

## Clinical trial results:

### Multiple dose trial examining dose range, escalation and efficacy of oral semaglutide in subjects with type 2 diabetes

Due to the EudraCT – Results system being out of service between 31 July 2015 and 12 January 2016, these results have been published in compliance with revised timelines.

#### Summary

EudraCT number	2012-004994-16
Trial protocol	SE IT DE GB BG AT ES DK
Global end of trial date	11 December 2014

#### Results information

Result version number	v1 (current)
This version publication date	27 July 2016
First version publication date	27 July 2016

#### Trial information

##### Trial identification

Sponsor protocol code	NN9924-3790
-----------------------	-------------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT01923181
WHO universal trial number (UTN)	U1111-1136-4716

Notes:

#### Sponsors

Sponsor organisation name	Novo Nordisk A/S
Sponsor organisation address	Novo Allé, Bagsvaerd, Denmark, 2880
Public contact	Global Clinical Registry (GCR,1452), Novo Nordisk A/S, clinicaltrials@novonordisk.com
Scientific contact	Global Clinical Registry (GCR,1452), Novo Nordisk A/S, clinicaltrials@novonordisk.com

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	01 July 2015
Is this the analysis of the primary completion data?	Yes
Primary completion date	11 December 2014
Global end of trial reached?	Yes
Global end of trial date	11 December 2014
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

To compare the efficacy on glycaemic control of oral semaglutide in a SNAC formulation against placebo in subjects with T2D

Protection of trial subjects:

The trial was conducted in accordance with the Declaration of Helsinki (2013) and International Conference on Harmonisation (ICH) Good Clinical Practice (1996) and 21 Code of Federal Regulations (CFR) 312.120 (2013).

Background therapy:

The trial medication was given as add-on to previous metformin therapy or as monotherapy if subject was treated with diet and exercise alone.

Evidence for comparator:

Not applicable.

Actual start date of recruitment	02 December 2013
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Spain: 44
Country: Number of subjects enrolled	Sweden: 28
Country: Number of subjects enrolled	United Kingdom: 62
Country: Number of subjects enrolled	Austria: 38
Country: Number of subjects enrolled	Bulgaria: 33
Country: Number of subjects enrolled	Denmark: 25
Country: Number of subjects enrolled	Germany: 37
Country: Number of subjects enrolled	Italy: 33
Country: Number of subjects enrolled	Canada: 35
Country: Number of subjects enrolled	Israel: 51
Country: Number of subjects enrolled	Malaysia: 33
Country: Number of subjects enrolled	Serbia: 26
Country: Number of subjects enrolled	South Africa: 16
Country: Number of subjects enrolled	United States: 171
Worldwide total number of subjects	632
EEA total number of subjects	300

Notes:

<b>Subjects enrolled per age group</b>	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	479
From 65 to 84 years	152
85 years and over	1

## Subject disposition

### Recruitment

Recruitment details:

The trial was conducted at 100 sites in 14 countries as follows: Austria: 6 sites; Bulgaria: 3 sites; Canada: 6 sites; Denmark: 6 sites; Germany: 6 sites; Israel: 6 sites; Italy: 4 sites; Malaysia: 4 sites; Serbia: 1 site; South Africa: 3 sites; Spain: 5 sites; Sweden: 3 sites; United Kingdom: 8 sites; United States: 39 sites.

### Pre-assignment

Screening details:

Subjects attended a screening visit in order to assess their eligibility, which took place within 2 weeks prior to the randomisation visit. Subjects were randomised once all inclusion and exclusion criteria were confirmed. At this visit, data about the subjects already on metformin was documented, based on which the randomisation was stratified.

### Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Blinding implementation details:

The study was partially blinded, where oral semaglutide and oral placebo arms were double-blinded, whereas subcutaneous (sc) semaglutide active comparator arm was open-labelled. An internal oral GLP-1 safety committee was constituted to perform ongoing blinded safety surveillance and in case this committee recommended unblinding of any data for further analysis, an independent ad hoc safety group was established to maintain the blinding.

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Placebo

Arm description:

The subjects in this arm were administered with placebo tablets once daily orally for 26 weeks. The placebo tablets did not contain sodium N-(8-[2-hydroxybenzoyl] amino) caprylate (SNAC).

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

The doses were administered according to the following rules: Fasting for at least 6 hours (e.g., in the morning following an overnight fast) before tablet ingestion. Water and oral concomitant medication was allowed up to 2 hours prior to dosing. Intake of maximum 120 mL of water was allowed when swallowing the tablet. Subjects were required to abstain from food and fluid intake for at least 30 minutes after ingestion of oral placebo tablet. Oral concomitant medication was allowed to be taken 2 hours post-dosing. If taken with food, concomitant medication was allowed to be administered 30 minutes after ingestion of the placebo tablet.

<b>Arm title</b>	Sema 2.5 mg
------------------	-------------

Arm description:

The subjects in this group were administered with 2.5 mg of oral semaglutide once daily for 26 weeks. The semaglutide 2.5 mg tablet contained a fixed dose of 300 mg SNAC.

Arm type	Experimental
----------	--------------

Investigational medicinal product name	Semaglutide 2.5 mg
Investigational medicinal product code	
Other name	SEMAGLUTIDE
Pharmaceutical forms	Tablet
Routes of administration	Oral use

**Dosage and administration details:**

The doses were administered according to the following rules: Fasting for at least 6 hours (e.g., in the morning following an overnight fast) before tablet ingestion. Water and oral concomitant medication was allowed up to 2 hours prior to dosing. Intake of maximum 120 mL of water was allowed when swallowing the tablet. Subjects were required to abstain from food and fluid intake for at least 30 minutes after ingestion of oral semaglutide tablet. Oral concomitant medication was allowed to be taken 2 hours post-dosing. If taken with food, concomitant medication was allowed to be administered 30 minutes after ingestion of the semaglutide tablet.

<b>Arm title</b>	Sema 5 mg
------------------	-----------

**Arm description:**

The subjects in this group were administered with once daily oral doses of 2.5 mg semaglutide for 4 weeks, then 5 mg of semaglutide for 22 weeks. The maintenance dose was 5 mg for subjects in this group. The semaglutide 5 mg tablet contained a fixed dose of 300 mg SNAC.

Arm type	Experimental
Investigational medicinal product name	Semaglutide 5.0 mg
Investigational medicinal product code	
Other name	SEMAGLUTIDE
Pharmaceutical forms	Tablet
Routes of administration	Oral use

**Dosage and administration details:**

The doses were administered according to the following rules: Fasting for at least 6 hours (e.g., in the morning following an overnight fast) before tablet ingestion. Water and oral concomitant medication was allowed up to 2 hours prior to dosing. Intake of maximum 120 mL of water was allowed when swallowing the tablet. Subjects were required to abstain from food and fluid intake for at least 30 minutes after ingestion of oral semaglutide tablet. Oral concomitant medication was allowed to be taken 2 hours post-dosing. If taken with food, concomitant medication was allowed to be administered 30 minutes after ingestion of the semaglutide tablet.

<b>Arm title</b>	Sema 10 mg
------------------	------------

**Arm description:**

The subjects in this group were administered with once daily oral doses of 5 mg semaglutide for 4 weeks, then 10 mg of semaglutide for 22 weeks. The maintenance dose was 10 mg for subjects in this group. The semaglutide 10 mg tablet contained a fixed dose of 300 mg SNAC.

Arm type	Experimental
Investigational medicinal product name	Semaglutide 10 mg
Investigational medicinal product code	
Other name	SEMAGLUTIDE
Pharmaceutical forms	Tablet
Routes of administration	Oral use

**Dosage and administration details:**

The doses were administered according to the following rules: Fasting for at least 6 hours (e.g., in the morning following an overnight fast) before tablet ingestion. Water and oral concomitant medication was allowed up to 2 hours prior to dosing. Intake of maximum 120 mL of water was allowed when swallowing the tablet. Subjects were required to abstain from food and fluid intake for at least 30 minutes after ingestion of oral semaglutide tablet. Oral concomitant medication was allowed to be taken 2 hours post-dosing. If taken with food, concomitant medication was allowed to be administered 30 minutes after ingestion of the semaglutide tablet.

<b>Arm title</b>	Sema 20 mg
------------------	------------

**Arm description:**

The subjects in this group were administered with once daily oral doses of 5 mg semaglutide for 4 weeks, then 10 mg for 4 weeks, then 20 mg for 18 weeks. The maintenance dose was 20 mg for subjects in this group. The semaglutide 20 mg tablet contained a fixed dose of 300 mg SNAC.

Arm type	Experimental
----------	--------------

Investigational medicinal product name	Semaglutide 20 mg
Investigational medicinal product code	
Other name	SEMAGLUTIDE
Pharmaceutical forms	Tablet
Routes of administration	Oral use

**Dosage and administration details:**

The doses were administered according to the following rules: Fasting for at least 6 hours (e.g., in the morning following an overnight fast) before tablet ingestion. Water and oral concomitant medication was allowed up to 2 hours prior to dosing. Intake of maximum 120 mL of water was allowed when swallowing the tablet. Subjects were required to abstain from food and fluid intake for at least 30 minutes after ingestion of oral semaglutide tablet. Oral concomitant medication was allowed to be taken 2 hours post-dosing. If taken with food, concomitant medication was allowed to be administered 30 minutes after ingestion of the semaglutide tablet.

<b>Arm title</b>	Sema 40 mg
------------------	------------

**Arm description:**

The subjects in this group were administered with once daily oral doses of 5 mg semaglutide for 4 weeks, then 10 mg for 4 weeks, then 20 mg for 4 weeks, then 40 mg for 14 weeks. The maintenance dose was 40 mg for subjects in this group. In this arm, the dose-escalation occurred every 4th week. The semaglutide 40 mg tablet contained a fixed dose of 300 mg SNAC.

Arm type	Experimental
Investigational medicinal product name	Semaglutide 40 mg
Investigational medicinal product code	
Other name	SEMAGLUTIDE
Pharmaceutical forms	Tablet
Routes of administration	Oral use

**Dosage and administration details:**

The doses were administered according to the following rules: Fasting for at least 6 hours (e.g., in the morning following an overnight fast) before tablet ingestion. Water and oral concomitant medication was allowed up to 2 hours prior to dosing. Intake of maximum 120 mL of water was allowed when swallowing the tablet. Subjects were required to abstain from food and fluid intake for at least 30 minutes after ingestion of oral semaglutide tablet. Oral concomitant medication was allowed to be taken 2 hours post-dosing. If taken with food, concomitant medication was allowed to be administered 30 minutes after ingestion of the semaglutide tablet.

<b>Arm title</b>	Sema 40 mg S
------------------	--------------

**Arm description:**

The subjects in this group were administered with once daily oral doses of 5 mg semaglutide for 8 weeks, then 10 mg for 8 weeks, then 20 mg for 8 weeks, then 40 mg for 2 weeks. The maintenance dose was 40 mg for subjects in this group. In this arm, the dose-escalation occurred every 8th week (slow dose escalation). The semaglutide 40 mg tablet contained a fixed dose of 300 mg SNAC.

Arm type	Experimental
Investigational medicinal product name	Semaglutide 40 mg
Investigational medicinal product code	
Other name	SEMAGLUTIDE
Pharmaceutical forms	Tablet
Routes of administration	Oral use

**Dosage and administration details:**

The doses were administered according to the following rules: Fasting for at least 6 hours (e.g., in the morning following an overnight fast) before tablet ingestion. Water and oral concomitant medication was allowed up to 2 hours prior to dosing. Intake of maximum 120 mL of water was allowed when swallowing the tablet. Subjects were required to abstain from food and fluid intake for at least 30 minutes after ingestion of oral semaglutide tablet. Oral concomitant medication was allowed to be taken 2 hours post-dosing. If taken with food, concomitant medication was allowed to be administered 30 minutes after ingestion of the semaglutide tablet.

<b>Arm title</b>	Sema 40 mg F
------------------	--------------

**Arm description:**

The subjects in this group were administered with once daily oral doses of 5 mg semaglutide for 2 weeks, then 10 mg for 2 weeks, then 20 mg for 2 weeks, then 40 mg for 20 weeks. The maintenance dose was 40 mg for subjects in this group. In this arm, the dose-escalation occurred every 2nd week

(fast dose escalation). The semaglutide 40 mg tablet contained a fixed dose of 300 mg SNAC.

Arm type	Experimental
Investigational medicinal product name	Semaglutide 40 mg
Investigational medicinal product code	
Other name	SEMAGLUTIDE
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

The doses were administered according to the following rules: Fasting for at least 6 hours (e.g., in the morning following an overnight fast) before tablet ingestion. Water and oral concomitant medication was allowed up to 2 hours prior to dosing. Intake of maximum 120 mL of water was allowed when swallowing the tablet. Subjects were required to abstain from food and fluid intake for at least 30 minutes after ingestion of oral semaglutide tablet. Oral concomitant medication was allowed to be taken 2 hours post-dosing. If taken with food, concomitant medication was allowed to be administered 30 minutes after ingestion of the semaglutide tablet.

<b>Arm title</b>	Sema 1 mg SC
------------------	--------------

Arm description:

The subjects in this group were administered with once weekly doses of 0.25 mg of sc semaglutide for 4 weeks, then 0.50 mg for 4 weeks, then 1.0 mg for 18 weeks. The maintenance dose was 1.0 mg for subjects in this group.

Arm type	Active comparator
Investigational medicinal product name	Semaglutide B 1.34 mg/ml PDS290
Investigational medicinal product code	
Other name	SEMAGLUTIDE
Pharmaceutical forms	Solution for injection in pre-filled pen
Routes of administration	Subcutaneous use

Dosage and administration details:

Semaglutide (sc administration) was available as 1.34 mg/mL, solution for injection, 1.5 mL pre-filled PDS290 pen-injector. The injections were administered in the thigh, abdomen or upper arm, at any time of day irrespective of meals. The injections were administered on the same day of the week during the trial.

## Baseline characteristics

### Reporting groups

Reporting group title	Placebo
-----------------------	---------

#### Reporting group description:

The subjects in this arm were administered with placebo tablets once daily orally for 26 weeks. The placebo tablets did not contain sodium N-(8-[2-hydroxybenzoyl] amino) caprylate (SNAC).

Reporting group title	Sema 2.5 mg
-----------------------	-------------

#### Reporting group description:

The subjects in this group were administered with 2.5 mg of oral semaglutide once daily for 26 weeks. The semaglutide 2.5 mg tablet contained a fixed dose of 300 mg SNAC.

Reporting group title	Sema 5 mg
-----------------------	-----------

#### Reporting group description:

The subjects in this group were administered with once daily oral doses of 2.5 mg semaglutide for 4 weeks, then 5 mg of semaglutide for 22 weeks. The maintenance dose was 5 mg for subjects in this group. The semaglutide 5 mg tablet contained a fixed dose of 300 mg SNAC.

Reporting group title	Sema 10 mg
-----------------------	------------

#### Reporting group description:

The subjects in this group were administered with once daily oral doses of 5 mg semaglutide for 4 weeks, then 10 mg of semaglutide for 22 weeks. The maintenance dose was 10 mg for subjects in this group. The semaglutide 10 mg tablet contained a fixed dose of 300 mg SNAC.

Reporting group title	Sema 20 mg
-----------------------	------------

#### Reporting group description:

The subjects in this group were administered with once daily oral doses of 5 mg semaglutide for 4 weeks, then 10 mg for 4 weeks, then 20 mg for 18 weeks. The maintenance dose was 20 mg for subjects in this group. The semaglutide 20 mg tablet contained a fixed dose of 300 mg SNAC.

Reporting group title	Sema 40 mg
-----------------------	------------

#### Reporting group description:

The subjects in this group were administered with once daily oral doses of 5 mg semaglutide for 4 weeks, then 10 mg for 4 weeks, then 20 mg for 4 weeks, then 40 mg for 14 weeks. The maintenance dose was 40 mg for subjects in this group. In this arm, the dose-escalation occurred every 4th week. The semaglutide 40 mg tablet contained a fixed dose of 300 mg SNAC.

Reporting group title	Sema 40 mg S
-----------------------	--------------

#### Reporting group description:

The subjects in this group were administered with once daily oral doses of 5 mg semaglutide for 8 weeks, then 10 mg for 8 weeks, then 20 mg for 8 weeks, then 40 mg for 2 weeks. The maintenance dose was 40 mg for subjects in this group. In this arm, the dose-escalation occurred every 8th week (slow dose escalation). The semaglutide 40 mg tablet contained a fixed dose of 300 mg SNAC.

Reporting group title	Sema 40 mg F
-----------------------	--------------

#### Reporting group description:

The subjects in this group were administered with once daily oral doses of 5 mg semaglutide for 2 weeks, then 10 mg for 2 weeks, then 20 mg for 2 weeks, then 40 mg for 20 weeks. The maintenance dose was 40 mg for subjects in this group. In this arm, the dose-escalation occurred every 2nd week (fast dose escalation). The semaglutide 40 mg tablet contained a fixed dose of 300 mg SNAC.

Reporting group title	Sema 1 mg SC
-----------------------	--------------

#### Reporting group description:

The subjects in this group were administered with once weekly doses of 0.25 mg of sc semaglutide for 4 weeks, then 0.50 mg for 4 weeks, then 1.0 mg for 18 weeks. The maintenance dose was 1.0 mg for subjects in this group.

Reporting group values	Placebo	Sema 2.5 mg	Sema 5 mg
Number of subjects	71	70	70

Age categorical			
The total number of subjects include 2 subjects who were randomised but not exposed and not included in any of the analysis sets (1 subject in the Sema 10 mg arm and 1 subjects in the Sema 1 mg SC arm).			
Units: Subjects			
Adults (18-64 years)	48	55	57
From 65-84 years	23	15	12
85 years and over	0	0	1
Age continuous			
In the treatment arms, Sema 10 mg and Sema 1 mg SC, the mean values include only the data from 69 subjects in each arm since 1 subject each in these arms were not exposed to any treatment and hence should not be counted for any data under the respective arms. The total subjects enrolled/randomised are auto calculated by the system.			
Units: years			
arithmetic mean	58.9	56.7	55.7
standard deviation	± 10.3	± 9.9	± 11
Gender categorical			
The total number of subjects include 2 subjects who were randomised but not exposed and not included in any of the analysis sets (1 subject in the Sema 10 mg arm and 1 subjects in the Sema 1 mg SC arm).			
Units: Subjects			
Female	31	25	23
Male	40	45	47
HbA1c			
In the treatment arms, Sema 10 mg and Sema 1 mg SC, the mean values include only the data from 69 subjects in each arm since 1 subject each in these arms were not exposed to any treatment and hence should not be counted for any data under the respective arms. The total subjects enrolled/randomised are auto calculated by the system. Note: The mean and SD are reported with the precision of two decimals. However, zeros at the end of a value is deleted by the system, e.g. 8.00 is presented as 8.			
Units: percentage of haemoglobin			
arithmetic mean	8	7.99	7.8
standard deviation	± 0.8	± 0.72	± 0.62
Body weight			
In the treatment arms, Sema 10 mg and Sema 1 mg SC, the mean values include only the data from 69 subjects in each arm since 1 subject each in these arms were not exposed to any treatment and hence should not be counted for any data under the respective arms. The total subjects enrolled/randomised are auto calculated by the system.			
Units: kg			
arithmetic mean	93.76	93.62	93.09
standard deviation	± 18.14	± 15.63	± 19.03
Waist circumference			
In the treatment arms, Sema 10 mg and Sema 1 mg SC, the mean values include only the data from 69 subjects in each arm since 1 subject each in these arms were not exposed to any treatment and hence should not be counted for any data under the respective arms. The total subjects enrolled/randomised are auto calculated by the system. Note: The mean and SD are reported with the precision of one and two decimals, respectively. However, zeros at the end of the value is deleted by the system, e.g. 108.0 is presented as 108 and 13.30 is presented as 13.3.			
Units: centimeter			
arithmetic mean	111.1	108.5	106.1
standard deviation	± 13.56	± 11.87	± 13.73
BMI			
In the treatment arms, Sema 10 mg and Sema 1 mg SC, the mean values include only the data from 69 subjects in each arm since 1 subject each in these arms were not exposed to any treatment and hence should not be counted for any data under the respective arms. The total subjects enrolled/randomised are auto calculated by the system.			
Units: kg/m2			
arithmetic mean	32.58	31.74	31.6
standard deviation	± 4.53	± 4.14	± 4.86

Reporting group values	Sema 10 mg	Sema 20 mg	Sema 40 mg
Number of subjects	70	70	71
Age categorical			
The total number of subjects include 2 subjects who were randomised but not exposed and not included in any of the analysis sets (1 subject in the Sema 10 mg arm and 1 subjects in the Sema 1 mg SC arm).			
Units: Subjects			
Adults (18-64 years)	57	50	52
From 65-84 years	13	20	19
85 years and over	0	0	0

## End points

### End points reporting groups

Reporting group title	Placebo
Reporting group description: The subjects in this arm were administered with placebo tablets once daily orally for 26 weeks. The placebo tablets did not contain sodium N-(8-[2-hydroxybenzoyl] amino) caprylate (SNAC).	
Reporting group title	Sema 2.5 mg
Reporting group description: The subjects in this group were administered with 2.5 mg of oral semaglutide once daily for 26 weeks. The semaglutide 2.5 mg tablet contained a fixed dose of 300 mg SNAC.	
Reporting group title	Sema 5 mg
Reporting group description: The subjects in this group were administered with once daily oral doses of 2.5 mg semaglutide for 4 weeks, then 5 mg of semaglutide for 22 weeks. The maintenance dose was 5 mg for subjects in this group. The semaglutide 5 mg tablet contained a fixed dose of 300 mg SNAC.	
Reporting group title	Sema 10 mg
Reporting group description: The subjects in this group were administered with once daily oral doses of 5 mg semaglutide for 4 weeks, then 10 mg of semaglutide for 22 weeks. The maintenance dose was 10 mg for subjects in this group. The semaglutide 10 mg tablet contained a fixed dose of 300 mg SNAC.	
Reporting group title	Sema 20 mg
Reporting group description: The subjects in this group were administered with once daily oral doses of 5 mg semaglutide for 4 weeks, then 10 mg for 4 weeks, then 20 mg for 18 weeks. The maintenance dose was 20 mg for subjects in this group. The semaglutide 20 mg tablet contained a fixed dose of 300 mg SNAC.	
Reporting group title	Sema 40 mg
Reporting group description: The subjects in this group were administered with once daily oral doses of 5 mg semaglutide for 4 weeks, then 10 mg for 4 weeks, then 20 mg for 4 weeks, then 40 mg for 14 weeks. The maintenance dose was 40 mg for subjects in this group. In this arm, the dose-escalation occurred every 4th week. The semaglutide 40 mg tablet contained a fixed dose of 300 mg SNAC.	
Reporting group title	Sema 40 mg S
Reporting group description: The subjects in this group were administered with once daily oral doses of 5 mg semaglutide for 8 weeks, then 10 mg for 8 weeks, then 20 mg for 8 weeks, then 40 mg for 2 weeks. The maintenance dose was 40 mg for subjects in this group. In this arm, the dose-escalation occurred every 8th week (slow dose escalation). The semaglutide 40 mg tablet contained a fixed dose of 300 mg SNAC.	
Reporting group title	Sema 40 mg F
Reporting group description: The subjects in this group were administered with once daily oral doses of 5 mg semaglutide for 2 weeks, then 10 mg for 2 weeks, then 20 mg for 2 weeks, then 40 mg for 20 weeks. The maintenance dose was 40 mg for subjects in this group. In this arm, the dose-escalation occurred every 2nd week (fast dose escalation). The semaglutide 40 mg tablet contained a fixed dose of 300 mg SNAC.	
Reporting group title	Sema 1 mg SC
Reporting group description: The subjects in this group were administered with once weekly doses of 0.25 mg of sc semaglutide for 4 weeks, then 0.50 mg for 4 weeks, then 1.0 mg for 18 weeks. The maintenance dose was 1.0 mg for subjects in this group.	

**Primary: Change in HbA1c**

End point title	Change in HbA1c
-----------------	-----------------

End point description:

Change in HbA1c from baseline to after 26 weeks of treatment. Subjects in the full analysis set (FAS) and only measurements belonging to the on-treatment without rescue medication observation period (the primary observation period for examination of efficacy endpoints) were included in the analysis. This observation period included observations recorded at or after date of first dose of trial product and not after the first occurrence of the following: 1) The end-date of the on-treatment observation period. 2) Initiation of rescue medication. The total number of subjects included in this period were 463. FAS included subjects who had received at least 1 dose of randomised semaglutide (oral or sc) or placebo. Subjects in FAS contributed to the evaluation based on their randomised treatment. Note: The mean and SD are reported with the precision of two decimals. However, zeros at the end of a value is deleted by the system, e.g. 0.10 is presented as 0.1.

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

All adverse events (AEs) either observed by the investigator or reported spontaneously by the subjects were recorded. This included events from when the subject had signed the informed consent until the end of the post-treatment follow-up period.

Adverse event reporting additional description:

Safety analysis set was used for the assessment of safety including AEs. Safety analysis set included 630 subjects who had been exposed to at least 1 dose of semaglutide (oral or sc) or placebo and excluded 2 subjects who were randomised but not exposed to treatment.

Assessment type	Systematic

The subjects in this group were administered with once daily oral doses of 2.5 mg semaglutide for 4 weeks, then 5 mg of semaglutide for 22 weeks. The maintenance dose was 5 mg for subjects in this group. The semaglutide 5 mg tablet contained a fixed dose of 300 mg SNAC.

Reporting group title	Sema 10 mg
-----------------------	------------

Reporting group description:

The subjects in this group were administered with once daily oral doses of 5 mg semaglutide for 4 weeks, then 10 mg of semaglutide for 22 weeks. The maintenance dose was 10 mg for subjects in this group. The semaglutide 10 mg tablet contained a fixed dose of 300 mg SNAC.

Reporting group title	Sema 20 mg
-----------------------	------------

Reporting group description:

The subjects in this group were administered with once daily oral doses of 5 mg semaglutide for 4 weeks, then 10 mg for 4 weeks, then 20 mg for 18 weeks. The maintenance dose was 20 mg for subjects in this group. The semaglutide 20 mg tablet contained a fixed dose of 300 mg SNAC.

Reporting group title	Sema 40 mg
-----------------------	------------

Reporting group description:

The subjects in this group were administered with once daily oral doses of 5 mg semaglutide for 4 weeks, then 10 mg for 4 weeks, then 20 mg for 4 weeks, then 40 mg for 14 weeks. The maintenance dose was 40 mg for subjects in this group. In this arm, the dose-escalation occurred every 4th week. The semaglutide 40 mg tablet contained a fixed dose of 300 mg SNAC.

Reporting group title	Sema 40 mg S
-----------------------	--------------

Reporting group description:

The subjects in this group were administered with once daily oral doses of 5 mg semaglutide for 8 weeks, then 10 mg for 8 weeks, then 20 mg for 8 weeks, then 40 mg for 2 weeks. The maintenance dose was 40 mg for subjects in this group. In this arm, the dose-escalation occurred every 8th week (slow dose escalation). The semaglutide 40 mg tablet contained a fixed dose of 300 mg SNAC.

Reporting group title	Sema 40 mg F
-----------------------	--------------

Reporting group description:

The subjects in this group were administered with once daily oral doses of 5 mg semaglutide for 2 weeks, then 10 mg for 2 weeks, then 20 mg for 2 weeks, then 40 mg for 20 weeks. The maintenance dose was 40 mg for subjects in this group. In this arm, the dose-escalation occurred every 2nd week

(fast dose escalation). The semaglutide 40 mg tablet contained a fixed dose of 300 mg SNAC.

Reporting group title	Sema 1 mg SC
-----------------------	--------------

Reporting group description:

The subjects in this group were administered with once weekly doses of 0.25 mg of subcutaneous (sc) semaglutide for 4 weeks, then 0.50 mg for 4 weeks, then 1.0 mg for 18 weeks. The maintenance dose was 1.0 mg for subjects in this group.

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
11 February 2014	The HbA1c criterion was removed as part of the rescue criteria during the treatment period. The process of reporting central electrocardiogram (ECG) evaluation back to investigator was changed. The ADA classification of hypoglycaemia was recently been updated. The definition of thyroid events for adjudication was updated. Minor inconsistencies were updated and amendment number 1 (local amendment for Sweden) was included.

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
