

## Clinical trial results:

### Mucosal immune regulation by high dose vitamin D treatment in Crohn's disease

#### Summary

EudraCT number	2013-000971-34
Trial protocol	DK
Global end of trial date	22 November 2018

#### Results information

Result version number	v1 (current)
This version publication date	24 June 2020
First version publication date	24 June 2020
Summary attachment (see zip file)	summary (Summary.pdf)

#### Trial information

##### Trial identification

Sponsor protocol code	01052013
-----------------------	----------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	-
WHO universal trial number (UTN)	-

Notes:

##### Sponsors

Sponsor organisation name	Aarhus University Hospital
Sponsor organisation address	Palle Juul Jensens boulevard 99, Aarhus N, Denmark, 8200
Public contact	Jørgen Agnholt, Hepatology and Gastroenterology department, Aarhus University Hospital, joeragnh@rm.dk
Scientific contact	Jørgen Agnholt, Hepatology and Gastroenterology department, Aarhus University Hospital, joeragnh@rm.dk

Notes:

##### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	30 May 2020
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	22 November 2018
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

We hypothesises that treatment with high dose vitamin D alone or combined with infliximab to Crohn's disease patients with disease activity increases the anti-inflammatory response in the intestinal mucosa. This would result in changed VDR expression in mucosa together with changed expression of IL17A, IL17F, IL22 and IL4 in mucosa compared to placebo.

Secondary vitamin D treatment decreases the disease activity measured by inflammatory markers and endoscopic score. Other pro- and anti-inflammatory mucosal cytokines will also be affected by vitamin D treatment.

The intervention was 7 weeks. Afterwards all patients were admitted to open infliximab treatment as standard treatment and was followed 52 weeks or until their infliximab treatment was stopped.

10 healthy were included to test if high dose vitamin D also had impact on healthy intestinal mucosa. The results from the healthy is already published (N. F: Bak 2018, Eur J Nutr)

Protection of trial subjects:

Laboratory analyses for adverse reactions related to the Infliximab and Cholecalciferol treatment will be carried out at baseline, week 2 and 6. Safety markers are collected at screening. Chest X-ray is performed at screening if this has not been done within the last year – or if participants have been exposed to TB-endemic areas after prior TB screening.

Blood samples were done the day of the control visit to minimise the number of hospitalvisits.

Colonoscopy/sigmideoscopy

When the endoscope is moved forward it can cause a slight to moderate discomfort like a feeling like too much air in the intestines. To reduce this, patients were offered treatment with midazolam and fentanyl during the examination. There are no pain sensing nerves in the intestinal mucosa and therefore, the biopsy procedure is usually not associated with pain. There is a minor risk of bleeding and perforation of the intestine during colonoscopy. The risk is approximately 1:1000 in elderly with intestinal disease (inflammation, ischemia or tumour). The risk is estimated to be less than 1:1000 in healthy individuals. The risks will be minimised since experienced physicians will perform all colonoscopies.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	01 July 2014
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Denmark: 40
Worldwide total number of subjects	40
EEA total number of subjects	40

Notes:

<b>Subjects enrolled per age group</b>	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	40
From 65 to 84 years	0
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details: -

### Pre-assignment

Screening details:

Patients with colon or/and ilieocecal Crohn's disease with active disease assessed by HBI score recruited. Patients were screened with blood samples, urine examinations, x-ray and finally colonoscopy according to in- and exclusion criteria.

### Period 1

Period 1 title	overall trial (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor

Blinding implementation details:

patients are blinded until week 7 . afterwards all patients in follow up are treated with open infliximab

### Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

<b>Arm title</b>	Infliximab+vitamin D
------------------	----------------------

Arm description: -

Arm type	Experimental
Investigational medicinal product name	infliximab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder for concentrate and solution for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

5 mg/kg infused over 3 hours

Investigational medicinal product name	dekristol
Investigational medicinal product code	
Other name	Vitamin D3
Pharmaceutical forms	Capsule, soft
Routes of administration	Oral use

Dosage and administration details:

5 mg as a bolus and afterwards 0.5 mg daily in 7 weeks

<b>Arm title</b>	Infliximab+placebo vitamin D
------------------	------------------------------

Arm description: -

Arm type	Active comparator
Investigational medicinal product name	infliximab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder for concentrate and solution for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

5 mg/kg infused over 3 hours

Investigational medicinal product name	placebo dekristol
Investigational medicinal product code	
Other name	

Pharmaceutical forms	Capsule, soft
Routes of administration	Oral use

Dosage and administration details:  
 placebo capsules, same amount as the active drug

<b>Arm title</b>	Placebo infliximab+Vitamin D
------------------	------------------------------

Arm description: -

Arm type	Experimental
Investigational medicinal product name	dekristol
Investigational medicinal product code	
Other name	Vitamin D3
Pharmaceutical forms	Capsule, soft
Routes of administration	Oral use

Dosage and administration details:  
 5 mg as a bolus and afterwards 0.5 mg daily in 7 weeks

Investigational medicinal product name	natriumchloride
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Infusion
Routes of administration	Intravenous use

Dosage and administration details:  
 placebo infliximab same amount was given as the active drug

<b>Arm title</b>	PLacebo infliximab+placebo vitamin D
------------------	--------------------------------------

Arm description: -

Arm type	Placebo
Investigational medicinal product name	placebo dekristol

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

adverse event are reported separately during week 0 to 7 the intervention and separately from follow up week 8 to 52.

Adverse event reporting additional description:

patients were questioned if they have had adverse events every time they went for control visits

Assessment type	Non-systematic

## **More information**

### **Substantial protocol amendments (globally)**

Were there any global substantial amendments to the protocol? No

---

### **Interruptions (globally)**

Were there any global interruptions to the trial? No

### **Limitations and caveats**

None reported
