

## Clinical trial results:

**Secured access to crizotinib for patients with tumors harboring a genomic alteration on one of the biological targets of the drug.**

### Summary

EudraCT number	2013-000885-13
Trial protocol	FR
Global end of trial date	12 December 2023

### Results information

Result version number	v1 (current)
This version publication date	21 June 2025
First version publication date	21 June 2025

### Trial information

#### Trial identification

Sponsor protocol code	UC-0105/1303
-----------------------	--------------

#### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT02034981
WHO universal trial number (UTN)	-

### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	30 October 2020
Is this the analysis of the primary completion data?	Yes
Primary completion date	07 March 2018
Global end of trial reached?	Yes
Global end of trial date	12 December 2023
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

The objective of this study is to explore the efficacy of crizotinib as a single agent across diverse type of tumors guided by the presence of identified activating molecular alterations in the crizotinib-target genes, per cohort, per pathology and per target.

Protection of trial subjects:

This study was conducted in compliance with the protocol, in accordance with the French national regulatory requirements and the Declaration of Helsinki (1964) and subsequent amendments, ICH Good Clinical Practice (GCP) Guidelines (CPMP/ICH/135/95), the European Directive (2001/20/CE) and the applicable local regulatory requirements and laws.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	05 August 2013
Long term follow-up planned	Yes
Long term follow-up rationale	Safety, Efficacy
Long term follow-up duration	2 Years
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	France: 238
Worldwide total number of subjects	238
EEA total number of subjects	238

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	2
Children (2-11 years)	16
Adolescents (12-17 years)	9
Adults (18-64 years)	135

From 65 to 84 years	72
85 years and over	4

## Subject disposition

### Recruitment

Recruitment details:

From August 2013 to March 2018, 538 patients were screened of which 246 were included across 89 centers. Among patients included, 238 were treated and received at least one dose of crizotinib. Among the 238 patients included and treated 66 had an anomaly ALK, 122 an anomaly MET, 49 an anomaly ROS1 and one patient had abnormality FUSION ETV6-NTRK.

### Pre-assignment

Screening details:

Twenty-two cohorts were identified, a cohort being defined as [one pathology, one target alteration]. The pediatric cohort which gathered several rare pediatric diseases harboring at least one crizotinib target alteration and a miscellaneous adults disease cohort were added. The expected treatment duration per patient was 6 months.

### Period 1

Period 1 title	Overall trial (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

### Arms

Arm title	Crizotinib
-----------	------------

Arm description:

All eligible patients entering the study received oral crizotinib, daily continuously:

- 250 mg twice daily (BID) for adults  $\geq 18$  years of age.
- 280 mg/m<sup>2</sup> twice daily (BID) for children and adolescents aged from one 1 to 17 (except ALCL).
- 165 mg/m<sup>2</sup> twice daily (BID) for ALCL patients aged from one 1 to 17 years.

Arm type	Experimental
Investigational medicinal product name	Crizotinib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule, hard, Oral solution
Routes of administration	Oral use

Dosage and administration details:

- 250 mg twice daily (BID) for adults  $\geq 18$  years of age
- 280 mg/m<sup>2</sup> twice daily (BID) for children and adolescents aged from one 1 to 17 (except ALCL).
- 165 mg/m<sup>2</sup> twice daily (BID) for ALCL patients aged from one 1 to 17.

The oral liquid formulation could be administered to adult patients with inability to swallow due to the compression of the tumor (e.g. dysphagia in anaplastic thyroid cancer).

Number of subjects in period 1	Crizotinib
Started	238
Completed	2
Not completed	236
Patient refusal	4
Physician decision	24
Disease progression	164
Other decision	2

Death	5
Adverse event	36
Promotor decision	1

## Baseline characteristics

### Reporting groups

Reporting group title	Overall trial (overall period)
-----------------------	--------------------------------

Reporting group description:

246 patients were included and 238 patients received at least 1 dose of crizotinib. Among the 24 cohorts set up in this study, 13 cohorts did not enroll enough patients at stage 1 to perform the efficacy analysis.

9 cohorts that included and treated enough patients for efficacy and safety analysis:

1- Cohorts without efficacy signals in stage 1:

- Colorectal (MET-amp) cohort N°3
- Glioblastoma (MET-amp), cohort N°18
- Neuroblastoma (ALK-amp/ALK-mut) cohort N°15

2- Cohorts with efficacy signals in stage 1 but did not enroll patients in stage 2

- Oesogastric (MET-amp) cohort N°8
- IMT (ALK-trans or ROS1-trans) cohort N°16

3- Cohorts with efficacy signals in stage 1 that enrolled patients in stage 2

- NSCLC (ROS1-trans) cohort N°6
- NSCLC (MET-mut) cohort N°22
- NSCLC (MET-amp) cohort N°5
- ALCL (ALK-trans) cohort N°1

### Primary: The objective response rate (ORR)

End point title	The objective response rate (ORR) <sup>[1]</sup>
-----------------	--

End point description:

Anti-tumor activity of crizotinib, as the primary objective of the trial, will be carried out by the determination of the objective response assessed in each cohort defined by a pathology associated with a crizotinib target alteration.

The objective response is defined as either a complete response (CR) or partial response (PR) according to Response Evaluation Criteria in Solid Tumors (RECIST) 1.1 criteria.

At the time of analyses, 13 of the 24 cohorts did not enroll enough patients to analyze efficacy at stage 1, with four cohorts that did not include patients.

NB:

- ALCL, anaplastic large cell lymphoma; ALK, anaplastic lymphoma kinase; ROS1, c-ros oncogene 1; NSCLC, non-small cell lung cancer;

- Patient in the NSCLC (ROS1-trans) cohort died early during treatment and was not evaluable after 2 cycles and during crizotinib treatment.

6 Patients in the ALCL (ALK-trans) cohort stopped crizotinib for another treatment and was not evaluable after 2 cycles and during crizotinib trt.

End point type	Primary
----------------	---------

End point timeframe:

Determined after 8 weeks (2 cycles) of treatment.

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: This endpoint was descriptive; hence no statistical analysis to report

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Safety profile will be assessed during the whole treatment period (6 months expected in average) followed by a 2-year post-treatment follow-up period, and reported during the visits scheduled by the study flow chart

Adverse event reporting additional description:

For non serious adverse events only treatment-related adverse events (TRAEs) were available. The number of occurrence are not available and will be always noted "1".

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
25 July 2014	<ul style="list-style-type: none"><li>- Modification of the inclusion criteria.</li><li>- Modification of the non-inclusion criteria.</li><li>- Modification of primary endpoint assessment: assessment of tumor response for glioblastomas was carried out according to the RANO criteria and according to the two-dimensional WHO criteria for pediatric patients with a high-grade glioma or brainstem tumor.</li><li>- Concomitant treatments: Corticosteroids to control intracranial pressure in patients with primary or secondary brain tumors were authorized; Antiplatelet drugs and anticoagulant drugs in curative dosage were prohibited within 7 days before the first dose of crizotinib and throughout the treatment period.</li><li>- Modification and opening of cohorts (Crizotinib treatment possible in all cohorts of all pathologies presenting brain metastases; Opening of the current cohort N° 18 "Glioblastoma, adults, MET amplified"; Opening of the current cohort N° 18 "Glioblastoma, adults, MET amplified"; Modification of cohort N° 19 "Anaplastic thyroid cancer, adults, ALK mutated"; Precision of cohort N°21 "Miscellaneous rare pediatric diseases associated to at least one specific alteration in one crizotinib target, same or different from those listed above (i.e. AXL)" to clarify which pathologies could be addressed in the screening circuit and subsequently included in this cohort; Addition of current cohort N°24 "miscellaneous adult tumors" in which all new cases resulting from genome-wide profiling was included for crizotinib treatment.</li><li>- Update of the rationale: clarification concerning cohort N°7 including patients suffering from breast cancer with ALK translocation and precisions regarding cohorts including patients with thyroid tumors.</li><li>- Addition of a secondary objective taste assessment of the liquid form.</li><li>- Precisions on crizotinib treatment.</li><li>- Change of pharmaceutical service provider.</li><li>- Addition of steering committee members.</li><li>- Flow chart updated.</li></ul>
26 September 2016	<ul style="list-style-type: none"><li>- Modification and opening of cohorts (opening of the current cohort N°22 "NSCLC and pulmonary sarcomatoid carcinoma, adults, MET mutated; Opening of the current cohort N°23 "Glioblastoma, adults, MET polysomy of chromosome 7; Extension of the previous cohort N°16 "Inflammatory Myofibroblastic Tumor (IMT) children and adults ALK translocation" to "IMT, children and adults, ALK-translocated + ROS1-translocated; Extension of the previous cohort N°8 "Gastric cancer, adults, MET amplified" to "Gastric cancer and adenocarcinoma of the esophagus, adults, MET amplified; Extension of the previous cohort N°9 "Cholangiocarcinoma, adults, ROS1-translocated " to "Biliary carcinoma, adults, ROS1-translocated.</li><li>- Prolongation of the inclusion period by one year (from 3 years to 4 years).</li><li>- Crizotinib IB updated (Version October 2015).</li><li>- Modification of exclusion criteria N°6 subsection j) and m) to include patient with hepatitis B or C who had already been treated and were non-replicating, and patients with stable cirrhosis with a Child-Pugh score equal to A.</li><li>- Precisions of Serious Adverse Events definition and reporting.</li><li>- Logos of the Inca and the Foundation ARC were updated.</li></ul>
13 September 2017	<ul style="list-style-type: none"><li>- Modification of the investigators list.</li><li>- Prolongation of the inclusion period by 6 months (from 4 years to 4.5 years).</li></ul>

Notes:

---

## **Interruptions (globally)**

Were there any global interruptions to the trial? No

## **Limitations and caveats**

None reported
