

Clinical trial results:

Efficacy and safety of semaglutide once-weekly versus placebo in drug-naïve subjects with type 2 diabetes

Summary

EudraCT number	2013-000632-94
Trial protocol	IT GB
Global end of trial date	08 May 2015

Results information

Result version number	v1 (current)
This version publication date	20 May 2016
First version publication date	20 May 2016

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	22 February 2016
Is this the analysis of the primary completion data?	Yes
Primary completion date	08 May 2015
Global end of trial reached?	Yes
Global end of trial date	08 May 2015
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To demonstrate superiority of once-weekly dosing of two dose levels of semaglutide versus placebo on glycaemic control after 30 weeks of treatment in drug-naïve subjects with type 2 diabetes

Protection of trial subjects:

The trial was conducted in accordance with the Declaration of Helsinki, ICH Good Clinical Practice, EN ISO 14155 Part 1 and 2 and FDA 21 CFR 312.120

Background therapy:

Not applicable.

Evidence for comparator:

Not applicable.

Actual start date of recruitment	03 February 2014
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	United Kingdom: 25
Country: Number of subjects enrolled	Italy: 27
Country: Number of subjects enrolled	Canada: 39
Country: Number of subjects enrolled	Japan: 61
Country: Number of subjects enrolled	Mexico: 33
Country: Number of subjects enrolled	Russian Federation: 52
Country: Number of subjects enrolled	South Africa: 26
Country: Number of subjects enrolled	United States: 124
Worldwide total number of subjects	387
EEA total number of subjects	52

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0

Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	317
From 65 to 84 years	69
85 years and over	1

Subject disposition

Recruitment

Recruitment details:

There were 72 sites in 8 countries that randomised subjects: Canada: 7 sites; Italy: 6 sites; Japan: 5 sites; Mexico: 2 sites; Russian Federation: 8 sites; South Africa: 8 sites; United Kingdom: 4 sites; United States: 32 sites.

Pre-assignment

Screening details:

Not applicable.

Period 1

Period 1 title	Overall study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Blinding implementation details:

Semaglutide and placebo were supplied in similar 1.5 mL pre-filled PDS290 pen-injector and were by all means visually identical and were packed and labelled to fulfil the requirements for double blind procedures. Furthermore, equal volumes of semaglutide and placebo were administered during treatment ensuring blinding within dose-level.

Arms

Are arms mutually exclusive?	Yes
Arm title	Semaglutide 0.5 mg

Arm description:

Subjects were given 0.25 mg semaglutide once weekly for 4 weeks followed by 0.5 mg semaglutide once weekly for the remaining 26 weeks of the treatment period.

Arm type	Experimental
Investigational medicinal product name	Semaglutide B 1.34 mg/ml PDS290
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection in pre-filled pen
Routes of administration	Subcutaneous use

Dosage and administration details:

Subjects were given 0.25 mg semaglutide once weekly for 4 weeks followed by 0.5 mg semaglutide once weekly for the remaining 26 weeks of the treatment period. Administered subcutaneously (s.c., under the skin).

Arm title	Semaglutide 1.0 mg
------------------	--------------------

Arm description:

Subjects were given 0.25 mg semaglutide once weekly for 4 weeks, 0.5 mg semaglutide once weekly for the next 4 weeks followed by 1.0 mg semaglutide once weekly for the remaining 22 weeks of the treatment period.

Arm type	Experimental
Investigational medicinal product name	Semaglutide B 1.34 mg/ml PDS290
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection in pre-filled pen
Routes of administration	Subcutaneous use

Dosage and administration details:

Subjects were given 0.25 mg semaglutide once weekly for 4 weeks, 0.5 mg semaglutide once weekly for the next 4 weeks followed by 1.0 mg semaglutide once weekly for the remaining 22 weeks of the treatment period. Administered subcutaneously (s.c., under the skin).

Arm title	Placebo
------------------	---------

Arm description:

Subjects randomised to either of the 2 different placebo arms, i.e., placebo 0.5 mg arm or placebo 1.0 mg arm. These 2 placebo arms were pooled together for data analysis.

- a. Placebo 0.5 mg arm: Subjects were given 0.25 mg placebo once weekly for 4 weeks followed by 0.5 mg placebo once weekly for the remaining 26 weeks of the treatment period.
- b. Placebo 1.0 mg arm: Subjects were given 0.25 mg placebo once weekly for 4 weeks, 0.5 mg placebo once weekly for the next 4 weeks followed by 1.0 mg placebo once weekly for the remaining 22 weeks of the treatment period.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection in pre-filled pen
Routes of administration	Subcutaneous use

Dosage and administration details:

Placebo 0.5 mg arm: Subjects were given 0.25 mg placebo once weekly for 4 weeks followed by 0.5 mg placebo once weekly for the remaining 26 weeks of the treatment period. Administered subcutaneously (s.c., under the skin).

Placebo 1.0 mg arm: Subjects were given 0.25 mg placebo once weekly for 4 weeks, 0.5 mg placebo once weekly for the next 4 weeks followed by 1.0 mg placebo once weekly for the remaining 22 weeks of the treatment period. Administered subcutaneously (s.c., under the skin).

Number of subjects in period 1	Semaglutide 0.5 mg	Semaglutide 1.0 mg	Placebo
Started	128	130	129
Completed	119	123	117
Not completed	9	7	12
Lost to follow-up	4	2	7
Missing follow-up information	3	5	3

Adverse events

Adverse events information

Timeframe for reporting adverse events:

From the first trial product dose (visit 2) till the date of the end-of-treatment follow-up visit (visit 11) or on the date of the last trial product dose plus 42 days (5 weeks plus the 7 days visit window).

Adverse event reporting additional description:

Safety analysis set (SAS) included all randomised subjects who had received at least 1 dose of randomised semaglutide or placebo.

Infections and infestations			
Nasopharyngitis			
subjects affected / exposed	6 / 128 (4.69%)	7 / 129 (5.43%)	6 / 130 (4.62%)
occurrences (all)	7	9	9

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
25 March 2014	The main objective was to update the definition of hypoglycaemia and to include an additional hypoglycaemic endpoint on severe or BG-confirmed symptomatic hypoglycaemic episodes and associated statistical analysis and minor updates for general clarification.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
