

Clinical trial results:

TapERA:

Maintaining remission in RA while tapering Etanercept.

Summary

EudraCT number	2012-004631-22
Trial protocol	BE
Global end of trial date	31 December 2015

Results information

Result version number	v1 (current)
This version publication date	16 April 2021
First version publication date	16 April 2021

Trial information

Trial identification

Sponsor protocol code	TapERA2012
-----------------------	------------

Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	-
WHO universal trial number (UTN)	-

Notes:

Sponsors

Sponsor organisation name	University Hospitals Leuven
Sponsor organisation address	herestraat 49, Leuven, Belgium, 3000
Public contact	Patrick Verschueren, University Hospitals Leuven, 32 16342541, patrick.verschueren@uzleuven.be
Scientific contact	Patrick Verschueren, University Hospitals Leuven, 32 16342541, patrick.verschueren@uzleuven.be

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	09 March 2021
Is this the analysis of the primary completion data?	Yes
Primary completion date	31 December 2015
Global end of trial reached?	Yes
Global end of trial date	31 December 2015
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The aim of the current study is to explore the potential of a dose reduction of Etanercept on safety and persisting remission in RA patients.

Protection of trial subjects:

Patients were pseudonymised.

Informed consent was obtained.

Patient were re-escalated to weekly Etanercept use in case of loss of remission.

Medication (Etanercept) used in this trial was within the marketing authorisation.

Protocol obtained ethics committee approval.

.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	04 February 2013
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Belgium: 66
Worldwide total number of subjects	66
EEA total number of subjects	66

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	54
From 65 to 84 years	12

85 years and over	0
-------------------	---

Subject disposition

Recruitment

Recruitment details:

66 eligible patients were recruited between October 2012 and December 2014. There were patients included in 6 Belgian rheumatology centers (2 university hospitals, 3 general hospitals and 1 private practice)

Pre-assignment

Screening details:

There were 73 patients screened .

Of these screened patients 66 were included in the trial. 7 patients did not fulfill the eligibility criteria (e.g. no sustained remission for 6 months based on DAS28CRP/ESR) .

Pre-assignment period milestones

Number of subjects started	73 ^[1]
Number of subjects completed	66

Pre-assignment subject non-completion reasons

Reason: Number of subjects	Protocol deviation: 7
----------------------------	-----------------------

Notes:

[1] - The number of subjects reported to have started the pre-assignment period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: 7 patients not included due to protocol violation (not meeting inclusion criteria)

Period 1

Period 1 title	overall trial (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Weekly Etanercept

Arm description:

patients continue their weekly 50 mg etanercept treatment

Arm type	Active comparator
Investigational medicinal product name	Etanercept
Investigational medicinal product code	IMP-228/2014
Other name	
Pharmaceutical forms	Injection
Routes of administration	Subcutaneous use

Dosage and administration details:

etanercept 50 mg subcutaneously weekly

Arm title	Every other week Etanercept
------------------	-----------------------------

Arm description:

Etanercept 50 mg weekly every other week.

Arm type	Experimental
Investigational medicinal product name	Etanercept
Investigational medicinal product code	IMP-228/2014
Other name	
Pharmaceutical forms	Injection
Routes of administration	Subcutaneous use

Dosage and administration details:

etanercept 50 mg subcutaneously every other week

Number of subjects in period 1	Weekly Etanercept	Every other week Etanercept
Started	34	32
Completed	33	31
Not completed	1	1
Lost to follow-up	-	1
Lack of efficacy	1	-

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? No

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

lower sample size than expected was included in the trial and therefore the power of the trial was not achieved.
