	Safety analysis
Subject analysis set description: Safety population (N= 92) was defined as all subjects who received at least one dose of study medication.	
Subject analysis set title	Full Analysis Set (FAS) Population
Subject analysis set type	Full analysis
Subject analysis set description: FAS population (N= 94) was defined as all randomized subjects.	

### Primary: Number Of Subjects Who Need To Discontinue Study Medication Due To Findings In Physical Examination

End point title	Number Of Subjects Who Need To Discontinue Study Medication Due To Findings In Physical Examination <sup>[1]</sup>
End point description:	
End point type	Primary
End point timeframe: From start of study treatment up to follow-up visit (28 days after last dose)	

Notes:

## Statistical analyses

Statistical analysis title	Statistical analysis 1
Statistical analysis description:	
FEF25-75 was analyzed by an ANCOVA with baseline as a covariate and treatment as a factor. Adjusted means (LS means) for treatment, as well as the difference in LS means between treatment groups, and the corresponding 95% confidence intervals were calculated.	
Comparison groups	BAY85-8501 v Placebo
Number of subjects included in analysis	94
Analysis specification	Pre-specified
Analysis type	other
P-value	= 0.1159
Method	ANCOVA
Parameter estimate	LS-mean Difference
Point estimate	0.138
Confidence interval	
level	95 %
sides	2-sided
lower limit	-0.0348
upper limit	0.3114

## Secondary: Change From Baseline in Total Score on St. George's Respiratory Questionnaire (SGRQ) at Day 28 and 56

End point title	Change From Baseline in Total Score on St. George's Respiratory Questionnaire (SGRQ) at Day 28 and 56
-----------------	---

End point description:

SGRQ has been developed to measure the impact of respiratory disease on health status. The SGRQ scoring was done 0-100% with 0 being no impairment of quality of life. This was scored separately for each of 3 sections (Activity, Impact and Symptom) of the questionnaire and a summary score utilizing responses to all items was the total SGRQ score. This total score ranged from zero to 100%. Score range of change from baseline between -4 to +4 points indicate "no clinical relevant change"; less than (<) 4 points indicate "improvement"; greater than (>) 4 points indicate "deterioration". In the categories listed below, "N" signifies the number of subjects evaluable for the outcome.

End point type	Secondary
----------------	-----------

End point timeframe:

Baseline (Day 1), Day 28 and 56

End point values	BAY85-8501	Placebo		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	47 <sup>[28]</sup>	47 <sup>[29]</sup>		
Units: scores on a scale				
arithmetic mean (standard deviation)				
Baseline (N= 42, 46)	43.18 (± 20.159)	39.68 (± 14.546)		
Change at Day 28 (N= 40, 45)	0.36 (± 9.051)	0.18 (± 11.715)		
Change at Day 56 (N= 36, 44)	-0.87 (± 6.851)	1.54 (± 10.874)

### Reporting groups

Reporting group title	BAY85-8501
-----------------------	------------

Reporting group description:

Daily oral dose of 1 mg BAY85-8501 tablets for 28 days.

Reporting group title	Placebo
-----------------------	---------

Reporting group description:

Placebo-matched to BAY85-8501 for 28 days.

Serious adverse events	BAY85-8501	Placebo	
Total subjects affected by serious adverse events			
subjects affected / exposed	3 / 45 (6.67%)	1 / 47 (2.13%)	
number of deaths (all causes)	0	0	
number of deaths resulting from adverse events	0	0	
Cardiac disorders			
Accelerated idioventricular rhythm			
subjects affected / exposed	0 / 45 (0.00%)	1 / 47 (2.13%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Respiratory, thoracic and mediastinal disorders			
Apnoeic attack			
subjects affected / exposed	1 / 45 (2.22%)	0 / 47 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Bronchiectasis			
subjects affected / exposed	1 / 45 (2.22%)	0 / 47 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Infections and infestations			
Bronchopneumonia			

subjects affected / exposed	1 / 45 (2.22%)	0 / 47 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	

Frequency threshold for reporting non-serious adverse events: 5 %

<b>Non-serious adverse events</b>	BAY85-8501	Placebo	
Total subjects affected by non-serious adverse events			
subjects affected / exposed	18 / 45 (40.00%)	20 / 47 (42.55%)	
Nervous system disorders			
Headache			
subjects affected / exposed	5 / 45 (11.11%)	4 / 47 (8.51%)	
occurrences (all)	9	6	
Gastrointestinal disorders			
Nausea			
subjects affected / exposed	1 / 45 (2.22%)	3 / 47 (6.38%)	
occurrences (all)	1	3	
Diarrhoea			
subjects affected / exposed	4 / 45 (8.89%)	3 / 47 (6.38%)	
occurrences (all)	6	4	
Vomiting			
subjects affected / exposed	3 / 45 (6.67%)	0 / 47 (0.00%)	
occurrences (all)	4	0	
Respiratory, thoracic and mediastinal disorders			
Cough			
subjects affected / exposed	4 / 45 (8.89%)	4 / 47 (8.51%)	
occurrences (all)	5	4	
Sputum increased			
subjects affected / exposed	3 / 45 (6.67%)	3 / 47 (6.38%)	
occurrences (all)	3	3	
Musculoskeletal and connective tissue disorders			
Muscle spasms			
subjects affected / exposed	3 / 45 (6.67%)	0 / 47 (0.00%)	
occurrences (all)	5	0	
Infections and infestations			

Nasopharyngitis			
subjects affected / exposed	2 / 45 (4.44%)	6 / 47 (12.77%)	
occurrences (all)	2	6	
Viral upper respiratory tract infection			
subjects affected / exposed	3 / 45 (6.67%)	1 / 47 (2.13%)	
occurrences (all)	3	1	

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
08 November 2012	Measurement of the concentration of neutrophil elastase in the sputum was added as a biomarker endpoint. This endpoint allowed direct measurement of NE concentration (in sputum) as a biomarker endpoint; it was inadvertently omitted in the final stage of protocol preparation.

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

Decimal places were automatically truncated if last decimal equals zero.

Notes:
