

## Clinical trial results:

**An open-label multi-center single agent panobinostat roll-over protocol for patients who have completed a previous Novartis-sponsored panobinostat study and are judged by the investigator to benefit from continued single agent panobinostat treatment**

### Summary

|                          |                  |
|--------------------------|------------------|
| EudraCT number           | 2012-005252-41   |
| Trial protocol           | ES NL            |
| Global end of trial date | 19 November 2018 |

### Results information

|                                |   |

Notes:

### Paediatric regulatory details

|  |    |
|--|----|
| Is trial part of an agreed paediatric investigation plan (PIP)       | No |
| Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial? | No |
| Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial? | No |

Notes:

## Results analysis stage

|  |                  |
|--|------------------|
| Analysis stage                                       | Final            |
| Date of interim/final analysis                       | 19 November 2018 |
| Is this the analysis of the primary completion data? | Yes              |
| Primary completion date                              | 19 November 2018 |
| Global end of trial reached?                         | Yes              |
| Global end of trial date                             | 19 November 2018 |
| Was the trial ended prematurely?                     | No               |

Notes:

## General information about the trial

Main objective of the trial:

To evaluate long term safety data (serious adverse events and adverse events)

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and the International Conference on Harmonization (ICH) Good Clinical Practice (GCP) guidelines. All the local regulatory requirements pertinent to safety of trial subjects were also followed during the conduct of the trial

Background therapy: -

Evidence for comparator: -

|   |              |
|---|--------------|
| Actual start date of recruitment                          | 24 June 2013 |
| Long term follow-up planned                               | No           |
| Independent data monitoring committee (IDMC) involvement? | No           |

Notes:

## Population of trial subjects

### Subjects enrolled per country

|                                      |                  |
|--------------------------------------|------------------|
| Country: Number of subjects enrolled | Spain: 2         |
| Country: Number of subjects enrolled | United States: 4 |
| Country: Number of subjects enrolled | Israel: 1        |
| Country: Number of subjects enrolled | Netherlands: 1   |
| Worldwide total number of subjects   | 8                |
| EEA total number of subjects         | 3                |

Notes:

### Subjects enrolled per age group

|   |   |
|---|---|
| In utero                                  | 0 |
| Preterm newborn - gestational age < 37 wk | 0 |
| Newborns (0-27 days)                      | 0 |
| Infants and toddlers (28 days-23 months)  | 0 |
| Children (2-11 years)                     | 0 |
| Adolescents (12-17 years)                 | 0 |
| Adults (18-64 years)                      | 5 |
| From 65 to 84 years                       | 3 |

|                   |   |
|-------------------|---|
| 85 years and over | 0 |
|-------------------|---|

## Subject disposition

### Recruitment

Recruitment details: -

### Pre-assignment

Screening details:

There was no screening period. Patients enrolled into trial directly from the parent protocol.

### Period 1

|                              |                                |
|------------------------------|--------------------------------|
| Period 1 title               | Overall Study (overall period) |
| Is this the baseline period? | Yes                            |
| Allocation method            | Not applicable                 |
| Blinding used                | Not blinded                    |

### Arms

|                  |  |
|------------------|--|
| <b>Arm title</b> | Panobinostat - 10 to 40 mg/day TIW QoW |
|------------------|--|

Arm description:

10 to 40mg/day TIW QoW (3 times/week every other week) as per parent protocol design

|  |               |
|--|---------------|
| Arm type                               | Experimental  |
| Investigational medicinal product name | Panobinostat  |
| Investigational medicinal product code | LBH589        |
| Other name                             |               |
| Pharmaceutical forms                   | Capsule, hard |
| Routes of administration               | Oral use      |

Dosage and administration details:

10 - 40 mg/day TIW QoW (three times a week every other week)

|                                       |  |
|---------------------------------------|--|
| <b>Number of subjects in period 1</b> | Panobinostat - 10 to 40 mg/day TIW QoW |
| Started                               | 8                                      |
| Completed                             | 0                                      |
| Not completed                         | 8                                      |
| Disease progression                   | 6                                      |
| Administrative problems               | 2                                      |

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

| Date          | Amendment   |
|---------------|---|
| 11 March 2016 | The main purpose of the amendment is to change the primary endpoint to safety to better characterize the long-term safety of the compound. In addition, the protocol has been amended to include the collection of all AEs (including nonserious AEs) and an investigator descriptive attestation of continued clinical benefit (Yes/No). |

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
