

## Clinical trial results:

### Efficacy of first line Dexamethasone, Rituximab and Cyclophosphamide (DRC) +/- Bortezomib for patients with Waldenström's Macroglobulinemia

#### Summary

EudraCT number	2013-000506-37
Trial protocol	CZ IT PT SE GR ES
Global end of trial date	17 April 2024

#### Results information

Result version number	v1 (current)
This version publication date	26 April 2025
First version publication date	26 April 2025
Summary attachment (see zip file)	ECWM-1_Summary of Results_08.04.2025 (ECWM-1_Sum of clin study results_final_1.0_20250408.pdf)

#### Trial information

##### Trial identification

Sponsor protocol code	ECWM-1
-----------------------	--------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT01788020
WHO universal trial number (UTN)	-

Notes:

Notes:

##### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	08 April 2025
Is this the analysis of the primary completion data?	Yes
Primary completion date	17 April 2024
Global end of trial reached?	Yes
Global end of trial date	17 April 2024
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

The primary objective of the trial is to evaluate whether the addition of Bortezomib to the combination regimen Dexamethasone/Rituximab/Cyclophosphamide (B-DRC) improves PFS compared to DRC alone.

Protection of trial subjects:

In this study safety was assessed by evaluating the following: reported adverse events, clinical laboratory test results, vital signs measurements, chest X-ray/CT, physical examination findings, monitoring of concomitant therapy. For each safety parameter, all findings were recorded in the CRF.

Background therapy:

-

Evidence for comparator:

-

Actual start date of recruitment	16 December 2013
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Portugal: 2
Country: Number of subjects enrolled	Spain: 4
Country: Number of subjects enrolled	Sweden: 5
Country: Number of subjects enrolled	Czechia: 7
Country: Number of subjects enrolled	France: 110
Country: Number of subjects enrolled	Germany: 48
Country: Number of subjects enrolled	Greece: 26
Worldwide total number of subjects	202
EEA total number of subjects	202

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0

Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	74
From 65 to 84 years	127
85 years and over	1

## Subject disposition

### Recruitment

Recruitment details:

First patient in: 28-Jan-2014

Date of early recruitment termination: 21-SEP-2018

Last patient last treatment: 17-APR-2019

Last patient completed Follow Up time: 16-APR-2024

### Pre-assignment

Screening details:

Clinicopathological diagnosis of WM as defined by consensus panel one of the Second International Workshop on WM and in need of treatment.

### Period 1

Period 1 title	Treatment period (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	arm A

Arm description:

induction standard arm (DRC)

Arm type	Active comparator
Investigational medicinal product name	Dexamethasone
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule, soft + tablet
Routes of administration	Oral use

Dosage and administration details:

20 mg p.o., Cycle 1-6, Day 1

Investigational medicinal product name	Rituximab IV
Investigational medicinal product code	
Other name	MabThera IV
Pharmaceutical forms	Concentrate for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

375 mg/m<sup>2</sup>, Cycle 1 Day 1

Investigational medicinal product name	Cyclophosphamide
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

100 mg/m<sup>2</sup> twice daily, Cycle 1-6, Day 1-5

Investigational medicinal product name	Rituximab SC
Investigational medicinal product code	
Other name	MabThera SC
Pharmaceutical forms	Solution for injection
Routes of administration	Solution for injection

Dosage and administration details:  
1400 mg absolute SC, cycle 2-6, day 1

<b>Arm title</b>	arm B
------------------	-------

Arm description:

induction experimental arm (DRC +B)

Arm type	Experimental
Investigational medicinal product name	Bortezomib
Investigational medicinal product code	
Other name	Velcade
Pharmaceutical forms	Powder for solution for injection
Routes of administration	Intravenous use, Subcutaneous use

Dosage and administration details:

1.6 mg/m<sup>2</sup> Cycle 1-6, Day 1, 8 and 15

Investigational medicinal product name	Rituximab IV
Investigational medicinal product code	
Other name	MabThera IV
Pharmaceutical forms	Concentrate for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

375 mg/m<sup>2</sup>, Cycle 1 Day 1

Investigational medicinal product name	Rituximab SC
Investigational medicinal product code	
Other name	MabThera SC
Pharmaceutical forms	Solution for injection
Routes of administration	Solution for injection

Dosage and administration details:

1400 mg absolute SC, cycle 2-6, day 1

Investigational medicinal product name	Dexamethasone
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule, soft + tablet
Routes of administration	Oral use

Dosage and administration details:

20 mg p.o., Cycle 1-6, Day 1

Investigational medicinal product name	Cyclophosphamide
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

100 mg/m<sup>2</sup> twice daily, Cycle 1-6, Day 1-5

<b>Number of subjects in period 1</b>	arm A	arm B
Started	100	102
Completed	82	89
Not completed	18	13
Adverse event, serious fatal	2	2
Consent withdrawn by subject	5	5
Screening failure	3	1
missing of relevant values	2	-
Progression during treatment	2	1
Adverse event, non-fatal	4	2
Additional malignancy during follow up	-	2

## Baseline characteristics

### Reporting groups

Reporting group title	arm A
-----------------------	-------

Reporting group description:

induction standard arm (DRC)

Reporting group title	arm B
-----------------------	-------

Reporting group description:

induction experimental arm (DRC +B)

Reporting group values	arm A	arm B	Total
Number of subjects	100	102	202
Age categorical			
Units: Subjects			
Adults (18-64 years)	36	38	74
From 65-84 years	64	63	127
85 years and over	0	1	1
Gender categorical			
Units: Subjects			
Female	33	34	67
Male	67	68	135

## End points

### End points reporting groups

Reporting group title	arm A
Reporting group description: induction standard arm (DRC)	
Reporting group title	arm B
Reporting group description: induction experimental arm (DRC +B)	
Subject analysis set title	ITT population
Subject analysis set type	Intention-to-treat
Subject analysis set description: The intention-to-treat (ITT) population includes all patients randomized for induction regardless of study drug being received or not or other protocol violations. According to the ITT, patients from the ITT population were analysed based on assigned treatment group per induction randomization. Patients without staging during induction were excluded for the evaluation of remission rates.	
Subject analysis set title	Safety population
Subject analysis set type	Safety analysis
Subject analysis set description: For safety analyses, patients who started treatment were evaluated according to the treatment actually received (as treated).	

### Primary: Progression free survival (PFS)

End point title	Progression free survival (PFS)
End point description:	
End point type	Primary
End point timeframe: From date of inclusion to the following events: the date of progression and the date of death if it occurred earlier. In the absence of progression and death, PFS duration is censored at the stopping date or the date of last follow-up.	

End point values	arm A	arm B		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	100	102		
Units: month				
number (not applicable)	50.1	60.0		

### Statistical analyses

Statistical analysis title	Primary analysis PFS
Comparison groups	arm B v arm A

Number of subjects included in analysis	202
Analysis specification	Pre-specified
Analysis type	superiority
P-value	= 0.64
Method	Logrank
Parameter estimate	Hazard ratio (HR)
Point estimate	0.914
Confidence interval	
level	95 %
sides	2-sided
lower limit	0.629
upper limit	1.329

### Secondary: Remission duration (RD)

End point title	Remission duration (RD)
End point description:	
End point type	Secondary
End point timeframe:	
Calculated in patients with response (CR, VGPR, PR, MR) from end of induction to the date of progression, relapse or death from any cause. Patients alive without progression and relapse is censored at the latest tumor assessment date.	

End point values	arm A	arm B		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	100	102		
Units: month				
number (not applicable)	43.5	51.1		

### Statistical analyses

<b>Statistical analysis title</b>	remission duration
Comparison groups	arm A v arm B
Number of subjects included in analysis	202
Analysis specification	Pre-specified
Analysis type	superiority
P-value	= 0.64
Method	Logrank

### Secondary: Time to next treatment (TNT)

End point title	Time to next treatment (TNT)
-----------------	------------------------------

End point description:

End point type	Secondary
----------------	-----------

End point timeframe:

Time to next treatment (TNT) is defined as the time of randomization to start of new anti-cancer therapy. Patients alive without new anti-cancer therapy are censored at the latest tumor assessment date.

End point values	arm A	arm B		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	100	102		
Units: month				
number (not applicable)	67.5	68.8		

### Statistical analyses

Statistical analysis title	time to next treatment
Comparison groups	arm B v arm A
Number of subjects included in analysis	202
Analysis specification	Post-hoc
Analysis type	superiority
P-value	= 0.98
Method	Logrank

### Secondary: Cumulative incidence of first response

End point title	Cumulative incidence of first response
-----------------	--

End point description:

End point type	Secondary
----------------	-----------

End point timeframe:

4-months cumulative incidence

End point values	arm A	arm B		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	100	102		
Units: %				
number (confidence interval 95%)	61 (52 to 70)	73 (64 to 81)		

## Statistical analyses

<b>Statistical analysis title</b>	cumulative incidence of first response
Comparison groups	arm A v arm B
Number of subjects included in analysis	202
Analysis specification	Post-hoc
Analysis type	superiority
P-value	= 0.83
Method	Fine and gray test

## Secondary: Response rate (RR) and overall response rate (ORR) after therapy

End point title	Response rate (RR) and overall response rate (ORR) after therapy
End point description:	
End point type	Secondary
End point timeframe:	
four weeks after end of induction therapy	

End point values	arm A	arm B	ITT population	
Subject group type	Reporting group	Reporting group	Subject analysis set	
Number of subjects analysed	90	94	184	
Units: %				
number (not applicable)				
Complete remission/response	1.1	2.1	1.6	
Very good partial response	8.9	15.8	12.4	
Partial remission	56.7	60.0	58.5	
Minor response	21.1	15.8	18.4	
Stable disease	8.9	4.2	6.5	
Progressive disease	3.3	2.1	2.7	
ORR (CR, VGPR, PR, MR)	87.7	93.7	90.8	

## Statistical analyses

<b>Statistical analysis title</b>	response rate
Comparison groups	arm A v arm B
Number of subjects included in analysis	184
Analysis specification	Pre-specified
Analysis type	superiority
P-value	= 0.35
Method	Fisher exact

**Secondary: Best response**

End point title	Best response
-----------------	---------------

End point description:

End point type	Secondary
----------------	-----------

End point timeframe:

from end of induction therapy to end of follow-up

End point values	arm A	arm B	ITT population	
Subject group type	Reporting group	Reporting group	Subject analysis set

Method	Fine and gray test

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

All adverse events will be recorded from the time the subject receives study treatment to 28 days after the last dose of treatment.

Adverse event reporting additional description:

All subjects will be monitored for AEs during the study. Assessments may include monitoring of any or all of the following parameters: the subject's clinical symptoms, laboratory, pathological, radiological or surgical findings, physical examination findings, or other appropriate tests and procedures.

Assessment type	Systematic

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
21 September 2018	The study was conducted as planned in the protocol until 21-SEP-2018 when the recruitment was terminated early. 202 patients (instead of 384) were recruited over a period of 4 years and 8 months before the study prematurely stopped recruitment. Planned duration of recruitment was approximately 3.3 years. The early recruitment termination was due to the fact that the treatment landscape had changed tremendously through ibrutinib availability.

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
