Notes:

General information about the trial

Main objective of the trial:

The purpose of this two-part study is to investigate the safety, tolerability and efficacy of LY3016859 after multiple intravenous (IV) dosing in participants with diabetic nephropathy (DN). Part A will be dose escalation for safety and tolerability and Part B will evaluate Proteinuria.

Protection of trial subjects:

This study was conducted in accordance with International Conference on Harmonization (ICH) Good Clinical Practice, and the principles of the Declaration of Helsinki, in addition to following the laws and regulations of the country or countries in which a study is conducted.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
07 March 2013	This amendment was issued before the first patient was enrolled, primarily to incorporate changes to eligibility criteria, in-house stay, and dose administration.
12 November 2013	The primary reason for this amendment was to incorporate additional blood collection for potential future evaluation of immune response.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
