

## Clinical trial results:

### A Prospective, Randomized, Open, Blinded Endpoint (PROBE), Clinical Trial to Assess The Renal and Humoral Effects of Sevelamer Carbonate in Patients with Chronic Kidney Disease and Residual Proteinuria Despite Best Available Treatment

#### Summary

EudraCT number	2012-005416-26
Trial protocol	IT
Global end of trial date	21 September 2015

#### Results information

Result version number	v1 (current)
This version publication date	18 December 2019
First version publication date	18 December 2019
Summary attachment (see zip file)	Article (AJKD_The ANSWER Randomized Trial article.pdf)

#### Trial information

##### Trial identification

Sponsor protocol code	ANSWER
-----------------------	--------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT02464891
WHO universal trial number (UTN)	-

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

---

**Results analysis stage**

Analysis stage	Final
Date of interim/final analysis	27 September 2016
Is this the analysis of the primary completion data?	Yes
Primary completion date	21 September 2015
Global end of trial reached?	Yes
Global end of trial date	21 September 2015
Was the trial ended prematurely?	No

Notes:

---

**General information about the trial**

Main objective of the trial:

To assess the effect of 3-month Sevelamer carbonate therapy compared to standard therapy on 24 h urinary protein excretion in patients with Chronic Kidney Disease (CKD) and residual proteinuria despite optimized Renin Angiotensin System (RAS) inhibitor therapy:

Protection of trial subjects:

The study was conducted in conformance with Good Clinical Practice standards and applicable country regulations regarding ethical committee review, informed consent and the protection of human subjects participating in biomedical research.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	18 November 2013
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

---

**Population of trial subjects**

---

**Subjects enrolled per country**

Country: Number of subjects enrolled	Italy: 53
Worldwide total number of subjects	53
EEA total number of subjects	53

Notes:

---

**Subjects enrolled per age group**

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	36
From 65 to 84 years	17
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

2 Italian centers (Clinical Research Center for Rare Diseases Aldo e Cele Daccò, Ranica, Bergamo, and Bianchi-Melacrino-Morelli Hospital, Nephrology Unit, Reggio Calabria) were activated respectively between November 2013 and December 2014.

### Pre-assignment

Screening details:

72 subjects were screened for inclusion in the study. 53 subjects were randomized. Of those not randomized, 9 did not meet inclusion criteria, 3 were lost to follow up and 7 declined to participate.

### Period 1

Period 1 title	Treatment period
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

### Arms

Are arms mutually exclusive?	No
<b>Arm title</b>	Renvela

Arm description:

Patients who met the selection criteria and were on maximal tolerated doses of ramipril and irbesartan were initially stratified according to serum phosphate level  $\leq 4$  or  $>4$  mg/dL. Each group was then randomly assigned to 1 of 2 treatment sequences: (1) 3 months of treatment with sevelamer carbonate, 1,600 mg, 3 times per day during meals, followed by a 1- month washout, and 3 months without sevelamer; or (2) 3 months without sevelamer, followed by a 1-month washout, and 3 months of treatment with sevelamer carbonate, 1,600 mg, 3 times daily.

Arm type	Experimental
Investigational medicinal product name	Renvela
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

1600 mg, 3 times per day during meals,

<b>Arm title</b>	No Renvela
------------------	------------

Arm description:

Patients who met the selection criteria and were on maximal tolerated doses of ramipril and irbesartan were initially stratified according to serum phosphate level  $\leq 4$  or  $>4$  mg/dL. Each group was then randomly assigned to 1 of 2 treatment sequences: (1) 3 months of treatment with sevelamer carbonate, 1,600 mg, 3 times per day during meals, followed by a 1- month washout, and 3 months without sevelamer; or (2) 3 months without sevelamer, followed by a 1-month washout, and 3 months of treatment with sevelamer carbonate, 1,600 mg, 3 times daily.

Arm type	No intervention
No investigational medicinal product assigned in this arm	

Number of subjects in period 1	Renvela	No Renvela
Started	53	53
Completed	49	53
Not completed	4	0
Adverse event, non-fatal	4	-

## Period 2

Period 2 title	Washout Period
Is this the baseline period?	No
Allocation method	Not applicable
Blinding used	Not blinded

## Arms

Arm title	Washout Period
-----------	----------------

### Arm description:

Each group was then randomly assigned to 1 of 2 treatment sequences: (1) 3 months of treatment with sevelamer carbonate, 1,600 mg, 3 times per day during meals, followed by a 1- month washout, and 3 months without sevelamer; or (2) 3 months without sevelamer, followed by a 1-month washout, and 3 months of treatment with sevelamer carbonate, 1,600 mg, 3 times daily.

Arm type	No intervention
No investigational medicinal product assigned in this arm	

Number of subjects in period 2	Washout Period
Started	53
Completed	53

## Baseline characteristics

### Reporting groups

Reporting group title	Treatment period
-----------------------	------------------

Reporting group description: -

Reporting group values	Treatment period	Total	
Number of subjects	53	53	
Age categorical			
Units: Subjects			
Adults (18-64 years)	38	38	
From 65-84 years	15	15	
85 years and over	0	0	
Age continuous			
Units: years			
arithmetic mean	55		
standard deviation	± 17	-	
Gender categorical			
Units: Subjects			
Female	11	11	
Male	42	42	
Body mass Index			
Units: Kg/m2			
arithmetic mean	27		
standard deviation	± 4	-	
Systolic Blood Pressure			
Units: mm Hg			
arithmetic mean	128		
standard deviation	± 22	-	
Diastolic Blood Pressure			
Units: mm Hg			
arithmetic mean	73		
standard deviation	± 10	-	
Pulse Rate			
Units: Beats/min			
arithmetic mean	69		
standard deviation	± 11	-	
Creatinine			
Units: mg/dl			
median	1.6		
inter-quartile range (Q1-Q3)	1 to 2.3	-	
Phosphate			
Units: mg/dl			
arithmetic mean	3.8		
standard deviation	± 0.6	-	
Calcium			
Units: mg/dl			
arithmetic mean	9.2		
standard deviation	± 0.4	-	

PTH Units: pg/dL arithmetic mean standard deviation	70 ± 33	-	
Magnesium Units: mg/dL arithmetic mean standard deviation	1.97 ± 0.22	-	
Cholesterol Units: mg/dL arithmetic mean standard deviation	181 ± 38	-	
LDL cholestrol Units: mg/dL arithmetic mean standard deviation	113 ± 33	-	
Triglycerides Units: mg/dL median inter-quartile range (Q1-Q3)	114 88 to 159	-	
Albumin Units: g/dL arithmetic mean standard deviation	3.6 ± 0.4	-	
Hemoglobin Units: g/dL arithmetic mean standard deviation	12.9 ± 1.8	-	
Urine Protein Units: g/24 H median inter-quartile range (Q1-Q3)	1.54 0.97 to 2.59	-	
Urine Albumin Units: µg/min median inter-quartile range (Q1-Q3)	829 481 to 1372	-	
mGFR Units: mL/min/1.73m2 arithmetic mean standard deviation	49.3 ± 23.5	-	
Fractional Albumin clearance Units: absolute value x 1000000 median inter-quartile range (Q1-Q3)	43 18 to 93	-	

## End points

### End points reporting groups

Reporting group title	Renvela
Reporting group description: Patients who met the selection criteria and were on maximal tolerated doses of ramipril and irbesartan were initially stratified according to serum phosphate level $\leq 4$ or $>4$ mg/dL. Each group was then randomly assigned to 1 of 2 treatment sequences: (1) 3 months of treatment with sevelamer carbonate, 1,600 mg, 3 times per day during meals, followed by a 1- month washout, and 3 months without sevelamer; or (2) 3 months without sevelamer, followed by a 1-month washout, and 3 months of treatment with sevelamer carbonate, 1,600 mg, 3 times daily.	
Reporting group title	No Renvela

### Primary: Urinary protein 24 H

End point title	Urinary protein 24 H
End point description:	
End point type	Primary
End point timeframe: Changes in 24-hour proteinuria at the end of the 2 treatment periods with sevelamer or without sevelamer compared to each pretreatment period. Three consecutive 24-hour proteinuria measurements were obtained at each visit and the mean of the 3 samples	

End point values	Renvela	No Renvela		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	49	53		
Units: g/24 H				
median (inter-quartile range (Q1-Q3))	1.36 (0.77 to 2.6)	1.48 (0.81 to 2.77)		

## Statistical analyses

<b>Statistical analysis title</b>	Change in Urine Proteine Excretion 24 H
Statistical analysis description: changes in 24-hour proteinuria at the end of the 2 treatment periods with sevelamer or without sevelamer compared to each pretreatment period. Three consecutive 24-hour proteinuria measurements were obtained at each visit and the mean of the 3 samples was used.	
Comparison groups	Renvela v No Renvela
Number of subjects included in analysis	102
Analysis specification	Pre-specified
Analysis type	superiority <sup>[1]</sup>
P-value	= 0.1 <sup>[2]</sup>
Method	Wilcoxon (Mann-Whitney)

Notes:

[1] - Wilcoxon signed rank test performed between pre-post treatment period.

[2] - P= 0.1 referred to Renvela vs non-Renvela period; differences between pre and post renvela treatment reported a p = 0.1; differences between pre and post non-renvela treatment reported a p = 0.5.

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

The adverse events will be reported during whole study up to 30 days after last dose of study drug.

Assessment type	Systematic

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
05 February 2014	The amendment makes the following changes without modifying the study design and without adding risk to patients: 1) possibility to include in the study

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

Short treatment duration, lower pretreatment proteinuria than expected
--

Notes:

---
