Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	08 August 2017
Is this the analysis of the primary completion data?	Yes
Primary completion date	20 April 2017
Global end of trial reached?	Yes
Global end of trial date	28 July 2017
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

The primary study objective is:

To evaluate the efficacy of maintenance therapy with single-agent PankoMab-GEX™ compared to placebo as assessed by progression free survival (PFS) following chemotherapy in patients with recurrent epithelial ovarian carcinoma.

Protection of trial subjects:

The protocol (and any amendments) and the statement of informed consent were approved by an independent ethics committee (IEC) prior to each center's Initiation.

The study was conducted in accordance with the Declaration of Helsinki and its revisions as well as with the valid national law(s) of the participating country/ies, with the International Conference on Harmonisation (ICH) Harmonised Tripartite Guideline for Good Clinical Practice (GCP) (E6) issued in July 1996, and with the Directive 2001/20/EC and Regulation EU No 536/2014. Each investigator conducted the study according to applicable local or regional regulatory requirements and applicable national regulations.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	08 July 2013
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Poland: 36
Country: Number of subjects enrolled	Spain: 29
Country: Number of subjects enrolled	United Kingdom: 15
Country: Number of subjects enrolled	Germany: 32
Country: Number of subjects enrolled	Hungary: 10
Country: Number of subjects enrolled	Italy: 37
Country: Number of subjects enrolled	Russian Federation: 35
Country: Number of subjects enrolled	Romania: 22
Worldwide total number of subjects	216
EEA total number of subjects	181

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	131
From 65 to 84 years	84
85 years and over	1

Subject disposition

Recruitment

Recruitment details:

At Pre-screening, the general eligibility of the patients for study participation was assessed by confirmation of TA-MUC 1 +, recurrent epithelial ovarian or fallopian-tube cancer, or primary peritoneal cancer with high-grade (Grade 2 or 3) serous features or a serous component.

Pre-assignment

Screening details:

Patients had to have recurrent epithelial primary ovarian, fallopian tube, or high grade primary peritoneal cancer, immune-histologically confirmed as TA-MUC1-positive (immuno-reactive score [IRS] ≥ 3). Patients had to have received at least 2 lines but not more than 5 lines of chemotherapy prior to the start of maintenance treatment.

Pre-assignment period milestones

Number of subjects started	216
Number of subjects completed	216

Period 1

Period 1 title	Treatment period (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Assessor

Blinding implementation details:

Patients who met all of the eligibility criteria for the study were randomized by centralized IWRS in a 2:1-ratio to receive either PankoMab-GEX™ or placebo.

Arms

Are arms mutually exclusive?	Yes
Arm title	Pankomab-GEX
Arm description: -	
Arm type	Experimental
Investigational medicinal product name	Pankomab-GEX
Investigational medicinal product code	
Other name	Gatipotuzumab
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Patients received a starting dose of 500 mg PankoMab-GEX™ on Day 1 of the study (start of Cycle 0). Thereafter, PankoMab-GEX™ (1700 mg) was administered on the first day of each 3-week treatment cycle, starting on Day 8 after randomization (start of Cycle 1). Patients continued to receive treatment with a 3-week interval (q3w) \pm 3 days until disease progression (according modified RECIST V1.1 irRC; i.e. increase of CA125 alone was no criterion for disease progression) or until they exhibited any discontinuation criteria.

Arm title	Placebo
Arm description: -	
Arm type	Placebo

Investigational medicinal product name	Saline solution
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Route of administration: i.v. over 3 hours matching Pankomab-GEX

Number of subjects in period 1	Pankomab-GEX	Placebo
