

Clinical trial results:

A phase Ib/II, open-label, multicenter study of AEB071 and MEK162 in adult patients with metastatic uveal melanoma

Summary

EudraCT number	2013-000281-11
Trial protocol	DE NL ES GB IT
Global end of trial date	15 May 2015

Results information

Result version number	v1 (current)
This version publication date	13 July 2016
First version publication date	13 July 2016

Trial information

Trial identification

Sponsor protocol code	CMEK162X2203
-----------------------	--------------

Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT01801358
WHO universal trial number (UTN)	-

Sponsors

Sponsor organisation name	Array BioPharma, Inc.
Sponsor organisation address	3200 Walnut Street, Boulder, United States, 80301
Public contact	Clinical Operations, Array BioPharma, Inc., 1 303-381-6604, info@arraybiopharma.com
Scientific contact	Clinical Operations, Array BioPharma, Inc., 1 303-381-6604, info@arraybiopharma.com

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	15 May 2015
Is this the analysis of the primary completion data?	Yes
Primary completion date	15 May 2015
Global end of trial reached?	Yes
Global end of trial date	15 May 2015
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

Phase Ib

To estimate the MTD and/or RP2D of sotrastaurin in combination with binimetinib in patients with metastatic uveal melanoma.

Phase II

To estimate and compare the antitumor activity of the sotrastaurin and binimetinib combination (Arm 1) and binimetinib alone (Arm 2) in patients with metastatic uveal melanoma.

Protection of trial subjects:

The study was conducted according to the ethical principles of the Declaration of Helsinki.

Informed consent was obtained from each patient in writing before starting any study-specific procedure. The study was described by the Investigator or delegate, who answered any questions, and written information was also provided.

Background therapy:

N/A

Evidence for comparator:

N/A

Actual start date of recruitment	26 August 2013
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	United States: 7
Country: Number of subjects enrolled	Netherlands: 5
Country: Number of subjects enrolled	Spain: 6
Country: Number of subjects enrolled	United Kingdom: 2
Country: Number of subjects enrolled	France: 7
Country: Number of subjects enrolled	Germany: 11
Worldwide total number of subjects	38
EEA total number of subjects	31

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	27
From 65 to 84 years	11
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

The CMEK162X2203 study began recruitment on 26-Aug-2013 and concluded on 15-May-2015. Due to an enrollment halt, the Phase II part of the study was not conducted. The sponsor decided to permanently stop recruitment for the study prior to MTD determination.

Pre-assignment

Screening details:

Participant Flow and Baseline Demographics data represents the Full Analysis Set (FAS), which includes all patients who received at least one full or partial dose of sotrastaurin or binimetinib.

Not completed subjects represents subjects that stopped treatment early, due to the corresponding reason.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Blinding implementation details:

The CMEK162X2203 study was open-label, therefore blinding implementation details are not applicable.

Arms

Arm title	Phase Ib (Dose Escalation)
-----------	----------------------------

Arm description:

Combination of sotrastaurin and binimetinib administered orally bid.

Arm type	Experimental
Investigational medicinal product name	Sotrastaurin
Investigational medicinal product code	AEB071
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

Combination of sotrastaurin and binimetinib administered orally bid.

Investigational medicinal product name	Binimetinib
Investigational medicinal product code	MEK162
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

Combination of sotrastaurin and binimetinib administered orally bid.

Number of subjects in period 1	Phase Ib (Dose Escalation)
Started	38
Completed	0
Not completed	38
Physician decision	1

Consent withdrawn by subject	3
Adverse event, non-fatal	4
Disease Progression	30

Baseline characteristics

Reporting groups

Reporting group title	Overall Study
Reporting group description:	
The overall study reporting group is comprised of the Phase Ib part of the study, due to an enrollment halt during the Phase Ib dose-escalation part prior to determination of the MTD as dose escalation of sotrastaurin beyond the starting dose was prevented due to sub-optimal tolerability of the combination of sotrastaurin and binimetinib.

Statistical analyses

No statistical analyses for this end point

Secondary: Phase Ib/II: The Number of Subjects Experiencing At Least One Adverse Event (AE)

End point title	Phase Ib/II: The Number of Subjects Experiencing At Least One Adverse Event (AE)
End point description:	
An adverse event is defined as the appearance of (or worsening of any pre-existing) undesirable sign(s), symptom(s), or medical condition(s) that occur after patient's signed informed consent has been obtained.	
Due to an enrollment halt, the Phase II part of the study was not conducted. As EudraCT only allows numerical data entry, the value of 999 indicates "No Value", as no data was analyzed for this end point.	
End point type	Secondary
End point timeframe:	
From first dose of Cycle 1, Day 1 (C1D1) to time to progression (up to 18 months from Last Patient First Visit)	

End point values	Phase Ib: AEB071 150 mg bid + MEK162 45mg bid	Phase Ib: AEB071 200 mg bid + MEK162 45 mg bid	Phase Ib: AEB071 300 mg bid + MEK162 30 mg bid	Phase Ib: AEB071 300 mg bid + MEK162 45 mg bid

Statistical analyses

No statistical analyses for this end point

Secondary: Phase Ib/II: The Number of Subjects Experiencing At Least One Serious Adverse Event (SAE)

End point title	Phase Ib/II: The Number of Subjects Experiencing At Least One Serious Adverse Event (SAE)
End point description:	
Serious adverse event (SAE) is defined as one of the following:	
<ul style="list-style-type: none"> • Is fatal or life-threatening • Results in persistent or significant disability/incapacity • Constitutes a congenital anomaly/birth defect • Is medically significant • Requires inpatient hospitalization or prolongation of existing hospitalization • Note that hospitalizations for the following reasons should not be reported as serious adverse events: 	

- Routine treatment or monitoring of the studied indication, not associated with any deterioration in condition
- Elective or pre-planned treatment for a pre-existing condition that is unrelated to metastatic uveal melanoma and has not worsened since signing the informed consent
- Social reasons and respite care in the absence of any deterioration in the patient's general condition

Due to an enrollment halt, the Phase II part of the study was not conducted. As EudraCT only allows numerical data entry, the value of 999 indicates "No Value".

Statistical analyses

No statistical analyses for this end point

Secondary: Phase Ib: Assessment of The Preliminary Anti-tumor Activity - Best Overall Response (BOR)

End point title	Phase Ib: Assessment of The Preliminary Anti-tumor Activity - Best Overall Response (BOR)
-----------------	---

End point description:

Assessment of the preliminary anti-tumor activity of AEB071 and MEK162 in combination.

The best overall response is the best response recorded from the start of the treatment until disease progression/recurrence (taking as reference for PD the smallest measurements recorded since the treatment started). In general, the patient's best response assignment will depend on the achievement of both measurement and confirmation criteria.

End point type	Secondary

Statistical analyses

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Adverse Events (AEs) were collected throughout the duration of the trial, which began in August, 2013 and concluded in May, 2015.

Adverse event reporting additional description:

AE reporting is comprised of the Safety Set (SS), which is all patients who received at least one dose of AEB071 and MEK162, and have at least one valid post-baseline safety assessment.

Assessment type	Non-systematic
-----------------	----------------

Dictionary used

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
23 April 2013	<p>Protocol Amendment 1 introduced the following changes:</p> <ul style="list-style-type: none">- In order to further reduce the risk of excess toxicity of this novel combination, the starting dose of binimetinib was reduced to 30 mg bid, 50% of the single-agent MTD. The provisional dose levels were adjusted accordingly.- Due to uncertainties regarding the potential AEs associated with this novel combination, DLT criteria for elevations in total bilirubin, alanine aminotransferase (ALT), alkaline phosphatase, creatine kinase and worsening peripheral edema were modified, and eligibility criteria were modified to exclude patients with a serum creatinine > 1.5 x ULN.- Sotrastaurin is primarily metabolized by CYP3A4/5; therefore, the eligibility criteria were modified to exclude patients using medications and herbal supplements known to be strong inhibitors or inducers of CYP3A4/5.
27 November 2013	<p>Protocol Amendment 2 introduced the following changes:</p> <ul style="list-style-type: none">- In phase II, to allow comparison of the preliminary anti-tumor activity of the combination of sotrastaurin and binimetinib with single-agent binimetinib.- To change the primary endpoint of the phase II part of the study from ORR to PFS.- To implement a Novartis Steering Committee to review the results of the formal interim analysis for futility in Phase II and define the scope of decisions that were to be made based on the results.- To clarify and update the inclusion and exclusion criteria:<ul style="list-style-type: none">- Revised exclusion criterion #1 regarding active central nervous system lesions to align with binimetinib program standards.- Revised exclusion criterion #4 regarding history or current evident of retinal vein occlusion (RVO) or risk factors for RVO to align with binimetinib program standards.- Removed inclusion criterion regarding history of retinal degenerative disease.- Clarified exclusion criteria pertaining to prior exposure to a MEK inhibitor or a PKC inhibitor regarding patients who fail treatment in Phase Ib.- Revised exclusion criteria to extend period for contraception during dosing and after treatment discontinuation to 30 days to align with binimetinib program standards; also revised requirements for use of oral contraceptives to include use of a barrier method.- To introduce new and modify existing safety monitoring.- To include a blood sample request at baseline (Cycle 1, Day 1) and disease progression for assessment of circulating tumor DNA.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? Yes

Date	Interruption	Restart date
------	--------------	--------------

15 May 2015	Due to halted enrollment, the Phase II part of the study was not conducted. The Sponsor decided to permanently stop recruitment for the study prior to MTD determination. Remaining patients on treatment with binimetinib and sotrastaurin who were considered by the Investigator to be benefiting from their treatment could have continued treatment and were to be followed up as per protocol. No patients were ongoing as of the data cut-off date. After the last patient last visit (LPLV) was declared, the study was terminated.	-
-------------	---	---

Notes:

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

N/A

Notes:
