

## Clinical trial results:

**An open-label, randomized, active-controlled, parallel-group, Phase-3b study of the efficacy, safety, and tolerability of 2mg aflibercept administered by intravitreal injections using two different treatment regimens to subjects with neovascular age-related macular degeneration (nAMD)**

### Summary

EudraCT number	2013-000120-33
Trial protocol	HU CZ SK PT LT AT GB ES DE IT
Global end of trial date	04 June 2020

### Results information

Result version number	v1 (current)
This version publication date	20 June 2021
First version publication date	20 June 2021

Notes:

### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	04 June 2020
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	04 June 2020
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

The primary objective was to compare the efficacy of 2 mg aflibercept administered by 2 different intravitreal (IVT) treatment regimens to subjects with nAMD.

Protection of trial subjects:

The conduct of this clinical study met all local legal and regulatory requirements. The study was conducted in accordance with ethical principles that have their origin in the Declaration of Helsinki and the International Council for Harmonization guideline E6: Good Clinical Practice. Before entering the study, the informed consent was read by and explained to all the subjects. Participating subjects signed informed consent form and could withdraw from the study at any time without any disadvantage and without having to provide a reason for this decision. Only investigators qualified by training and experience were selected as appropriate experts to investigate the study drug.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	29 September 2015
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Austria: 13
Country: Number of subjects enrolled	Canada: 4
Country: Number of subjects enrolled	Czechia: 44
Country: Number of subjects enrolled	France: 21
Country: Number of subjects enrolled	Germany: 33
Country: Number of subjects enrolled	United Kingdom: 58
Country: Number of subjects enrolled	Hungary: 16
Country: Number of subjects enrolled	Italy: 48
Country: Number of subjects enrolled	Lithuania: 9
Country: Number of subjects enrolled	Poland: 1
Country: Number of subjects enrolled	Portugal: 42
Country: Number of subjects enrolled	Slovakia: 24
Country: Number of subjects enrolled	Spain: 7
Country: Number of subjects enrolled	Switzerland: 15
Worldwide total number of subjects	335
EEA total number of subjects	258

Notes:

<b>Subjects enrolled per age group</b>	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	32
From 65 to 84 years	267
85 years and over	36

## Subject disposition

### Recruitment

Recruitment details:

Study was conducted at 76 centers in 14 countries or regions, between 29-SEP-2015 (first subject first visit) and 04-JUN-2020 (last subject last visit)

### Pre-assignment

Screening details:

At baseline, 336 subjects were randomized to one of 2 treatment groups; 168 subjects were randomized to the Aflibercept extended-dosing group and 168 subjects were randomized to the Aflibercept 2Q8 ((2 mg aflibercept administered every 8 weeks)) group. One subject in Aflibercept extended-dosing group did not receive any study drug.

### Period 1

Period 1 title	Overall study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Aflibercept extended dosing

Arm description:

Aflibercept was administered 2 mg per injection intravitreal (IVT) in the study eye in Aflibercept extended dosing. Flexible dosing interval is  $\geq 8$  weeks (no upper limit) based on visual and anatomic outcomes as judged by the investigator. When/if visual and anatomical outcomes indicated that the disease had re-activated, the treatment interval reverted to the last treatment interval in which the disease was inactive (ie, no signs of exudation were observed).

Arm type	Experimental
Investigational medicinal product name	Aflibercept
Investigational medicinal product code	BAY86-5321
Other name	Eylea
Pharmaceutical forms	Injection
Routes of administration	Intravitreal use

Dosage and administration details:

Aflibercept was injected intravitreal (IVT) at a dose of 2 mg per injection. Flexible dosing intervals of  $\geq 8$  weeks (no upper limit) based on visual and anatomic outcomes as judged by the investigator. Aflibercept could be treated for up to 76 weeks.

<b>Arm title</b>	Aflibercept 2Q8 (2 mg aflibercept administered every 8 weeks)
------------------	---

Arm description:

Aflibercept was administered 2 mg per injection IVT in the study eye in Aflibercept 2Q8. Fixed dosing interval is 8 weeks ( $\pm 3$  days), modification of the treatment interval was not allowed.

Arm type	Active comparator
Investigational medicinal product name	Aflibercept
Investigational medicinal product code	BAY86-5321
Other name	Eylea
Pharmaceutical forms	Injection
Routes of administration	Intravitreal use

Dosage and administration details:

Aflibercept was injected intravitreal (IVT) at a dose of 2 mg per injection. Fixed dosing intervals of 8 weeks ( $\pm 3$  days) with no modification of the treatment interval allowed. Aflibercept was treated up to 72 weeks.

Number of subjects in period 1	Aflibercept extended dosing	Aflibercept 2Q8 (2 mg aflibercept administered every 8 weeks)
Started	167	168
Post-baseline BCVA assessment	165	167
Completed	149	154
Not completed	18	14
Physician decision	2	1
Consent withdrawn by subject	6	5
Treatment failure	1	-
Adverse event, non-fatal	4	2
Death	-	3
Other reason	4	2
Lost to follow-up	1	1

Early Treatment Diabetic Retinopathy Study (ETDRS) best-corrected visual			
--	--	--	--

Visual function was assessed with the procedure from the ETDRS adapted for the Age Related Eye Disease Study using charts with 70 letters at a starting distance of 4 meters. Charts are organized in 14 lines of decreasing size with 5 letters each. Subjects reading up to 19 letters at 4 meters were tested at 1 meter to read the first 6 lines. The score equals the sum of letters read at 1 meter and 4 meters. If more than 19 letters are read at 4 meters the score equals the number of letters read plus 30. The

score range is 0 to 100, and a higher score represents better visual function.			
Units: Letters read correctly arithmetic mean standard deviation	69 ± 12.1	70.1 ± 10.9	-
Central retinal thickness (CRT) in the study eye			
Retinal characteristic was evaluated using Optical coherence tomography (OCT). Actual analysis number for both arms is 164.			
Units: µm arithmetic mean standard deviation	257.3 ± 67.8	264.4 ± 59.7	-
Choroidal neovascularization (CNV) area in the study eye			
Choroidal neovascularization measured by optical coherence tomography (OCT). Actual analysis number for Aflibercept extended dosing is 165. Actual analysis number for Aflibercept 2Q8 (2 mg aflibercept administered every 8 weeks) is 152.			
Units: mm*2 arithmetic mean standard deviation	4.695 ± 4.043	5.060 ± 4.105	-
Total score for National Eye Institute 25-Item Visual Function			
National Eye Institute 25-Item Visual Function Questionnaire (NEI VFQ-25) total score ranges from 0 to 100, where 100 represents the best possible score and 0 represents the worst. Actual analysis number for Aflibercept extended dosing is 163.			
Units: Score on a scale arithmetic mean standard deviation	72.889 ± 18.414	75.757 ± 15.495	-

## End points

### End points reporting groups

Reporting group title	Aflibercept extended dosing
-----------------------	-----------------------------

Reporting group description:

Aflibercept was administered 2 mg per injection intravitreal (IVT) in the study eye in Aflibercept extended dosing. Flexible dosing interval is  $\geq 8$  weeks (no upper limit) based on visual and anatomic outcomes as judged by the investigator. ## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
10 December 2015	Amendment 2: 1-Update of approval status. 2-Clarification of duration of the periods. 3-Time windows and schedule of visits. 4-Selection of study eye. 5-Clarifications of inclusion criteria. 6-Time periods for inclusion criteria 1 and 2. 7-Study manual. 8-Inclusion criterion 8. 9-Clarifications in second set of exclusion criteria. 10-Re-screening criteria. 11-Subject identification number. 12-Identity of study drug. 13-EU SmPC and other updates for safety reasons to dosage and administration. 14-Treatment posology. 15-Drug storage. 16-Final visit or early termination visit. 17-Specification of pregnancy testing. 18-Timing of pregnancy testing. 19-Order of footnotes and minor clarifications in schedule of evaluations. 20-Removal of sample study drug injection protocol from appendix. 21-Re-check of eligibility criteria. 22-Post-injection ocular assessments. 23-Conduct of visits. 24-OCT. 25-FA and FP. 26-ECG. 27-Actions taken with study treatment. 28-Expected adverse events. 29-Pregnancies. 30-Time point of blood withdrawal. 31-NEI VFQ-25 questionnaire. 32-Data processing. 33-Subject information and consent process. 34-Fellow eye treatment. 35-Efficacy analyses – sensitivity analyses.

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
