

Clinical trial results:

A randomized, double-blind, placebo-controlled phase III multicenter study of secukinumab to demonstrate the efficacy at 16 weeks and to assess the long-term safety, tolerability and efficacy up to 3 years in subjects with active ankylosing spondylitis

Summary

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	11 December 2017
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	11 December 2017
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The primary objective was to demonstrate that at least one dose of secukinumab (150 mg s.c. or 300 mg s.c.) at Week 16 is superior to placebo in patients with active AS (despite current or previous NSAID, DMARD and/or anti-TNF α therapy) based on the proportion of patients achieving an ASAS 20 (Assessment of Spondyloarthritis International Society criteria) response.

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and the International Conference on Harmonization (ICH) Good Clinical Practice (GCP) guidelines. All the local regulatory requirements pertinent to safety of trial subjects were also followed during the conduct of the trial.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	14 January 2014
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects**Subjects enrolled per country**

Country: Number of subjects enrolled	Belgium: 12
Country: Number of subjects enrolled	Czech Republic: 42
Country: Number of subjects enrolled	United Kingdom: 9
Country: Number of subjects enrolled	Greece: 8
Country: Number of subjects enrolled	Mexico: 27
Country: Number of subjects enrolled	Portugal: 8
Country: Number of subjects enrolled	Russian Federation: 34
Country: Number of subjects enrolled	Spain: 15
Country: Number of subjects enrolled	United States: 24
Country: Number of subjects enrolled	Germany: 47
Worldwide total number of subjects	226
EEA total number of subjects	141

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	221
From 65 to 84 years	5
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Patients were randomized to one of three treatment groups (1:1:1) and planned to be treated for 156 weeks.

At Week 16, subjects who were randomized to placebo were re-randomized to secukinumab 150 mg or 300 mg.

Patients were enrolled in 54 centers in Germany, Spain, United States, Czech Republic, Belgium, Greece, Mexico, Portugal, Russia and UK

Pre-assignment

Screening details:

A screening period (SCR) running up to 10 weeks before randomization was used to assess eligibility.

Period 1

Period 1 title	Primary Assessment (up to Week 16)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Data analyst

Blinding implementation details:

This study was a double-blind, double-dummy, randomized treatment trial until the Week 52 analysis was completed and thereafter was open label.

Arms

Are arms mutually exclusive?	Yes
Arm title	Secukinumab 10 mg/kg i.v. / 150 mg s.c.

Arm description:

Three i.v. infusions: at Baseline and weeks 2 and 4, followed by one s.c. injection every four weeks until the end of the study.

Arm type	Experimental
Investigational medicinal product name	secukinumab
Investigational medicinal product code	AIN457
Other name	Cosentyx®
Pharmaceutical forms	Solution for infusion, Solution for injection in pre-filled syringe
Routes of administration	Intravenous use, Subcutaneous use

Dosage and administration details:

secukinumab i.v. (10 mg/kg) at BSL, Weeks 2 and 4, followed by secukinumab 150 mg s.c. (1.0 mL) plus placebo s.c. (1.0 mL) every 4 weeks starting at Week 8 through Week 152

Arm title	Secukinumab 10 mg/kg i.v. / 300 mg s.c.
------------------	---

Arm description:

Three i.v. infusions: at Baseline and weeks 2 and 4, followed by one s.c. injection every four weeks until the end of the study.

Arm type	Experimental
Investigational medicinal product name	secukinumab
Investigational medicinal product code	AIN457
Other name	Cosentyx®
Pharmaceutical forms	Solution for infusion, Solution for injection in pre-filled syringe
Routes of administration	Intravenous use, Subcutaneous use

Dosage and administration details:

secukinumab i.v. (10 mg/kg) at BSL, Weeks 2 and 4, followed by secukinumab 300 mg s.c. (2 x 1.0 mL) every 4 weeks starting at Week 8 through Week 152

Arm title	Placebo i.v. and s.c.
------------------	-----------------------

Arm description:

Three i.v. infusions: at Baseline and weeks 2 and 4, followed by one s.c. injection at weeks 8 and 12. At week 16, 36 patients were re-randomised to Secukinumab 150mg and 37 patients to Secukinumab 300mg until the end of the study.

Arm type	Placebo
Investigational medicinal product name	placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion, Solution for injection in pre-filled syringe
Routes of administration	Intravenous use, Subcutaneous use

Dosage and administration details:

placebo i.v. at BSL, Weeks 2 and 4, followed by placebo s.c. at Weeks 8 and 12. At Week 16 subjects were re-randomized to receive secukinumab 150 mg plus placebo or secukinumab 300 mg (1:1) every 4 weeks through Week 152.

Number of subjects in period 1	Secukinumab 10 mg/kg i.v. / 150 mg s.c.	Secukinumab 10 mg/kg i.v. / 300 mg s.c.	Placebo i.v. and s.c.

Secondary: Prefilled syringe patient satisfaction assessment

End point title	Prefilled syringe patient satisfaction assessment
End point description:	
The self-injection assessment questionnaire (SIAQ) measures overall patient experience with subcutaneous self-injection at applicable visits. Domain scores ranging from 0 (worst experience) to 10 (best experience) are presented: Feeling about injections, Self-confidence, Satisfaction with self-injection.	
End point type	Secondary
End point timeframe:	
16 Weeks	

End point values	Secukinumab 10 mg/kg i.v. / 150 mg s.c.	Secukinumab 10 mg/kg i.v. / 300 mg s.c.	Placebo i.v. and s.c.

Statistical analyses

No statistical analyses for this end point

Secondary: ASAS partial remission

End point title	ASAS partial remission
End point description:	
ASAS partial remission is a composite assessment, reflecting the proportion of treated patients who achieve within a defined time frame a value not above 2 units in each of the 4 ASAS domains on a scale of 10. In this study, ASAS partial remission was used to assess the efficacy of at least one dose of secukinumab versus placebo.	
End point type	Secondary
End point timeframe:	
16 weeks	

End point values	Secukinumab 10 mg/kg i.v. / 150 mg s.c.	Secukinumab 10 mg/kg i.v. / 300 mg s.c.	Placebo i.v. and s.c.	
Subject group type	Reporting group	Reporting group	Reporting group

upper limit	150.79

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Adverse Events (AEs) are collected from First Patient First Visit (FPFV) until Last Patient Last Visit (LPLV). All AEs reported in this record are from date of First Patient First Treatment until Last Patient Last Visit up to approximately 3 years.

Adverse event reporting additional description:

Patients randomized to Placebo at Baseline are reported under Placebo for AEs starting before re-randomization to Secukinumab (Week 16) and under the respective Secukinumab arm for AEs starting after re-randomization to Secukinumab (Week 16).

Assessment type	Systematic

Reporting groups

Reporting group title	Any AIN457 150 mg
-----------------------	-------------------

Reporting group description:

Includes Patients randomized to Secukinumab 150 mg at baseline + patients re-randomized to Secukinumab 150 mg at week 16 (for AEs occurring after re-randomization)

Reporting group title	Any AIN457 300 mg
-----------------------	-------------------

Reporting group description:

Includes Patients randomized to Secukinumab 300 mg at baseline + patients re-randomized to Secukinumab 300 mg at week 16 (for AEs occurring after re-randomization)

Reporting group title	Any AIN457
-----------------------	------------

Reporting group description:

Any Secukinumab 150 mg + Any Secukinumab 300 mg

Reporting group title	Placebo
-----------------------	---------

Reporting group description:

Includes Patients randomized to Placebo for AEs until time of rerandomization (Week 16) to Secukinumab.
